Dear Mr. Saharko:

Budd Broadcasting Co., Inc. (“Budd”) responds to the February 20, 2014 letter signed by the Chief, Video Division, Media Bureau.¹ The letter was sent pursuant to Section 1.88 of the Commission’s Rules (47 C.F.R. § 1.88). In the letter, Budd was invited to submit a statement setting forth its view regarding the investigation.

¹ A copy of the letter is attached (Attachment A).

BACKGROUND

Budd acquired WFXU from WFXU License Corporation on January 25, 2007². In that application, Budd certified that “it is cognizant of and will comply with its obligations as a Commission licensee to present a program service responsive to the issues of public concern facing the station’s community of license and service area.” It should be noted that the certification in question was made by Mr. Harvey Budd, the President of Budd and, as will, he demonstrated, was correct at the time it was made. See Declaration of Harvey Budd (Attachment C).

Budd consummated the acquisition of WFXU on January 19, 2007.³ Prior to the acquisition, WFXU operated as a satellite of WTLH-TV, Bainbridge, Georgia, a Fox network affiliate. Subsequent to consummation, WFXU ceased operating as a satellite. On June 17, 2008, Budd filed an application (FCC Form 301) to modify the WFXU license (BDCDT-20080617ABP) (Attachment E). The application was intended to maximize the coverage of WFXU-DT. See also Declaration of Harvey Budd (Attachment C).

By letter dated December 30, 2008 (Attachment F), the Commission, through the Chief, Video Division, denied the application. The rationale for the denial was due to “loss of service.”

On January 29, 2009, Budd filed a Petition for Reconsideration of the December 30, 2008 letter ruling (Attachment G). In that submission, Budd pointed out that WFXU had struggled financially since the station first began operation and generated cash flow deficits for the entire year of its existence. Mr. Budd stated that the economic realities were such that, absent a grant of the maximization application, the economic viability of operating the station became doubtful. Budd also pointed out that, pursuant to requests by the prior licensee, WFXU had received numerous construction extensions based upon financial hardship. See FCC File No. BEPCDT-20020304AIK; FCC File No. BEPCDT-20021018AAK; FCC File No. BEPCDT-20030923ADW; FCC File No. BEPCDT-20041216AEQ; and FCC File No.

² A copy of the assignment application, BALCT-20061121AIV, is attached (Attachment B).

³ A copy of the Consummation Notice is attached (Attachment D).

BEPCDT-20050915ACI (This application, at Exhibit 1, provides a detailed narrative of the financial problem WFXU has historically experienced).

In the context of the January 29, 2009 Petition, Budd stated the following:

“Budd has operated WFXU legally since becoming the licensee of the station. However, the station has not provided meaningful service. In this regard, due to financial difficulties, the programming it has broadcast consists of only two (2) half-hour public affairs programs. These programs are repeated over and over when the station is on the air. *See* Budd Declaration (Attachment H). Because of technical difficulties stemming from Budd’s financial plight, the station has been barely operating and, as previously stated, the programming provided could hardly be characterized as meaningful. In this regard, through a series of notifications, the station has suspended operations and then resumed operations for brief periods of time (*See* Attachment G). It was Budd’s hope that, upon grant of the subject maximization application, the station would be able to become economically viable. The real question is whether the grant of the subject application with the attendant hypothetical “loss of service” is better than the ultimate denial of the subject application and the real cessation of all service. It is submitted that the latter is hardly the more favorable result. It is further submitted that, under the circumstances previously delineated, the public interest would be better served by a grant of the subject application.”

On October 7, 2009, Budd filed a Supplement to Petition for Reconsideration (Attachment H). In that Supplement, Budd attempted to address the technical concerns expressed in the December 30, 2008 letter ruling.⁴ Budd also stated that there would not be a “loss of service” in any real sense by a grant of the application. Furthermore, Budd emphasized that grant of the application would be in the public interest. “Specifically, it would advance the Commission’s bedrock principle of localism in light of Budd’s commitment to local news and public affairs programming; (2) maintenance of a local studio and production facilities within the Live Oak coverage area; (3) continued provision of principal city coverage over all of Live Oak; (4) a substantial increase in the number of people who will be able to view the WFXU-DT over-the-air programming [See Amendment of Section 73.622(i) (Ann Arbor, Michigan), NPRM, DA-08-1502, rel Sep. 2, 2008 (issuance of NPRM is warranted where proposal would allow the

⁴ Prior to the submission of the Supplement, Harvey Budd and Budd’s counsel met with the Chief of the Video Division and the Chief of the Television Branch. As a result of that meeting, Budd was asked to submit the information contained in the October 7, 2009 Supplement.

station to better serve the television market to which it is assigned)]; (5) advancement of the Commission's critical goal of promoting competition; and (6) preservation of the ownership and service of stations that confront extreme financial exigencies. Accordingly, the Commission should reconsider the denial of the application and, in light of the arguments advanced, the application should be granted."

In response to a request from the Video Division personnel, Budd, on April 29, 2010 submitted a second Supplement to Petition for Reconsideration (Attachment I). That submission provided information as to the television service received in the existing WFXU service area and the television service received in the proposed service area (BPCDT-20080614ABP).⁵

On April 23, 2012, Budd filed an application to modify the WFXU license (Attachment J) (BPCDT-20120423ABL). That application was filed after consultation with Commission staff.⁶

The following attachments delineate the submissions in which the Commission was notified that WFXU had gone silent and notification that the station had resumed operation:

Attachment Y: BLSTA-20101118AJD (Request for Silent STA).

Attachment Z: Resumption of Operations (November 12, 2011).

Attachment AA: (Request for Silent STA).

Attachment BB: On August 30, 2013, WFXU filed a notification that it had resumed broadcast operations on August 28, 2013. It has been in continuous operation since that date.

Budd noted that during the time period which was the subject of the afore-mentioned request for silent STA's, Budd did not file issue program lists pursuant to 47 C.F.R. 73.3526(11)(c). However, that section of the rules would clearly be operative if the station was on the air. Similarly, while Budd did file children's programming reports, it was unable, under the circumstances, to broadcast children's programming. The Commission cannot expect a licensee to address issues or children's programming when it is silent. It should be noted that since resuming permanent broadcast operations, Budd has filed Issues/Programs Lists (Attachment CC).

DISCUSSION

The Commission is concerned with the service Budd had provided. As previously pointed out, the economic realities dictated the course of action which caused Budd to minimally operate the station.

Budd made a significant investment in the acquisition of WFXU. Budd also made the determination that for WFXU to be viable, it needed to maximize its coverage. In furtherance of this goal, Budd has spent considerable effort and money.

It should also be recognized that at no time did Budd violate Section 312(g) of the Communications Act. In this regard, WFXU was not dark for twelve (12) consecutive months. Its operation was fully consistent with the Commission's rules and the Communications Act. See Harvey Budd Declaration (Attachment C) and Robert Carr Declaration (Attachment DD).

Budd's certification in the assignment application that it would "present a program service responsive to issues of public concern facing the station's community of license and service area," was made sincerely. Budd, at the time of the certification, fully intended to do just that. However, as previously explained, the economic realities prevented Budd from doing what it originally intended absent a grant of the maximization application.

MISREPRESENTATION

The Commission expresses concerns about whether Budd intentionally misrepresented facts to the Commission. The predicate for the Commission's concern is expressed as follows:

"Serious questions exist as to whether Budd Broadcasting may have intentionally abused the Commission's STA process to avoid compliance with its broadcasting obligations and to evade the automatic cancellation provision of Section 312(g). Specifically, questions exist as to whether Budd Broadcasting accurately and fully represented its true justifications for seeking silent authority, given the apparent disparity between the justifications listed in its STA requests and the explanation provided in its petition for reconsideration. Moreover, we question whether Budd Broadcasting's certification that it had not committed any violation of the Communications Act of 1934 or the Commission's rules during the previous term was truthful and accurate."

It is axiomatic that a renewal application should be granted provided that (1) the renewal applicant is legally, technically, financially, and otherwise qualified, (2) the applicant has not been found in violation of the law, FCC policies or rules, and (3) grant of the application would further the public interest.

At the outset, the Commission raises a concern over the utilization of numerous silent STA's by Budd, to avoid the consequences of Section 312(g) of the Communications Act. Moreover, the

Commission is also concerned that the silent STA requests may be inconsistent with Budd's representation that it suspended operation for financial reasons.

It is submitted that Budd's actions were full consistent with the Commission's rules. Budd was not attempting to "game" the system. Rather, Budd was utilizing the system in a fully legal manner.⁹

Budd's filing of its Children's Programming Reports were at times late, but they were filed. With respect to the Programs/Issues Lists, under the circumstances, it was impossible to file them. However, since Budd has returned to the air on a permanent basis, they have been filed.

Budd did not make any misrepresentation to the Commission. The WFXU analog transmitter was on its last legs. Budd realized after it had closed on the acquisition of WFXU that, in order for WFXU to be economically viable, a modification was in order. Rather than immediately replace the transmitter, Budd anticipated doing that concurrent with the implementation of the modification. Budd desired to purchase all necessary equipment as a package. Budd's submissions to the Commission were fully consistent with this objective. Budd was fully candid with the Commission. Thus, the transmitter was unable to perform more than sporadically. Accordingly, Budd's assertions that WFXU had gone silent for technical reasons were true. Thus, Budd did not intentionally make any misstatements. In this regard, an "intent to deceive" is a necessary element of proving misrepresentation or lack of candor in FCC proceedings. See *Swan Creek Communications, Inc. v. FCC*, 39 F 3d; 1217 (D.C. Cir. 1994) and *Fox River Broadcasting, Inc.*, 93 FCC 2d 127, 129 (1983).

It is submitted that the Commission should rely heavily on Budd's operation since August 2013. It is clear that for almost a year, Budd has been operating the station consistently.¹⁰ Moreover, the continued operation would clearly be in the public interest. It is well settled that a licensee's most recent

⁹ Budd has never been advised by the Commission that what it was doing was in violation of any Commission rule or policy. Moreover, the *Birach Broadcasting Corporation* Decision 16 FCC Rcd 5015, 5020 (2001) cited in the Bureau's Order was released in 2001. Budd, a television licensee, did not have any notice of it.

¹⁰ Budd is continuing to suffer financial losses and still intends to implement the modification subsequent to Commission approval.

Dear Licensee:

This is in regard to the above-captioned license renewal application. Pursuant to Section 1.88 of the Commission's Rules,¹ we write to update you on our pending investigation of the station and to invite you to submit a statement to the staff setting forth the Licensee's views regarding the investigation.

Background. On January 25, 2007, Budd Broadcasting acquired WFXU from WFXU License Corporation.² In the assignment application, Budd Broadcasting certified that "it is cognizant of and will comply with its obligations as a Commission licensee to present a program service responsive to the issues of public concern facing the station's community of license and service area."³ Shortly after its acquisition of WFXU,⁴ Budd Broadcasting made the first of numerous requests for Special Temporary Authorizations ("STA") to remain silent, citing technical or equipment issues as the justification for the requests.⁵ Only one such request was granted. According to representations made by Budd Broadcasting in the STA requests, WFXU was silent from:

- August 22, 2007 through August 1, 2008
- August 4, 2008 through an undetermined date
- November 22, 2009 through October 17, 2010
- November 14, 2010 through November 12, 2011
- December 1, 2011 through November 12, 2012

Thus, during the relevant renewal term during which Budd Broadcasting was the licensee of WFXU-- January 19, 2007 through February 1, 2013--the station was off the air for at least 45 months and almost certainly many more, as described in further detail below. These extensive

⁴ Budd Broadcasting's acquisition of WFXU was consummated on January 19, 2007. Prior to the acquisition, WFXU operated as a satellite of WTLH-TV, Bainbridge, Georgia, a Fox network affiliate, but once Budd Broadcasting acquired the license, WFXU ceased operating as a satellite.

periods of silence occurred without Commission authorization. Budd Broadcasting frequently notified the Commission that it had resumed operations just before the automatic cancellation provision of Section 312(g) of the Communications Act would go into effect.⁶

Indeed, the record of when WFXU was on and off the air is incomplete and potentially raises issues under Section 312(g). For example, the Licensee filed a request for authority to take the station silent on January 13, 2009 which stated the station was off the air beginning on November 17, 2008.⁷ On January 28, 2009, the Licensee filed another request for silent authority which stated the station was off the air beginning on August 12, 2008.⁸ The Commission has no record of the station filing the required "Resumption of Operations" form before its next request for silent authority, which stated that the Station was off the air beginning on November 22, 2009.

