Re: WMKL(FM), Key Largo, Florida
Facility Identification Number: 61087
Call Communications Group, Inc.
Special Temporary Authorization

Dear Mr. Robbins:

This is in reference to: 1) the special temporary authority ("STA") granted on March 16, 2007, to Call Communications Group, Inc. ("CCG") for operation of Station WMKL with temporary facilities; and 2) CCG's e-mail message April 16, 2007, which requests modification of the STA to specify 50 kilowatts instead of 5 kilowatts as authorized.¹

CCG's message will be considered as a Petition for Reconsideration of the April 16, 2007, grant.²

On reconsideration, we find that, since Station WMKL is currently licensed for operation on Channel 219 with 50 kilowatts, circularly polarized, any adverse impact on the affected Channel 6 TV station would not be increased by temporary operation on Channel 220 with horizontally polarized effective radiated power ("ERP") less than 50 kilowatts, but in excess of the 5 kilowatt equivalent of the vertical-only 50 kW ERP specified in Construction Permit BPED-20070208AAD. Consequently, in order to provide for continued service to the WMKL community pending resolution of the structural issues relative to installation of the new antenna, we modify the STA to specify operation with 25 kilowatts.

Accordingly, the April 16, 2007, STA IS HEREBY MODIFIED to specify a power increase as

¹ WMKL is licensed for operation on Channel 219C2 (91.7 MHz) with effective radiated power ("ERP") of 50 kilowatts (H&V) and antenna height above average terrain of 94 meters. Construction Permit BPED-20070208AAD authorizes a change in frequency to Channel 220C2 (91.9 MHz) and operation with ERP of 50 kilowatts, vertically polarized.

² In telephone discussions with the staff, CCG has indicated that the 5 kilowatt STA operation does not provide adequate coverage of the station's market.

discussed above. Station WMKL may operate with the following facilities:

Geographic coordinates:	25° 14' 07" N, 80° 19' 35" W (NAD 1927)
Channel	220 (91.9 MHz)
Effective radiated power:	not to exceed 25 kilowatts (H&V)
Antenna height:	
above ground:	91 meters
above mean sea level:	94 meters
Above average terrain:	94 meters

CCG must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 19, 2007**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
