Re: Radio License Holding SRC LLC (RLH)

KTCK(AM), Dallas, TX

Facility Identification Number: 8773 Special Temporary Authority (STA)

BESTA-20151211ABL

Dear Mr. Denning:

This is in reference to the request filed on December 11, 2015. RLH requests a further extension of the STA granted on November 27, 2013, to operate with reduced power during daytime hours due to required repairs. In support of the request, RLH states that final work on the method of moment proof must be delayed until after flood waters have subsided.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and RLH may continue to operate KTCK(AM) during daytime hours with a reduced power of 15 kW (with no change to licensed 5 kW nighttime operation). It will be necessary to further reduce power or cease operation if complaints of interference are received. RLH must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. We anticipate that RLH will be able to

¹ KTCK(AM) is licensed for DA operation on 1310 kHz with 25 kW daytime and 5 kW night.

complete all work and file the required FCC Form 302 application with a new proof before the expiration date shown below to update all operating parameters (due to repairs done over the past two years).

This authority expires on July 5, 2016.

Sincerely,

Joseph Szczesny, Engineer

Audio Division Media Bureau