Not only has the station been silent during most of its ownership period, Budd Broadcasting has characterized the service provided by WFXU during the times that it was on the air as not "meaningful." In 2008, Budd Broadcasting filed an application requesting a modification of its DTV facility to move to a location approximately 40 miles from its authorized site.⁹ The Video Division denied the application, which would have resulted in loss of service to approximately three quarters of the geographic area within its protected contour, concluding that Budd Broadcasting had failed to show that the public interest would be served by its grant because providing additional service to already well-served existing viewers did not justify withdrawing existing service from others.¹⁰

Budd Broadcasting filed a Petition for Reconsideration on January 29, 2009, arguing that the Video Division incorrectly concluded that loss of service prevented grant of its modification application because WFXU had not in fact been providing "meaningful service" to viewers in its coverage area.¹¹ According to the Petition, any loss of service was "hypothetical" in that:

Budd has operated WFXU legally since becoming the licensee of the station. However, the station has not provided meaningful service. In this regard, due to financial difficulties, *the programming it has broadcast consists of only two (2) half-hour public affairs programs.* These programs are repeated over and over when the station is on the air. Because of technical difficulties stemming from Budd's financial plight, *the station has been barely operating* and, as previously stated, *the programming provided could hardly be characterized as meaningful.* In this regard, through a series of notifications, the

station has suspended operations and then resumed operations for brief periods of time.¹²

Each of the STA requests filed by Budd Broadcasting with the Commission cited technical or equipment issues that prevented the station from broadcasting. Nonetheless, Budd Broadcasting represented to the Commission that it resumed operations on numerous occasions during the years in which it purportedly faced technical or equipment issues that prevented the station from broadcasting. Moreover, as described above, Budd Broadcasting later represented to the Commission that it suspended broadcast for financial reasons.

Budd Broadcasting has also apparently committed numerous other violations of the Commission's rules during the license period. Commission rules require commercial broadcast stations to file "every three months a list of programs that have provided the station's most significant treatment of community issues during the preceding three month period," to be filed by the tenth day of the succeeding calendar quarter.¹³ The station's online public file shows no evidence of any such filings since Budd Broadcasting has held the license.

Commission rules further require that commercial stations file a completed Children's Television Programming Report "reflecting efforts made by the licensee during the preceding quarter, and efforts planned for the next quarter, to serve the educational and information needs of children."¹⁴ The report is to be placed in the public inspection file by the tenth day of the succeeding calendar quarter.¹⁵ Commission records show that Budd Broadcasting failed to file this for the third quarter of 2009. Budd Broadcasting filed late reports for all four quarters in 2007, all four quarters in 2008, the first, second, and fourth quarter of 2009, all four quarters in 2010, all four quarters in 2011, all four quarters of 2012, and the first two quarters of 2013, and further indicated in those late-filed reports that no children's programming was aired due to the fact that the "station has been silent pursuant to STA request."¹⁶

Moreover, the Children's Television Programming Report should detail the licensee's fulfillment of its obligation to serve the educational and informational needs of children through CORE programming, as defined in 47 C.F.R. 73.671(c). Budd Broadcasting's license renewal application selected "N/A" in response to the application form's request that it certify that "the average number of hours of CORE programming per week broadcast by the station totaled 3 hours or more. . . ."¹⁷

Discussion. The Commission evaluates an application for license renewal pursuant to the standards set forth in Section 309(k) of the Act. That section provides that we are to grant the renewal application if, upon consideration of the application and pleadings, we find that (1) the station has served the public interest, convenience, and necessity; (2) there have been no serious

violations of the Communications Act or the Commission's Rules; and (3) there have been no other violations which, taken together, constitute a pattern of abuse.¹⁸ If, however, the licensee fails to meet that standard, the Commission may deny the application – after notice and opportunity for a hearing under Section 309(e) of the Act – or grant the application “on terms and conditions that are appropriate, including a renewal for a term less than the maximum otherwise permitted.”¹⁹

Serious questions exist as to whether Budd Broadcasting has met the needs and interests of the community during its license term and, therefore, whether WFXU has served the public interest. As described above, during Budd Broadcasting's period as licensee of WFXU, the station was off the air for 45 months on record and almost certainly many more. Indeed, as further described above, the incomplete record regarding the station's history of operations potentially implicates the provisions of Section 312(g) of the Communications Act.

The Commission has previously addressed the issue of whether a broadcast station license should be renewed when the station was silent during much of the preceding license term. In *Birach Broadcasting*,²⁰ the staff granted a license renewal application when the licensee of a long-silent station initiated broadcasts for the first time after the renewal application had been filed. The Commission affirmed that action on the unique facts of the case, indicating that non-renewal is a harsh consequence and that the licensee in that case did not have “full and explicit notice” that the station's prolonged silence would jeopardize its renewal application.²¹ However, the Commission further stated that, in the future, “a licensee will face a very heavy burden in demonstrating that it has served the public interest where it has remained silent for most or all of the prior license term.”²² In *Birach Broadcasting*, the station was off the air for three and a half of the four years that Birach Broadcasting served as licensee.²³ We believe that there is a substantial and material question as to whether Budd Broadcasting, which has been off the air for even longer, has met that burden here.

Moreover, despite certifying that it would “present a program service responsive to the issues of public concern facing the station's community of license and service area,” Budd Broadcasting has by its own admission not provided “meaningful” service to the community in its time as a licensee. For example, the “issues/programs list is a significant and representative indication that a licensee is providing substantial service to meet the needs and interests of its community. . . .”²⁴ Budd Broadcasting's apparent failure to prepare and place such lists in its public file means it has provided no such indication of substantial service.

We are also concerned about whether Budd Broadcasting has intentionally misrepresented facts to the Commission, thus calling into question whether the licensee possesses the requisite

character necessary to grant a license renewal. Section 1.17 of the Commission's Rules prohibits misrepresentation or willful material omission in any application, pleading, or any other written submission to the Commission.²⁵ Moreover, the duty of candor requires applicants to be fully forthcoming as to all facts and information that may be decisionally significant to their applications.²⁶ The requirement for absolute truth and candor from those appearing before the Commission is fundamental because the Commission must rely heavily on the completeness and accuracy of the submissions made to it by applicants.²⁷ If a licensee is found to have misrepresented itself to the Commission, it would be disqualified from grant of a renewal application on the grounds of character.²⁸ The Commission "find[s] it appropriate and sufficient to treat any violation of any provision of the Act, or of our Rules or policies, as possibly predictive of future conduct and, thus, as possibly raising concerns over the licensee's future truthfulness and reliability, without further differentiation."²⁹ The "ultimate inquiry . . . is whether . . . the Licensee can be trusted to be reliable and truthful and to conduct itself in compliance with the Commission's rules in its future dealings with the Commission. . . ."³⁰

Serious questions exist as to whether Budd Broadcasting may have intentionally abused the Commission's STA process to avoid compliance with its broadcasting obligations and to evade the automatic cancellation provision of Section 312(g). Specifically, questions exist as to whether Budd Broadcasting accurately and fully represented its true justifications for seeking silent authority, given the apparent disparity between the justifications listed in its STA requests and the explanation provided in its petition for reconsideration.³¹ Moreover, we question whether Budd Broadcasting's certification that it had not committed any violations of the Communications Act of 1934 or the Commission's rules during the previous term was truthful and accurate.

Finally, serious questions also exist as to whether Budd Broadcasting's apparent numerous violations of the Commission's rules during its license term together constitute a pattern of abuse that would warrant denial of the license renewal application.³² We have discussed above Budd Broadcasting's apparent failure to comply with our requirement that issues/programs lists be prepared and placed in the station's public file each quarter. Budd Broadcasting has also apparently committed numerous violations of our Children's Television Programming rules. Budd Broadcasting also apparently has not met its obligation to air at least three hours per week of CORE Children's Television Programming. "Licensees that do not meet these processing

- 1) A full accounting, accompanied by a declaration from a station representative under penalty of perjury, of the station's periods of broadcast silence from January 25, 2007 through the present;
- 2) Any evidence, accompanied by declaration from a station representative under penalty of perjury, that would counter, rebut, excuse, or otherwise explain the factual findings above;
- 3) A detailed explanation, with cites to Commission rules, guidance, and case precedent, as to why, given the extensive potential violations of Commission rules identified above, renewal of the license for an additional term would serve the public interest, convenience, and necessity.
- 4) A detailed explanation, with cites to Commission rules, guidance, and case precedent, as to how WFXU(DT) met the needs and interests of the community during the previous license term, given its predominant periods of silence, its representation to the Commission that it did not provide meaningful service, and its failure to provide required documentation to the Commission that could serve as a presumption that this standard was met.

Your submission must be filed with the Office of the Secretary, Federal Communications Commission, 445 12th Street, S.W., Washington, D.C. 20554, ATTN: Peter Saharko, Attorney Advisor, Video Division, Media Bureau, within 30 days of the date of this letter. An electronic copy should also be sent to peter.saharko@fcc.gov. **Failure to provide the requested information or to request a change in status within 30 days from the date of the letter will result in further action, including potential dismissal of the license renewal application.**

ASSET PURCHASE AGREEMENT

ASSET PURCHASE AGREEMENT dated as of November 21, 2006 (this "Agreement"), by and between **WFXU License Corporation** ("Seller") and **Budd Broadcasting Company, Inc.** ("Buyer").

WITNESSETH:

WHEREAS, Seller holds all licenses, permits and authorizations and certain other assets necessary and useful to operate WFXU(TV) and WFXU-DT Live Oak, Florida (the "Stations"); and

WHEREAS, Seller desires to sell to Buyer, and Buyer desires to purchase from Seller, substantially all of the assets held by Seller and used in connection with the operation of the Stations, all on the terms and subject to the conditions set forth herein;

NOW, THEREFORE, in consideration of the foregoing and the mutual covenants and agreements hereinafter set forth, the parties hereto agree as follows:

ARTICLE 1

PURCHASE OF ASSETS

1.1 Transfer of Assets. On the Closing Date (as hereinafter defined), subject to the satisfaction of the conditions contained herein, Seller shall sell, assign, transfer and convey to Buyer, and Buyer shall purchase from Seller, all of the assets, properties, interests and rights of Seller of whatsoever kind and nature, tangible and intangible, which are used or held for use in connection with the operation of the Stations (the "Assets"), including, but not limited to, the following:

- (a) All licenses, permits and other authorizations relating to the Stations issued

to Seller by the Federal Communications Commission ("FCC") or any other governmental authority on or prior to the Closing Date, together with renewals or modifications thereof, including, without limitation, those listed in Schedule 1.1 (a) hereto (the "Authorizations");

(b) All of Seller's right, title and interest in and to each contract, agreement and lease listed in Schedule 1.1 (b) hereto (the "Contracts")

(c) All of Seller's right, title and interest in and to the call letters WFXU and all trademarks, trade names, service marks, franchises, copyrights, including registrations and applications for registration of any of them, jingles, logos and slogans used in the conduct of the business and operation of the Stations and either owned by Seller or licensed to Seller on the date hereof, together with any associated goodwill and any additions thereto between the date hereof and the Closing Date, including, without limitation, those listed in Schedule 1.1(c) hereto;

(d) All machinery, equipment, tools and other tangible personal property used or useful in connection with the operation of the Stations, including, without limitation, those listed in Schedule 1.1 (d) hereto.

(e) All files, records and books of account relating to the Stations, including, without limitation, programming and technical information, engineering data, consulting reports, marketing data, sales correspondence, lists of advertisers, promotional materials, credit and sales reports, FCC filings, copies of all written contracts to be assigned hereunder, logs, the public inspection file and all software programs used in connection with the operation of the Stations.

The Assets shall be transferred to Buyer free and clear of all liens, encumbrances, debts, security interests, mortgages, trusts, claims, pledges, charges, covenants, conditions or

restrictions of any kind ("Liens").

ARTICLE 2

ASSUMPTION OF OBLIGATIONS

2.1 No Assumption of Liabilities and Obligations. Except as otherwise provided herein, Buyer shall not assume any obligations or liabilities of Seller, including (i) any obligations or liabilities under any contracts, leases or other agreements, (ii) any claims or pending litigation or proceedings relating to the operation of the Stations prior to the Closing, (iii) any obligations or liabilities under any employee pension, retirement, health and welfare or other benefit plans or collective bargaining agreements, (iv) any obligation to any employee of Seller for severance benefits, vacation time, or sick leave accrued prior to the Closing Date, (v) any obligations for taxes due for periods prior to the Closing Date, or (vi) any obligations or liabilities caused by, arising out of, or resulting from any negligent action or omission of Seller or any intentional breach or willful misconduct of Seller, and all such obligations and liabilities shall remain and be the obligations and liabilities solely of Seller, and shall be fully satisfied by Seller prior to Closing.

ARTICLE 3

CONSIDERATION

3.1 Purchase Price. In consideration for the transfer of the Assets, Buyer shall (i) pay to Seller the sum of One Hundred Thousand Dollars (\$100,000) (the "Purchase Price"), in immediately available funds and (ii) assume the contracts listed in Schedule 1.1 (b) hereto. Within two business days of the signing of this Agreement, Buyer shall deposit \$25,000 with Seller as a deposit (the "Deposit"). At the time of Closing, the Deposit shall be credited against the Purchase Price. If a Closing does not occur and this Agreement is mutually terminated by Seller and Buyer or if this Agreement is terminated by Buyer pursuant to Section 13.2, the Deposit shall be returned to Buyer. If this Agreement is terminated by Seller

pursuant to Section 13.1(a), the Deposit shall be retained by Seller (but, in no case, shall limit the amount of damages that Seller may be entitled to pursuant to Section 13.3 of this Agreement.

3.2 Allocation of Purchase Price. The Purchase Price shall be allocated as mutually agreed upon by Buyer and Seller prior to Closing. In the event that Buyer and Seller shall be unable to mutually agree upon the allocation by Closing, such dispute shall be settled by an independent certified public accountant mutually acceptable to the parties, and the fees and expenses of such accountant shall be paid one-half by Buyer and one-half by Seller. Buyer and Seller agree that the allocation determined by their mutual agreement or otherwise by the independent certified public accountant, as the case may be, shall be conclusive and binding on Buyer and Seller for all purposes, including without limitation, reporting and disclosure requirements of the Internal Revenue Service.

3.3 Proration of Income and Expenses.

(a) Except as otherwise provided herein, all income and expenses arising from the conduct of the business and operation of the Stations shall be prorated between Buyer, on account of the period after Closing, and Seller, on account of the period before Closing, in accordance with generally accepted accounting principles as of 11:59 p.m., Eastern time, on the date immediately preceding the Closing Date. Such prorations shall include, without limitation, all taxes, business and license fees, music and other license fees, utility expenses, rents and similar prepaid and deferred items attributable to the ownership and operation of the Stations. Salaries, wages, sales commissions, fringe benefit accruals and termination or severance pay for employees shall not be prorated but shall be the sole responsibility of Seller. The prorations and adjustments contemplated by this Section, to the extent practicable, shall be made on the Closing Date. All prorations and adjustments made on the Closing Date shall be paid in the form of an increase or decrease of the amount payable by Buyer at the Closing.

(b) As to those prorations and adjustments not capable of being ascertained on the Closing

Date, an adjustment and proration shall be made within sixty (60) days of the Closing Date. In the event of any disputes between the parties as to such adjustments, the amounts not in dispute shall nonetheless be paid at such time and such disputes shall be resolved by an independent certified public accountant mutually acceptable to the parties, and the fees and expenses of such accountant shall be paid one-half by Seller and one-half by Buyer. The decision of such accountant shall be conclusive and binding on the parties. All prorations and adjustments made after the Closing shall be paid within five (5) business days of the determination thereof.

ARTICLE 4

GOVERNMENTAL CONSENTS

4.1 FCC Consent. It is specifically understood and agreed by Buyer and Seller that consummation of the transactions contemplated hereby is expressly conditioned on and is subject to the prior consent and approval of the FCC ("FCC Consent") without the imposition of any conditions which might be expected to have a material adverse effect on the results of operations of Buyer.

4.2 FCC Application. Within five (5) business days after execution of this Agreement, the parties shall file with the FCC an application for assignment of the Authorizations ("FCC Application") from Seller to Buyer. The parties shall thereafter use all reasonable efforts to obtain the grant of the FCC Application as expeditiously as practicable (but no party shall have any obligation to satisfy complainants or the FCC by taking any steps which would have a material adverse effect on the results of operations of a party or any affiliated entity). If the FCC Consent imposes any condition on a party hereto, such party shall use reasonable efforts to comply with such condition; provided, however, that no party shall be required hereunder to comply with any condition that would have a material adverse effect on the results of operations of such party or any affiliated entity. If FCC Consent is obtained (granted) and

reconsideration or judicial review is sought by any third party, the party affected shall vigorously oppose such efforts for reconsideration or judicial review; provided, however, such party shall not be required to take any action which would have a material adverse effect on the results of operations of such party or any affiliated entity. Seller hereby consents to and agrees to cooperate with Buyer in connection with the filing of a request by Buyer for a modification to the Stations' facilities, such modification to be contingent upon consummation and effective on or after the Closing Date; provided that all costs associated with said filing, including engineering fees, legal fees, and expenses, are done at Buyer's expense. Nothing in this Section 4.2 shall be construed to limit a party's right to terminate this Agreement pursuant to Article 13 hereof.

ARTICLES 5

CLOSING

5.1 Closing. Except as otherwise mutually agreed upon by Seller and Buyer, the consummation of the transactions contemplated herein (the "Closing") shall take place upon the latest to occur of (i) the satisfaction of all conditions precedent and (ii) within five (5) business days after the FCC Consent shall have become a Final Order (as hereinafter defined) (the "Closing Date"). As used herein, the term "Final Order" means a written action or order issued by the FCC setting forth the FCC Consent (a) which has not been reversed, stayed, enjoined, set aside, annulled or suspended, and (b) with respect to which (i) no requests have been filed for administrative or judicial review, reconsideration, appeal or stay, and the time for filing any such requests and for the FCC to set aside the action on its own motion (whether upon reconsideration or otherwise) has expired, or (ii) in the event of review, reconsideration or appeal, the time for further review, reconsideration or appeal has expired. Notwithstanding the foregoing, Buyer may elect to proceed with the Closing upon public notice of the grant of FCC Consent but prior to the date on which the FCC Consent shall have become a Final Order upon five (5) days written notice to Seller. All actions taken at the Closing will be considered as having been taken simultaneously and no such actions will be considered to be completed

until all such actions have been completed. The Closing shall be held at such place as the parties hereto may agree.

ARTICLE 6

REPRESENTATIONS AND WARRANTIES OF SELLER

Seller represents and warrants to, Buyer as follows:

6.1 Organization, Standing, and Authority. Seller is duly organized, validly existing, and in good standing under the laws of the jurisdiction in which it is organized. Seller has all requisite power and authority (i) to own, lease, and use the Assets as now owned, leased and used and (ii) to conduct the business and operation of the Stations as now conducted. Seller has all requisite power and authority to execute and deliver this Agreement and the documents contemplated hereby, and to perform and comply with all of the terms, covenants, and conditions to be performed and complied with by it hereunder and thereunder. Seller is not a participant in any joint venture or partnership with any other person or entity with respect to any part of the business or operation of the Stations or any of the Assets.

6.2 Authorization and Binding Obligation. The execution, delivery, and performance of this Agreement, and the execution, delivery and performance of any other documents to be delivered or executed in connection with this Agreement and the transactions contemplated by this Agreement, by Seller have been (or will prior to Closing be) duly authorized by all necessary actions on the part of Seller. This Agreement and all other documents have been duly executed and delivered by Seller and constitutes the legal, valid, and binding obligation of Seller, enforceable in accordance with their terms except as the enforceability of this Agreement may be affected by bankruptcy, insolvency, or similar laws affecting creditors' rights generally, and by judicial discretion in the enforcement of equitable remedies.

6.3 Authorizations. Schedule 1.1 (a) includes a true and complete list of the Authorizations. The Authorizations have been validly issued pursuant to Final Orders. Seller

is the authorized legal holder of the Authorizations. The Authorizations are in good standing and in full force and effect. The Authorizations are all of the licenses, permits or other authorizations from governmental and regulatory authorities necessary to operate the Stations. Except as set forth on Schedule 1.1 (a), (i) the operations of the Stations are in accordance with the Authorizations, (ii) none of the Authorizations are subject to any restriction or condition that would materially limit the full operation of any of the Stations, and (iii) no proceedings are pending or threatened, nor, to the best knowledge of Seller, do any facts exist, which may result in the revocation, modification, non-renewal or suspension of any of the Authorizations, the denial of any pending applications, the issuance of any cease and desist order, the imposition of any administrative actions by the FCC with respect to the Authorizations or which may affect Buyer's ability to operate any of the Stations in accordance with the Authorizations and the FCC's rules and regulations. . The Stations are not operating as of the date hereof and Seller has requested special temporary authority to remain silent. Buyer understands that, should the Stations not broadcast a signal within one year of September 18, 2006, that the Stations' licenses will automatically expire. Should the Stations' license automatically expire due to its failure to broadcast, Seller will not incur any liability with respect thereto.

6.4 Compliance With Law. Except as set forth on Schedule 1.1(a), the Assets of the Stations are in compliance with all applicable statutes, laws, ordinances, regulations, rules or orders of any foreign, federal, state or local government, governmental department or agency, including, without limitation, all foreign, federal, state and local energy, public utility, zoning, building code, health, employee safety, and OSHA requirements.

6.5 Litigation. There are no claims, actions, suits, litigation, labor disputes, arbitrations, proceedings or investigations pending or, to the best knowledge of Seller, threatened against

or affecting Seller, the Assets or the transactions contemplated by this Agreement. Seller is not subject to any order, judgment, writ, injunction or decree of any court or governmental agency or entity.

6.6 Taxes. Seller has paid all taxes required to be paid by Seller. There are no pending or, to the best knowledge of Seller, threatened, investigations or claims against Seller for or relating to any liability in respect of taxes and, to the best knowledge of Seller, no facts or circumstances exist which indicate that any such investigations or claims in respect of taxes may be brought or are under discussion with any governmental authorities. All taxes required to be withheld by Seller on or before the date hereof have been withheld and paid when due to the appropriate agency or authority.

6.7 Contracts. Schedule 1.1 (b) hereto sets forth a list of all written agreements to which Seller is a party or which are binding upon Seller or affect its assets or those of the Stations and a true and complete memoranda of all oral agreements, which Buyer shall assume pursuant to the terms and conditions hereof. Seller has delivered to Buyer true and complete copies of such agreements (including any amendments and other modifications thereto). Except as otherwise noted therein, all of the agreements listed in Schedule 1.1 (b) are in full force and effect. Seller is not in material breach, nor to Seller's knowledge is any other party in material breach, of the terms of any of such agreements. The consummation of the transaction contemplated hereunder will not result in a material breach of any such agreement, and all such agreements will continue in full force and effect following the consummation of the transaction.

6.8 Tangible Personal Property. Schedule 1.1(d) lists all machinery, equipment, tools, vehicles, furniture, leasehold improvements, office equipment, plant, inventory, spare parts, and other tangible personal property which is used or useful in the conduct of the business or operation of the Stations and, together with any additions thereto between the date of this

Agreement and the Closing Date (the "Tangible Personal Property"). The Tangible Personal Property listed on Schedule 1.1 (d) comprises all items of tangible personal property useful in the construction and operation of the Stations. Except as described in Schedule 1.1 (d), none of the Tangible Personal Property is subject to any security interest, mortgage, pledge, conditional sales agreement, or other lien or encumbrance, except for liens for current taxes not yet due and payable. Each item of Tangible Personal Property is available for immediate use in the business and operation of the Stations. Except as set forth on Schedule 1.1 (d), all items of transmitting and studio equipment included in the Tangible Personal Property have been maintained in a manner consistent with generally accepted standards of good engineering practice and are being conveyed to Buyer on an "as is, where is" basis.

6.9 Intangibles. Schedule 1.1 (c) is a true and complete list of all copyrights, trademarks, trade names, service marks, service names, licenses, patents, permits, jingles, proprietary information, technical information and data, machinery and equipment warranties, and other similar intangible property rights and interests, (and any goodwill associated- with any of the foregoing), applied for, issued to, or owned by Seller or under which Seller is licensed or franchised and which are used or useful in the business and operation of the Stations, together with any additions thereto between the date of this Agreement and the Closing Date ("Intangibles"), all of which are valid and in good standing and uncontested. Seller has delivered to Buyer copies of all documents in their possession establishing or evidencing all Intangibles. To the best of Seller's knowledge, Seller is not infringing upon or otherwise acting adversely to any trademarks, trade names, service marks, service names, copyrights, patents, patent applications, know-how, methods, or processes owned by any other person or persons, and there is no claim or action pending, or to the knowledge of Seller, threatened, with respect thereto.

6.10 Disclosure. The representations and warranties of Seller herein or in any document,

exhibit, statement, certificate or schedule furnished by or on behalf of Seller to Buyer as required by this Agreement do not contain nor will contain any untrue statement of a material fact or omits or will omit to state any material fact necessary in order to make the statements, herein or therein, in light of the circumstances under which they were made, not misleading. There is no fact known to Seller and not disclosed in this Agreement which adversely affects, or may in the future adversely affect, the Stations, or its Authorizations. Seller is making no representations or warranties as to its financial state or with respect to the current or future status of any business customers, programming, or employees of the Stations.

6.11 Reports. All material disclosures, returns, reports, and statements which Seller and the Stations are required to file with the FCC or with any other governmental agency have been filed, and all reporting requirements of the FCC and other governmental authorities having jurisdiction over Seller and the Stations have been complied with in all material respects. All of such returns, reports, and statements are complete and correct as filed. Seller has timely paid to the FCC all annual regulatory fees payable with respect to the Authorizations.

6.12 Undisclosed Liabilities. Seller will at Closing have no material debts, liabilities or obligations, other than in the ordinary course, secured or unsecured (whether absolute, accrued, contingent or otherwise, and whether due or to become due).

ARTICLE 7

REPRESENTATIONS AND WARRANTIES OF BUYER

Buyer represents and warrants to Seller as follows:

7.1 Organization and Standing. Buyer is a corporation duly organized, validly existing and in good standing under the laws of the State of Florida, and is qualified and has all requisite power and authority to purchase and operate the Assets and Station, to hold the Authorizations, to execute

and deliver this Agreement and the documents contemplated hereby, and to perform and comply with all of the terms, covenants and conditions to be performed and complied with by it hereunder and thereunder.

7.2 Litigation. There are no claims, actions, suits, litigation, labor disputes, arbitrations, proceedings or investigations pending or, to the best knowledge of Buyer, threatened against Buyer relating to the transactions contemplated by this Agreement or that would affect the ability of Buyer to obtain FCC Consent.

7.3 Representation as of the Closing Date. Buyer's representations and warranties set forth in this Agreement shall be true and correct on and as of the Closing Date, as though such representations and warranties were made on and as of such time.

7.4 Authorization and Binding Obligations. The execution, delivery, and performance of this Agreement, and the execution, delivery and performance of any other documents to be delivered or executed in connection with this Agreement and the transactions contemplated by this Agreement, by Buyer have been (or will prior to Closing be) duly authorized by all necessary actions on the part of Buyer. This Agreement and all other documents to be delivered by Buyer have been duly executed and delivered by Buyer and constitute the legal, valid, and binding obligation of Buyer, enforceable in accordance with their terms except as their enforceability may be affected by bankruptcy, insolvency, or similar laws affecting creditors' rights generally, and by judicial discretion in the enforcement of equitable remedies.

7.5 FCC Compliance. To the actual and constructive knowledge Buyer (including any parent, affiliate or subsidiary of Buyer), there is not issued, outstanding, pending or threatened by or before the FCC, any order to show cause, notice of violation or notice of apparent liability against Buyer which would affect Buyer's ability to acquire the Authorizations relating to the Stations.

7.6 Financial Ability. Buyer has on hand, or has legally binding commitments from bona fide financial sources, sufficient funds to consummate the transactions as contemplated by this Agreement.

ARTICLE 8

COVENANTS

8.1 Operation of Business. Between the date of this Agreement and the Closing Date, Seller shall:

(a) preserve and protect all of the tangible Assets;

(b) maintain the Station's books of account and records in the usual and ordinary manner, and in conformity with past practices;

(c) maintain and preserve Seller's rights under the Authorizations to the extent reasonably practicable in light of the current status of the Authorizations; and

(d) conduct the Stations' operations as they currently are conducted, such that Seller shall not, without the prior written consent of Buyer, which shall not be unreasonably withheld not:

(i) enter into any agreement, contract, lease or commitment, other than agreements cancelable without penalty prior to the Closing Date;

(ii) place or allow to be placed on any of the assets or properties relating to the Stations any Lien;

(iii) sell, assign, transfer or otherwise dispose of any of the Assets;

(iv) commit any act or omit to do any act which will cause a breach of

any agreement, contract, lease or commitment;

(v) violate any law, statute, rule, governmental regulation or order of any court or governmental or regulatory authority (whether Federal, State or local);

(vi) cause or permit by any act, or failure to act, any of the Authorizations to expire, be surrendered, adversely modified, or otherwise terminated, or the FCC to institute any proceedings for the suspension, revocation or adverse modification of any of the Authorizations or fail to prosecute with due diligence any pending applications to the FCC; provided, however, that Buyer recognizes those matters already identified in the schedules hereto. Buyer recognizes that the Station is currently off the air and, if not returned to operation by September 17, 2007, the license will be cancelled unless some special circumstances can be demonstrated. Buyer has made plans to place the Station back into operation, and acknowledges that this deadline does not constitute a breach by Seller or provide Buyer with any grounds for its refusal to close the transaction as contemplated by this Agreement. or

(vii) terminate any contract.

8.2 Access to Information. From the date hereof to the Closing Date; Seller shall afford to Buyer and the officers, employees and agents of Buyer complete access at all reasonable times to Seller's officers, employees, agents, properties, books, records and contracts, and shall furnish Buyer data and information as relating specifically to the Assets to be acquired by Buyer. No investigation pursuant hereto shall affect any representations or warranties of the parties herein or the conditions to the obligations of the parties hereto.

ARTICLE 9

CONDITIONS

9.1 Conditions Precedent to Obligations of Buyer. The obligations of Buyer to consummate the transactions contemplated by this Agreement are subject to the fulfillment, prior to or at the Closing, of each of the following conditions, except to the extent Buyer shall have waived in writing satisfaction of such condition:

(a) The representations and warranties made by Seller in this Agreement, or in any other agreements between the parties hereto executed pursuant to or required by this Agreement, shall be true and correct in all material respects as of the date of this Agreement and on the Closing Date as though such representations and warranties were made on such date.

(b) Seller shall have performed and complied in all material respects with all covenants, agreements, representations, warranties and undertakings required by this Agreement to be performed or complied with prior to the Closing.

(c) Seller shall have delivered to Buyer all of the documents required by Section 10.1 hereof.

(d) All consents that may be necessary for Buyer to consummate the transactions contemplated hereby shall have been received by it.

(e) The FCC Consent shall have become a Final Order (or shall have been waived by Buyer).

(f) Seller shall have obtained and shall have delivered to Buyer all third-party consents to the assignment of the Contracts which consents shall not have as a condition thereof any modifications to the terms thereof or any payment by Buyer to consummate the assignment.

9.2 Conditions Precedent to Obligations of Seller. The obligations of Seller to consummate the transactions contemplated by this Agreement are subject to the fulfillment, prior to or at the Closing, of each of the following conditions, except to the extent Seller shall have waived in writing satisfaction of such condition:

(a) The representations and warranties made by Buyer in this Agreement and in all other agreements between the parties hereto executed pursuant to or required by this Agreement shall be true and correct in all material respects as of the date of this Agreement and on the Closing Date as though such representations and warranties were made on such date.

(b) Buyer shall have performed and complied in all material respects with all covenants, agreements, representations, warranties and undertakings required by this Agreement to be performed or complied with by it prior to the Closing.

(c) Buyer shall have delivered to Seller all of the documents required by Section 10.2 hereof.

(d) The FCC Consent shall have become a Final Order (or shall have been waived by Buyer).

ARTICLE 10

CLOSING DELIVERIES

10.1 Seller's Deliveries. At the Closing, Seller shall deliver or cause to be delivered to

Buyer the following:

(a) Bill of Sale, assignments and other good and sufficient instruments of conveyance, transfer and assignment, all in form and substance reasonably satisfactory to counsel for Buyer, as shall be effective to vest in Buyer or its permitted assignee, good and marketable title in and to the Assets.

(b) A certificate, executed by an officer of Seller in such detail as Buyer shall reasonably request, certifying to the fulfillment or satisfaction of the conditions set forth in Section 9.1. The delivery of such certificate shall constitute a representation and warranty of Seller as to the statements set forth therein.

(c) Updated Schedules reflecting any changes necessary to render the information contained therein true and accurate on the Closing Date.

(d) Originals or copies of all program, operations, transmissions, or maintenance logs and all other records required to be maintained by the FCC with respect to the Stations and within Seller's possession, including the Stations' public files, shall be left at the Stations and thereby delivered to Buyer.

(e) Legal Opinion(s) of in house counsel to Seller substantially in the form of Exhibit A to this Agreement.

10.2 Buyer's Deliveries. At the Closing, Buyer shall deliver or cause to be delivered to Seller the following:

(a) the payment of the Purchase Price.

(b) An assignment and assumption agreement reasonably satisfactory to Seller effecting the assumption of the Contracts on the terms and conditions hereof.

(c) A certificate, executed by an officer of Buyer, in such detail as

Seller shall reasonably request, certifying to the fulfillment or satisfaction by Buyer of the conditions set forth in Section 9.2. The delivery of such certificate shall constitute a representation and warranty of Buyer as to the statements set forth therein.

ARTICLE 11

FEES ANDEXPENSES

11.1 Expenses. Seller shall pay all transfer taxes, recordation taxes, sales taxes, document stamps, or other charges levied by any governmental entity on account of the transfer of the Assets from Seller to Buyer, except that the filing fees payable in connection with the assignment of the Authorizations shall be split between Buyer and Seller. Except as otherwise provided in this Agreement, each party shall pay its own expenses incurred in connection with the authorization, preparation, execution, and performance of this Agreement, including all fees and expenses of counsel, accountants, agents, and representatives.

ARTICLE 12

INDEMNIFICATION

12.1 Representations and Warranties. All representations, warranties and covenants contained in this Agreement shall be deemed continuing representations, warranties and covenants and shall survive the Closing for a period of twelve (12) months and all indemnity claims must be made within such 12 month period. Any investigations by or on behalf of any party hereto shall not constitute a waiver as to enforcement of any representation, warranty, or covenant contained in this Agreement, and no notice or

information delivered by either party shall affect the other party's right to rely on any representation or warranty or relieve such party of any obligations under this Agreement as the result of its breach of any of its representations, warranties or covenants.

12.2 Indemnification by Seller. Notwithstanding the Closing, and regardless of any investigation made at any time by or on behalf of Buyer or any information Buyer may have, Seller, hereby agrees to indemnify and hold Buyer harmless against and with respect to, and shall reimburse Buyer for:

(a) Any and all losses, liabilities, obligations or damages resulting from or relating to any untrue representation, breach of warranty, or nonfulfillment of any covenant by Seller contained in this Agreement or in any certificate, document, or instrument delivered to Buyer under this Agreement.

(b) Any and all obligations of Seller not assumed by Buyer pursuant to this Agreement.

(c) Any loss, liability, obligation, or cost resulting from the failure of the Seller to comply with the provisions of any bulk sales law applicable to the transfer of the Assets.

(d) Any and all losses, liabilities, obligations or damages resulting from the construction, operation or ownership of the Stations prior to the Closing, including any liabilities arising under the Authorizations which relate to material breaches of Seller (or events that would constitute a breach after notice, the passage of time or both) occurring prior the Closing Date.

12.3 Indemnification by Buyer. Notwithstanding the Closing, and regardless of any investigation made at any time by or on behalf of Seller or any information Seller may have, Buyer hereby agrees to indemnify and hold Seller harmless against and with respect to, and shall reimburse Seller for:

(a) Any and all losses, liabilities, or damages resulting from or relating to any untrue representation, breach of warranty, or nonfulfillment of any covenant by Buyer contained in this Agreement or in any certificate, document, or instrument delivered to Seller under this Agreement.

(b) Any and all obligations of Seller assumed by Buyer pursuant to this Agreement.

(c) Any and all obligations of Seller assumed by Buyer pursuant to this Agreement.

12.4 Procedure for Indemnification. The procedure for indemnification shall be as follows:

(a) The party claiming indemnification (the "Claimant") shall promptly give written notice to the party from which indemnification is claimed (the "Indemnifying Party") of any claim, whether between the parties or brought by a third party, specifying in reasonable detail the factual basis for the claim.

(b) With respect to claims solely between the parties, following receipt of written notice from the Claimant of a claim, the Indemnifying Party shall have thirty (30) days to make such investigation of the claim as the Indemnifying Party deems necessary or desirable. For the purposes of such investigation, the Claimant agrees to make available to the Indemnifying Party and/or its authorized representatives the information relied upon by the Claimant to substantiate the claim. If the Claimant and the Indemnifying Party agree at or

prior to the expiration of the thirty-day period (or any mutually agreed upon extension thereof) to the validity and amount of such claim, the Indemnifying Party shall immediately pay to the Claimant the full amount of the claim. If the Claimant and the Indemnifying Party do not agree within the thirty-day period (or any mutually agreed upon extension thereof), the Claimant may seek

appropriate remedy at law or equity.

(c) If any third party shall notify Claimant with respect to any matter (a "Third Party Claim") that may give rise to a claim for indemnification against the Indemnifying Party under this Section 12, then the Claimant shall promptly notify the Indemnifying Party thereof in writing; provided, however, that no delay on the part of the Claimant in notifying any Indemnifying Party shall relieve the Indemnifying Party from any obligation hereunder.

(d) Any Indemnifying Party shall have the right to defend the Claimant against the Third Party Claim with counsel of its choice reasonably satisfactory to Claimant so long as: (i) the Indemnifying Party notifies the Claimant in writing within fifteen (15) days after the Claimant has given notice of the Third Party Claim that the Indemnifying Party will indemnify the Claimant from and against the entirety of any losses or other adverse consequences the Claimant may suffer resulting from, arising out of, relating to, in the nature of or caused by the Third Party Claim; (ii) the Indemnifying Party provides the Claimant with evidence

acceptable to the Claimant that the Indemnifying Party will have the financial resources to defend against the Third Party Claim and fulfill its indemnification obligations hereunder; (iii) the Third Party Claim involves only money damages and does not seek an injunction or other equitable relief; (iv) settlement of, or an adverse judgment with respect to, the Third Party Claim is not, in the good faith judgment of the Claimant, likely to establish a precedential custom or practice adverse to the continuing business interests of the Claimant; and (v) the Indemnifying Party conducts the defense of the Third Party Claim actively and diligently and keeps the Claimant fully informed and

provides copies of documents as the Claimant may reasonably request.

(e) So long as the Indemnifying Party is conducting the defense of the Third Party Claim in accordance with Section 12.4(d) above: (i) the Claimant may retain separate co-counsel at its sole cost and expense and participate in the defense of the Third Party Claim; (ii) the Claimant shall not consent to the entry of any judgment or enter into any settlement with respect to the Third Party Claim without the prior written consent of the Indemnifying Party (not to be withheld unreasonably); and (iii) the Indemnifying Party shall not consent to the entry of any judgment or enter into any settlement with respect to the Third Party Claim without the prior written consent of the Claimant (not to be withheld unreasonably), and unless the Indemnifying Party agrees to promptly and fully pay and satisfy all obligations of Claimant under such settlement so that no judgment is entered against Claimant relating thereto..

(f) If any of the conditions in Section 12.4(d) above is not or no longer satisfied, however; (i) the Claimant may defend against, and consent to the entry of any judgment or enter into any settlement with respect to, the Third Party Claim in any manner it reasonably may deem appropriate (and the Claimant need not consult with, or obtain any consent from, any Indemnifying Party in connection therewith); (ii) the Indemnifying Party shall reimburse the Claimant promptly and periodically for the costs of defending against the Third Party Claim (including attorney's fees and expenses); and (iii) the Indemnifying Party shall remain responsible for any losses or other adverse consequences the Claimant may suffer resulting from, arising out of, relating to, in the nature of or caused by the Third Party Claim to the fullest extent provided in this Section 12.

12.5 Specific Performance. The parties recognize that if Seller breaches its obligation to

consummate the transactions contemplated by this Agreement and refuses to perform under the provisions of this Agreement, monetary damages alone would not be adequate to compensate Buyer for its injury. Buyer shall therefore be entitled, in addition to any other remedies that may be available, including money damages, to obtain specific performance of the terms of this Agreement. If any action is brought by Buyer to enforce this Agreement, Seller shall waive the defense that there is an adequate remedy at law.

12.6 Attorneys' Fees. In the event of a default by either party which results in a lawsuit or other proceeding for any remedy available under this Agreement, the prevailing party shall be entitled to reimbursement from the other party of its reasonable legal fees and expenses.

ARTICLE 13

TERMINATION RIGHTS

13.1 Termination by Seller . This Agreement may be terminated by Seller and the purchase and sale of the Assets abandoned, if Seller is not then in material breach, upon written notice to Buyer, upon the occurrence of any of the following:

- (a) Material Breach. If Buyer shall be in material breach of any representation, warranty or covenant contained in this Agreement, or any other agreement between the parties hereto, Seller has notified Buyer of such breach, and the breach has continued without cure for a period of 15 days after the notice of breach.
- (b) Judgments. If there shall be in effect on the date that would otherwise be the Closing Date any judgment, decree, or order that would prevent or make the Closing unlawful.
- (c) If the Closing shall not have occurred by the date that is six months from the date hereof, and such delay was not caused by any act or failure to act

of Seller that was a violation or breach of Seller's obligations hereunder.

13.2 Termination by Buyer. This Agreement may be terminated by Buyer and the purchase and sale of the Assets abandoned, if Buyer is not then in material breach, upon written notice to Seller, upon the occurrence of any of the following:

(a) Material Breach. If Seller shall be in material breach of any representation, warranty or covenant contained in this Agreement, or in any other agreement between the parties hereto, Buyer has notified Seller of such breach, and the breach has continued without cure for a period of 15 days after the notice of breach.

(b) Judgments. If there shall be in effect on the date that would otherwise be the Closing Date any judgment, decree, or order that would prevent or make unlawful the Closing.

(c) Upset Date. If the Closing shall not have occurred by the date that is six months from the date hereof, and such delay was not caused by any act or failure to act of Buyer that was a violation or breach of Buyer's obligations hereunder.

13.3 Rights on Termination. If this Agreement is terminated pursuant to Section 13.1 or Section 13.2 and neither party is in material breach of any provision of this Agreement, the parties hereto shall not have any further liability to each other with respect to the purchase and sale of the Assets. If this Agreement is terminated due to a material breach of this Agreement, then each party shall have all rights and remedies available to it at law or in equity, except that in the case of a breach by Buyer the amount of damages shall be capped by the aggregate of (i) the Purchase Price, and (ii) amounts that the Seller may be entitled to receive as reimbursement pursuant to Section 12.6 (Attorneys' Fees) of this Agreement.

ARTICLE 14

MISCELLANEOUS PROVISIONS

14.1 Further Assurances. The parties shall take any actions and execute any other documents that may be necessary or desirable to the implementation and consummation of this Agreement, including, in the case of Seller, any additional transfer documents that, in the reasonable opinion of Buyer, may be necessary to ensure, complete, and evidence the full and effective transfer of the Assets to Buyer pursuant to this Agreement. Seller will cooperate with Buyer, after the Closing Date, in the preparation of applicable tax returns and any other required filings. Seller and buyer shall consult and exchange information with each other regarding the information necessary to complete and intended to be set forth on each party's respective IRS Form 8594.

14.2 Risk of Loss. The risk of loss or damage to any of the Assets prior to the Closing Date shall be upon Seller. In consultation with Buyer, Seller shall repair, replace and restore any such damaged or lost Asset to its prior condition as soon as possible and in no event later than the Closing Date.

14.3 Benefit and Assignment. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and permitted assigns. No party may assign its interest under this Agreement without the prior written consent of the other parties, which consent shall not be unreasonably withheld; provided, however, Buyer may assign its rights hereunder, or a portion of its rights, without the consent of Seller. Section 14.3, (i) "assignment" means any assignment, whether voluntary or involuntary, by merger, consolidation, dissolution, operation of law or any other manner; (ii) "assignee" means any successor or assign of the assignor; (iii) a "change of control" is deemed an assignment of rights; and (iv) "merger" refers to any merger in which a party participates, regardless of whether it is the surviving or disappearing entity. No assignment, however, shall serve to release the assignor from any of its obligations or liabilities to the other party hereunder. In addition, in the case of a proposed assignment by Buyer, no assignment shall, in the reasonable opinion of Seller's FCC counsel, result in a delay in obtaining FCC Consent

14.4 Governing Law. This agreement shall be governed, construed, and enforced in accordance with the laws of the State of Florida without regard to any choice of law or conflict of law provisions (whether of the State of Florida or any other jurisdiction) that would cause the

application of laws of any jurisdiction other than the State of Florida.

14.5 Amendment. This Agreement may not be amended except by an instrument in writing signed on behalf of each of the parties hereto.

14.6 Severability. In the event that anyone or more of the provisions contained in this Agreement or in any other instrument referred to herein, shall, for any reason, be held to be invalid, illegal or unenforceable in any respect, then to the maximum extent permitted by law, such invalidity, illegality or unenforceability shall not affect any other provision of this Agreement or any other such instrument.

14.7 Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which shall constitute one and the same instrument.

14.8 Notices. All notices, demands, and requests required or permitted to be given under the provisions of this Agreement shall be in writing and shall be deemed given upon personal delivery, four days after being mailed by registered or certified mail, return receipt requested, or twenty-four (24) hours after delivery to a courier service which guarantees overnight delivery, addressed as follows:

14.9 Waivers. No waiver Of any of the provisions of this Agreement shall be deemed or shall constitute a waiver of any other provision hereof, nor shall such waiver constitute a continuing waiver. No waiver shall be binding unless executed in writing by the party making the waiver.

14.10 Entire Agreement. This Agreement and the Schedules and Exhibits attached hereto and the ancillary documents provided for herein, constitute the entire agreement and understanding of the parties hereto relating to the matters provided for herein and supersede any and all prior agreements, arrangements, negotiations, discussions and understandings relating to the matters provided for herein, except for the Mutual Non-Disclosure Agreement entered into as of October 24, 2006 between the Buyer and Seller..

DECLARATION HARVEY M. BUDD

Harvey M. Budd, President of Budd Broadcasting Co., Inc. hereby states under penalty of perjury the following:

I have reviewed the attached response to the Commission's letter of February 20, 2014 and hereby state, to the best of my knowledge, that it is true and correct.

I would like to state that at the time I acquired WFXU it was fully my intention to operate the station and provide programming to serve the needs and interests of the WFXU service area. It soon became apparent, however, that economically the station would not be able to survive absent the grant of a modification by the Commission. Thus, I embarked upon my journey to modify the WFXU license so that the station would be economically viable. During this time, however, I made sure that the station was never off the air for a consecutive twelve month period.

The original transmitter that was available at the time that I had acquired WFXU was problematic. Accordingly, it would not permit the station to operate for extended periods of time. Moreover, for financial reasons operation of the station was not realistic. However, the main reason for minimal operation was because of the problems with the transmitter. It was my intent to replace the transmitter concurrent with implementation of the modification.

The programming that was put on for the intervals when the station returned to broadcast operation was a public affairs program which was repeated each time the station went on the air. Accordingly, at the time that the representation was made to the Commission that the station was not broadcasting meaningful programming, it was meant address the argument to the

Commission that the loss of service to a relatively small part of the population in the service area would not be a problem. In this regard it should be also be pointed out that my understanding of the rules was what we were doing was perfectly legal. However, it should be noted that since August of 2013, when the station commenced full time operations, the station has been operating consistently and all requisite filings have been made.

WILLFUL FALSE STATEMENTS ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE, TITLE 18, SECTION 1001), AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION PERMIT (U.S. CODE, TITLE 47, SECTION 312(a)(1)), AND/OR FORFEITURE (U.S. CODE, TITLE 47, SECTION 503).

SECTION III-D - DTV Engineering
Complete Questions 1-5, and provide all data and information for the proposed facility, as requested in Technical Specifications, Items 1-13.
<p>Pre-Transition Certification Checklist: An application concerning a pre-transition channel must complete questions 1 (a)-(c), and 2-5. A correct answer of "Yes" to all of the questions will ensure an expeditious grant of a construction permit application to change pre-transition facilities. However, if the proposed facility is located within the Canadian or Mexican borders, coordination of the proposal under the appropriate treaties may be required prior to grant of the application. An answer of "No" will require additional evaluation of the applicable information in this form before a construction permit can be granted.</p> <p>Post-Transition Expedited Processing. An application concerning a post-transition channel must complete questions 1 (a), (d)-(e), and 2-5. A station applying for a construction permit to build its post-transition channel will receive expedited processing if its application (1) does not seek to expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B"); (2) specifies facilities that match or</p>

closely approximate those defined in the new DTV Table Appendix B facilities; and (3) is filed within 45 days of the effective date of Section 73.616 of the rules adopted in the Report and Order in the Third DTV Periodic Review proceeding, MB Docket No. 07-91.

1. The proposed DTV facility complies with 47 C.F.R. Section 73.622 in the following respects:	
(a) It will operate on the DTV channel for this station as established in 47 C.F.R. Section 73.622.	<input checked="" type="radio"/> Yes <input type="radio"/> No
(b) It will operate a pre-transition facility from a transmitting antenna located within 5.0 km (3.1 miles) of the DTV reference site for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(c) It will operate a pre-transition facility with an effective radiated power (ERP) and antenna height above average terrain (HAAT) that do not exceed the DTV reference ERP and HAAT for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(d) It will operate at post-transition facilities that do not expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B").	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
(e) It will operate at post-transition facilities that match or reduce by no more than five percent with respect to predicted population from those defined in the new DTV Table Appendix B.	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A
2. The proposed facility will not have a significant environmental impact, including exposure of workers or the general public to levels of RF radiation exceeding the applicable health and safety guidelines, and therefore will not come within 47 C.F.R. Section 1.1307. Applicant must submit the Exhibit called for in Item 13.	<input checked="" type="radio"/> Yes <input type="radio"/> No
3. Pursuant to 47 C.F.R. Section 73.625, the DTV coverage contour of the proposed facility will encompass the allotted principal community.	<input checked="" type="radio"/> Yes <input type="radio"/> No
4. The requirements of 47 C.F.R. Section 73.1030 regarding notification to radio astronomy installations, radio receiving installations and FCC monitoring stations have either been satisfied or are not applicable.	<input checked="" type="radio"/> Yes <input type="radio"/> No
5. The antenna structure to be used by this facility has been registered by the Commission and will not require registration to support the proposed antenna, OR the FAA has previously determined that the proposed structure will not adversely effect safety in air navigation and this structure qualifies for later registration under the Commission's phased registration plan, OR the proposed installation on this structure does not require notification to the FAA pursuant to 47 C.F.R. Section 17.7.	<input checked="" type="radio"/> Yes <input type="radio"/> No

AMENDMENT

In instant amendment is precipitated by the attached September 9, 2008, e-mail (Attachment A).

At the outset, the assertion that the pending WFXU-DT application results in a loss of service to 544,229 persons is incorrect. It appears that the Commission is basing its calculations on the WFXU-DT allotted site rather than the current licensed site. *See* BLCDT-20071113ACD. From the current licensed site, 912 persons are predicted to be losing 1st service while 42,775 persons will be pickup up 1st service. *See* attached engineering coverage maps.

At the outset, it is submitted that a loss to 912 persons is *de minimus*. Moreover, the number of people losing service within the DMA is even less (i.e. 892). Furthermore, within the Tallahassee Thomasville, Florida DMA, 9,924 persons are gaining service and within the Gainesville, Florida DMA, 14,204 persons are gaining service. Clearly, the Commission must look at the fact that the gains far outweigh the losses. In this regard, the amount of persons benefited are almost four times the number of persons suffering an elimination of service. Thus, the public interest benefits are obvious.

We need additional information in order to complete our processing of the above-referenced application for WFXU-DT. Our engineering review shows that the proposed facility would result in a loss of service to 544,229 persons who presently receive service from the station. Proposals that would result in a loss of TV service are inconsistent with the public interest and must be supported by a strong showing of countervailing public interest benefits. Please have your client amend the application within five business days to provide a public interest showing, including information regarding the other full power television services available to viewers in the proposed loss area.

If you have any questions, I can be reached at 202 418-1647.

ENGINEERING NARRATIVE

Budd Broadcasting Co., Inc. is the licensee holder of the above reference pending application to move and maximize WFXU-DT. As per the Commission's request attached are two supplemental exhibits which demonstrate gain/loss areas associated with the pending application relative to the licensed facility.

Exhibit E1 and E2 demonstrate a red WFXU-DT service contour relative to all neighboring licensed or permitted full service DTV stations which have like contours which potentially encroach within the red WFXU-DT contour. Both exhibits demonstrate that the licensed and pending facility facilities will not provide a first or second DTV service area.

ENGINEERING STATEMENT OF RYAN WILHOUR OF THE FIRM KESSLER AND GEHMAN ASSOCIATES, INC., CONSULTING ENGINEERS IN CONNECTION WITH AN APPLICATION FOR MINOR AMENDMENT TO A PENDING DTV BROADCAST STATION APPLICATION FOR WFXU-DT FCC FILE NUMBER BPCDT-20080617ABP TO MAXIMIZE OPERATION IN THE POST AND PRE DTV TRANSITION PERIOD

WFXU-DT
BUDD BROADCASTING CO., INC.
LIVE OAK, FLORIDA

This firm has been employed by Budd Broadcasting Co., Inc. "BBCI" to prepare engineering studies and a minor amendment to a pending application (FCC file number BPCDT-20080617ABP) for DTV maximization.

BBCI, licensee of WFXU-DT, Channel 48 herein proposes to amend the following parameters for its DTV operation.

- Amend the proposed antenna rotation from 48 degrees to 88 degrees.
- Amend the proposed antenna from a Propagation System Inc - PSILPD24BG-48 to a Systems With Reliability, Inc. - SWEDM24BFS/48-DT which share identical azimuth patterns but slightly different elevation patterns.

ATTACHED FIGURES

In carrying out the engineering studies the following attached figures were prepared:

1. Engineering specifications (Exhibit E1)
2. Elevation drawing of the antenna system (Exhibit E2)
3. Antenna elevation and azimuth relative field and dBk Patterns (Exhibit E3)
4. USGS 7.5 minute topographic quadrangle showing the proposed transmitter location and the coordinate lines (Exhibit E4)
5. Map showing the predicted DTV coverage contour (Exhibit E5)
6. Allocation analysis (Exhibit E6)
7. Environmental impact/ RFR hazard analysis (Exhibit E7)
8. Coverage area and population gain / loss analysis (Exhibit E8)

ALLOCATION ANALYSIS

It is herein proposed to amend the above referenced channel 48 digital facility to maximize its coverage area without causing impermissible interference to other pre and post DTV transition facilities. Exhibit E6 demonstrates the interference considerations for the proposed facility and further illustrates complete compliance to all interference threshold criteria. Exhibit E8A demonstrates that WFXU as currently licensed (FCC File No: BLCDDT-20071113ACD), provides no first DTV service areas. The noise limited contour covers 182,376 people and 7822 km². Exhibit E8B demonstrates WFXU as amended and also provides no first DTV service areas; however, this proposed maximization makes better use of the available spectrum since it covers 407,063 people and 13092 km².

ENVIRONMENTAL IMPACT/RFR HAZARD ANALYSIS

An analysis has been made of the human exposure to RFR using the calculation methodology described in OET Bulletin 65, Edition, 97-01. Exhibit E7 is a RFR study demonstrating compliance within 5% of the most restrictive permissible exposure at any location 2 meters above the ground. Exhibit E7 calculations were made using a frequency of 674 MHz, which is the lower edge of the proposed channel. To account for ground reflections, a coefficient of 1.6 was included in the calculations.

Pursuant to OET Bulletin 65 concerning multiple-user transmitter sites only those licensees whose transmitters produce power density levels greater than 5.0% of the exposure limit are considered significant contributors to RFR. Since the proposed operation is well within 5% of the most permissible exposure at any location 2 meters above the ground, it is not considered a significant contributor to RFR exposure. Thus, contributions to exposure from other RF sources in the vicinity of WFXU-DT were not taken into account. The instant proposal complies with the FCC limits for human exposure to RF radiation and thus is excluded from further environmental processing.

DECLARATION OF ENGINEER

The foregoing statement and the report regarding the aforementioned engineering work are true and correct to the best of my knowledge. Executed on August 20, 2008.

METHODOLOGY AND EXPLANATION OF
ENVIRONMENTAL IMPACT / RADIO FREQUENCY RADIATION
HAZARD ANALYSIS

A theoretical analysis has been conducted of the human exposure to radio frequency radiation ("RFR") using the calculation methodology described in *OET Bulletin 65, Edition 97-01*. The RFR analysis is conducted pursuant to the following methodology:

Terrain¹ extraction is compiled from the proposed tower site to radial lengths of 0.25 miles in 0.001 mile increments for 360 radials. The power density is calculated for each terrain point at 6 feet above ground level using the elevation and azimuth pattern of the proposed broadcast antenna. The power density calculations are conducted using the lower edge of the proposed channel frequency. To account for ground reflections, a coefficient of 1.6 was included in the calculation.

The resulting cylindrical polar analysis is then summarized into a coordinate plane graph using the following methodology:

Starting from the origin the maximum calculated RFR value is determined among the 360 degree radials for each 0.001 mile increment, the value is then converted into a percentage of the maximum allowable general population or uncontrolled exposure and plotted as a function of perpendicular distance from the tower.

¹ Terrain extraction is based upon a 3 arc second point spacing terrain database.

Dear Licensee:

This is with respect to the above-referenced application filed by Budd Broadcasting Co., Inc. ("Budd Broadcasting"), the licensee of WFXU(TV)-DT, Live Oak, Florida, for modification of its DTV facility on channel 48. Budd Broadcasting proposes to move the transmitter site location for the station over 40 miles to the southeast of the existing analog site.

It is well-settled that the Commission does not favor reductions in television service. Proposals that would result in a loss in TV service have been considered to be *prima facie* inconsistent with the public interest.¹ "[O]nce a station begins operations, it is obligated to maintain service to its viewing audience absent off-setting public benefits to discontinuing service."² Because Budd Broadcasting proposes to move the station's transmitter site over 40 miles, which would result in loss of service to approximately three quarters of the geographic area within the Grade B contour of WFXU(TV) and 138,200 people, the staff requested that Budd Broadcasting amend its application to submit a public interest showing. Budd Broadcasting amended its application on several occasions to provide a more detailed showing of the coverage gains and losses.

We conclude that Budd Broadcasting has failed to show that the public interest would be served by grant of its application. While Budd Broadcasting states that the proposed facility would increase the

PETITION FOR RECONSIDERATION

Budd Broadcasting Co., Inc. ("Budd"), by its attorneys, seeks reconsideration of the December 30, 2008 letter ruling by the Chief, Video Division denying the above-referenced application.¹ In support, the following is respectfully submitted:

BACKGROUND

The subject application requests the modification of the WFXU DTV facility. Specifically, the application proposed to move the transmitter site location approximately 40 miles to the southeast of the existing analog site. A copy of the application, as amended, is attached (Attachment B). In that application, it was demonstrated that the population gain was significant (i.e. increase in coverage from 183,367 to 407,063 people).

¹ A copy of that Letter is attached (Attachment A).

STAMP & RETURN

The Commission concluded that providing additional service to new viewers does not justify withdrawing existing service from 138,200 people who already rely on this service (emphasis added).

ARGUMENT

At the outset, it should be noted that Budd acquired WFXU from WFXU License Corporation. *See* BALCT-20061121AIV (Attachment C). Consummation occurred on January 25, 2007 (Attachment D). At the time that Budd acquired the station, it had been operated as a satellite of WTLH-TV, Bainbridge, Georgia. WTLH-TV was a Fox affiliate. Thus, as a satellite, WFXU was providing Fox programming. The attached contour map demonstrates that degree of other Fox service in the market (Attachment E). However, upon consummation by Budd, WFXU ceased operating as a satellite and ceased providing Fox programming.

It should also be noted that WFXU has struggled financially since the station first began operations, and generated cash flow deficits for the entire tenor of its existence. WFXU License Corporation and WTLH License Corporation were both subsidiaries of Pegasus Communications Corporation (“Pegasus”). By combining their collective resources, the two television stations were able to operate with greater economic efficiency in the small Tallahassee, Florida-Thomasville, Georgia market. Since the acquisition of WFXU by Budd, the economic realities were such that, absent a grant of the maximization application, the economic viability of operating the station became doubtful. *See* Declaration of Harvey M. Budd (Attachment H). In this regard, the Commission should note that WFXU, pursuant to requests by the prior licensee, had

received numerous construction extensions based upon financial hardship. *See* FCC File No. BEPCDT-20020304AIK; FCC File No. BEPCDT-20021018AAK; FCC File No. BEPCDT-20030923ADW; FCC File No. BEPCDT-20041216AEG. *See also* FCC File No. BEPCDT-20050915ACI (Attachment F).²

Budd has operated WFXU legally since becoming the licensee of the station.

However, the station has not provided meaningful service. In this regard, due to financial difficulties, the programming it has broadcast consists of only two (2) half-hour public affairs programs. These programs are repeated over and over when the station is on the air. *See* Budd Declaration (Attachment H). Because of technical difficulties stemming from Budd's financial plight, the station has been barely operating and, as previously stated, the programming provided could hardly be characterized as meaningful. In this regard, through a series of notifications, the station has suspended operations and then resumed operations for brief periods of time (*See* Attachment G). It was Budd's hope that, upon grant of the subject maximization application, the station would be able to become economically viable. The real question is whether the grant of the subject application with the attendant hypothetical "loss of service" is better than the ultimate denial of the subject application and the real cessation of all service. It is submitted that the latter is hardly the more favorable result. It is further submitted that, under the circumstances previously delineated, the public interest would be better served by a grant of the subject application.

² Attachment F is the September 15, 2005 Application for Extension of Time to Construct a Digital Television Broadcast Station (FCC Form 387). That Application, at Exhibit I, provides a detailed narrative of the financial problems WFXU has historically experienced.

The public benefits that will be generated by implementation of Budd's proposed modification application include: (1) advancement of the Commission's bedrock principle of localism through Budd's commitment to broadcast programming (news, public affairs, religious and other) that is specifically oriented to serve the people of the entire WFXU-DT service area; (2) advancement of localism through the maintenance of the main studio and local production facilities within Live Oak;³ (3) continued provision of principal city coverage over all of Live Oak; (4) a substantial increase in the number of people who will be able to view the WFXU-DT over-the-air programming;⁴ (5) advancement of the Commission's critical goal of promoting competition; and (6) preservation of the ownership and service of stations that confront extreme financial exigencies.

The cases relied on by the Commission in support of denying the Budd application all deal with loss of service. *See West Michigan Telecasters, Inc.*, 22 FCC 2d 943 (1970), recon. denied, 26 FCC 2d 668 (1970), *aff'd West Michigan Telecasters, Inc.*

³ Although the Commission has requested comments on a proposed requirement that stations maintain their main studios within their principal communities, Budd makes and will honor this commitment voluntarily even if no such requirement is adopted. *See In the Matter of Broadcast Localism, Report on Broadcast Localism and NPRM*, 23 FCC Rcd 1324, 1343-44 at ¶41 (2008).

⁴ The Commission has established that significantly increasing the number of people who will receive a station's over-the-air digital programming is an important public interest benefit. *See, e.g., Amendment of Section 73.622(i) (Bryan, Texas)*, Report and Order, DA 08-2452, rel. Nov. 5, 2008 (the public interest would be served by permitting the station to expand service beyond the area its current allocation serves); *Amendment of Section 73.622(i) (Atlantic City, New Jersey)*, NPRM, DA 08-2028, rel. Sept. 2, 2008 (issuance of NPRM is warranted where proposal would allow the station to provide a digital signal to an additional 2,436,827 viewers); *Amendment of Section 73.622(i) (Huntsville, Alabama)*, Report and Order, DA 08-2302, rel. Oct. 17, 2008 (the public interest would be served by permitting the station to expand service from 83% to 96% of the viewers in the station's DMA); *Amendment of Section 73.622(i) (Waco, Texas)*, NPRM, DA 08-2571, rel. Nov. 26, 2008 (issuance of NPRM is warranted where proposal would allow the station to provide a digital signal to 192.3% of its current DTV service population); *Amendment of Section 73.622(i) (Ann Arbor, Michigan)*, NPRM, DA 08-1502, rel. Sept. 2, 2008 (issuance of NPRM is warranted where proposal would allow the station to better serve the television market to which it is assigned).

v. FCC, 460 FCC 2d 883, 889 (DC Cir. 1972) (finding that losses in service are *prima facie* inconsistent with the public interest); Triangle Publications, Inc., 37 FCC 307, 313 (1964) (finding that “once in operation, a station assumes an obligation to maintain service to its viewing audience and the withdrawal or downgrading of existing service is justifiable only if offsetting facts are shown which establish that the public generally will be benefited”); Television Corporation of Michigan v. FCC, 294 FCC 2d 730 (1961) (finding that deprivation of service to any group was undesirable and can be justified only by offsetting factors); and Hall v. FCC, 237 FCC 2d 567 (DC Cir. 1956) (finding that a curtailment of service is not in the public interest unless outweighed by other factors). However, as demonstrated, the service provided by WFXU can hardly be considered meaningful. Moreover, the off-setting benefits would enable WFXU to provide operation to a significantly larger number of viewers.

It is submitted that the existing WFXU service is sporadic and not meaningful. Clearly, the loss of this “service” is far outweighed by the benefit to the public of meaningful service which can be achieved by the grant of the application and the attendant significant increase in population coverage. The economic viability of the station is dependent on a grant of the application. It is submitted that under the circumstances described herein, WFXU, while legally operating, is not operating in a meaningful manner. Thus, a grant of the application would not result in any real loss of service. *Cf.* January 30, 2008 Letter to Gray Television Licensee, Inc., DA 08-173, WSWG(TV), Valdosta, Georgia. It is clear that none of the residents within the WFXU service area rely on the current service.

CONCLUSION

In view of the foregoing, it is respectfully submitted that the Commission should reconsider the denial of the application and, in light of the arguments advanced herein, the application should be granted.

Respectfully submitted,

BUDD BROADCASTING CO., INC.

Section II - Legal

<p>1. Certification. Applicant certifies that it has answered each question in this application based on its review of the application instructions and worksheets. Applicant further certifies that where it has made an affirmative certification below, this certification constitutes its representation that the application satisfies each of the pertinent standards and criteria set forth in the application instructions and worksheets.</p>	<p><input checked="" type="radio"/> Yes <input type="radio"/> No</p>
<p>2. Parties to the Application. a. List the applicant, and, if other than a natural person, its officers, directors, stockholders with attributable interests, non-insulated partners and/or members. If a corporation or partnership holds an attributable interest in the applicant, list separately its officers, directors, stockholders with attributable interests, non-insulated partners and/or members. Create a separate row for each individual or entity. Attach additional pages if necessary.</p> <p>(1) Name and address of the applicant and each party to the application holding an attributable interest (if other than individual also show name, address and citizenship of natural person authorized to vote the stock or holding the attributable interest). List the applicant first, officers next, then directors and, thereafter, remaining stockholders and other entities with attributable interests, and partners. (2) Citizenship. (3) Positional Interest: Officer, director, general partner, limited partner, LLC member, investor/creditor attributable under the Commission's equity/debt plus standard, etc. (4) Percentage of votes. (5) Percentage of total assets (equity plus debt).</p> <p>[Enter Parties/Owners Information]</p> <hr/> <p>b. Applicant certifies that equity and financial interests not set forth above are non-attributable.</p>	<p><input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A See Explanation in [Exhibit 2]</p>
<p>3. Other Authorizations. List call signs, locations, and facility identifiers of all other broadcast stations in which applicant or any party to the application has an attributable interest.</p>	<p><input type="checkbox"/> N/A [Exhibit 3]</p>
<p>4. Multiple Ownership. a. Is the applicant or any party to the application the holder of an attributable radio joint sales agreement or an attributable radio or television time brokerage agreement in the same market as the station subject to this application? If "YES," radio applicants must submit as an Exhibit a copy of each such agreement for radio stations.</p> <p>b. Applicant certifies that the proposed facility complies with the Commission's multiple ownership rules and cross-ownership rules.</p> <p>Radio applicants only: If "Yes," submit an Exhibit providing information regarding the market, broadcast station(s), and other information necessary to demonstrate compliance with 47 C.F.R. § 73.3555(a).</p>	<p><input type="radio"/> Yes <input checked="" type="radio"/> No [Exhibit 4]</p> <p><input checked="" type="radio"/> Yes <input type="radio"/> No [Exhibit 5]</p>

All Applicants: If "No," submit as an Exhibit a detailed explanation in support of an exemption from, or waiver of, 47 C.F.R. § 73.3555.	
c. Applicant certifies that the proposed facility:	<input checked="" type="radio"/> Yes <input type="radio"/> No
1. does not present an issue under the Commission's policies relating to media interests of immediate family members;	See Explanation in [Exhibit 6]
2. complies with the Commission's policies relating to future ownership interests; and	
3. complies with the Commission's restrictions relating to the insulation and non-participation of non-party investors and creditors.	
5. Character Issues. Applicant certifies that neither applicant nor any party to the application has or has had any interest in or connection with:	<input checked="" type="radio"/> Yes <input type="radio"/> No
a. any broadcast application in any proceeding where character issues were left unresolved or were resolved adversely against the applicant or party to the application; or	See Explanation in [Exhibit 7]
b. any pending broadcast application in which character issues have been raised.	
6. Adverse Findings. Applicant certifies that, with respect to the applicant and any party to the application, no adverse finding has been made, nor has an adverse final action been taken by any court or administrative body in a civil or criminal proceeding brought under the provisions of any law related to any of the following: any felony; mass media-related antitrust or unfair competition; fraudulent statements to another government unit; or discrimination.	<input checked="" type="radio"/> Yes <input type="radio"/> No
	See Explanation in [Exhibit 8]
7. Alien Ownership and Control. Applicant certifies that it complies with the provisions of Section 310 of the Communications Act of 1934, as amended, relating to interests of aliens and foreign governments.	<input type="radio"/> Yes <input type="radio"/> No
	See Explanation in [Exhibit 9]
8. Program Service Certification. Applicant certifies that it is cognizant of and will comply with its obligations as a commission licensee to present a program service responsive to the issues of public concern facing the station's community of license and service area.	<input type="radio"/> Yes <input type="radio"/> No
9. Local Public Notice. Applicant certifies that it has or will comply with the public notice requirements of 47 C.F.R. Section 73.3580.	<input type="radio"/> Yes <input type="radio"/> No
10. Auction Authorization. If the application is being submitted to obtain a construction permit for which the applicant was the winning bidder in an auction, then the applicant certifies, pursuant to 47 C.F.R. Section 73.5005(a), that it has attached an exhibit containing the information required by 47 C.F.R. Sections 1.2107(d), 1.2110(i), 1.2112(a) and 1.2112(b), if applicable.	<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A
An exhibit is required unless this question is inapplicable.	[Exhibit 10]
11. Anti-Drug Abuse Act Certification. Applicant certifies that neither applicant nor any party to the application is subject to denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. Section 862.	<input checked="" type="radio"/> Yes <input type="radio"/> No
12. Equal Employment Opportunity (EEO). If the applicant proposes to employ five or more full-time employees, applicant certifies that it is filing simultaneously with this application a Model EEO Program Report on FCC Form 396-A.	<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A
13. Petition for Rulemaking/Counterproposal to Add New FM Channel to FM Table of Allotments. If the application is being submitted concurrently with a Petition for Rulemaking or Counterproposal to Amend the FM Table of Allotments (47 C.F.R. section 73.202) to add a new FM channel allotment, petitioner/counter-proponent certifies that, if the FM channel allotment requested is allotted, petitioner/counter-proponent will apply to participate in the auction of the channel allotment requested and specified in this application.	<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A

I certify that the statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith. I acknowledge that all certifications and attached Exhibits are considered material representations. I hereby waive any claim to the use of any particular frequency as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and request an authorization in accordance with this application. WILLFUL FALSE STATEMENTS ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE, TITLE 18, SECTION 1001), AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION PERMIT (U.S. CODE, TITLE 47, SECTION 312(a)(1)), AND/OR FORFEITURE (U.S. CODE, TITLE 47, SECTION 503).

SECTION III-D - DTV Engineering

Complete Questions 1-5, and provide all data and information for the proposed facility, as requested in Technical Specifications, Items 1-13.

Pre-Transition Certification Checklist: An application concerning a pre-transition channel must complete questions 1(a)-(c), and 2-5. A correct answer of "Yes" to all of the questions will ensure an expeditious grant of a construction permit application to change pre-transition facilities. However, if the proposed facility is located within the Canadian or Mexican borders, coordination of the proposal under the appropriate treaties may be required prior to grant of the application. An answer of "No" will require additional evaluation of the applicable information in this form before a construction permit can be granted.

Post-Transition Expedited Processing. An application concerning a post-transition channel must complete questions 1(a), (d)-(e), and 2-5. A station applying for a construction permit to build its post-transition channel will receive expedited processing if its application (1) does not seek to expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B"); (2) specifies facilities that match or closely approximate those defined in the new DTV Table Appendix B facilities; and (3) is filed within 45 days of the effective date of Section 73.616 of the rules adopted in the Report and Order in the Third DTV Periodic Review proceeding, MB Docket No. 07-91.

1. The proposed DTV facility complies with 47 C.F.R. Section 73.622 in the following respects:	
(a) It will operate on the DTV channel for this station as established in 47 C.F.R. Section 73.622.	<input checked="" type="radio"/> Yes <input type="radio"/> No
(b) It will operate a pre-transition facility from a transmitting antenna located within 5.0 km (3.1 miles) of the DTV reference site for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(c) It will operate a pre-transition facility with an effective radiated power (ERP) and antenna height above average terrain (HAAT) that do not exceed the DTV reference ERP and HAAT for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(d) It will operate at post-transition facilities that do not expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622 (i) ("new DTV Table Appendix B").	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
(e) It will operate at post-transition facilities that match or reduce by no more than five percent with respect to predicted population from those defined in the new DTV Table Appendix B.	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A
2. The proposed facility will not have a significant environmental impact, including exposure of workers or the general public to levels of RF radiation exceeding the applicable health and safety guidelines, and therefore will not come within 47 C.F.R. Section 1.1307. Applicant must submit the Exhibit called for in Item 13.	<input checked="" type="radio"/> Yes <input type="radio"/> No
3. Pursuant to 47 C.F.R. Section 73.625, the DTV coverage contour of the proposed facility will encompass the allotted principal community.	<input checked="" type="radio"/> Yes <input type="radio"/> No
4. The requirements of 47 C.F.R. Section 73.1030 regarding notification to radio astronomy installations, radio receiving installations and FCC monitoring stations have either been satisfied or are not applicable.	<input checked="" type="radio"/> Yes <input type="radio"/> No
5. The antenna structure to be used by this facility has been registered by the Commission and will not require registration to support the proposed antenna, OR the FAA has previously determined that the proposed structure will not adversely effect safety in air navigation and this structure qualifies for later registration under the Commission's phased registration plan, OR the proposed installation on this structure does not require notification to the FAA pursuant to 47 C.F.R.	<input checked="" type="radio"/> Yes <input type="radio"/> No

If a directional antenna is proposed, the requirements of 47 C.F.R. Sections 73.625(c) must be satisfied. **Exhibit required.** [Exhibit 43]

11. Does the proposed facility satisfy the pre-transition interference protection provisions of 47 C.F.R. Section 73.623(a) (Applicable only if Certification Checklist Items 1(a), (b), or (c) are answered "No.") and/or the post-transition interference protection provisions of 47 C.F.R. Section 73.616? Yes No [Exhibit 44]

If "No," attach as an Exhibit justification therefor, including a summary of any related previously granted waivers.

12. If the proposed facility will not satisfy the coverage requirement of 47 C.F.R. Section 73.625, attach as an Exhibit justification therefore. (Applicable only if Certification Checklist item 3 is answered "No.") [Exhibit 45]

13. **Environmental Protection Act. Submit in an Exhibit the following:** [Exhibit 46]

If Certification Checklist Item 2 is answered "Yes," a brief explanation of why an Environmental Assessment is not required. Also describe in the Exhibit the steps that will be taken to limit RF radiation exposure to the public and to persons authorized access to the tower site.

By checking "Yes" to Certification Checklist Item 2, the applicant also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines.

If Certification Checklist Item 2 is answered "No," an Environmental Assessment as required by 47 C.F.R Section 1.1311.

PREPARERS CERTIFICATION ON SECTION III MUST BE COMPLETED AND SIGNED.

SECTION III - PREPARER'S CERTIFICATION

I certify that I have prepared Section III (Engineering Data) on behalf of the applicant, and that after such preparation, I have examined and found it to be accurate and true to the best of my knowledge and belief.

THIS AMENDMENT IS BEING FILED TO ADD SUPPLIMENTAL INFORMATION TO THE ENGINEERING STATEMENT.

10/7/2008:

THIS AMENDMENT IS BEING FILED TO RESPOND TO A COMMISSION REQUEST FOR ADDITIONAL INFORMATION VIA E-MAIL ON 09/09/2008. PLEASE SEE ATTACHED.

8-20-2008 AMENDMENT:

THE FOLLOWING HAVE BEEN AMENDED:

SECTION III-D 10(A) - THE ANTENNA MAKE AND MODEL HAVE BEEN AMENDED FROM PSI PSILPD24BG-48 TO SWR SWEDM24BFS/48-DT RESPECTIVELY.

SECTION III-D 10(B) - THE ELECTRICAL BEAM TILT HAS BEEN MODIFIED FROM 0.5 DEGREES TO 0.75 DEGREES.

SECTION III-D 10(E) - THE ANTENNA HAS BEEN ROTATED FROM 48 DEGREES TO 88 DEGREES.

AMENDMENT

In instant amendment is precipitated by the attached September 9, 2008, e-mail (Attachment A).

At the outset, the assertion that the pending WFXU-DT application results in a loss of service to 544,229 persons is incorrect. It appears that the Commission is basing its calculations on the WFXU-DT allotted site rather than the current licensed site. See BLCDDT-20071113ACD. From the current licensed site, 912 persons are predicted to be losing 1st service while 42,775 persons will be pickup up 1st service. See attached engineering coverage maps.

At the outset, it is submitted that a loss to 912 persons is *de minimus*. Moreover, the number of people losing service within the DMA is even less (i.e. 892). Furthermore, within the Tallahassee Thomasville, Florida DMA, 9,924 persons are gaining service and within the Gainesville, Florida DMA, 14,204 persons are gaining service. Clearly, the Commission must look at the fact that the gains far outweigh the losses. In this regard, the amount of persons benefited are almost four times the number of persons suffering an elimination of service. Thus, the public interest benefits are obvious.

We need additional information in order to complete our processing of the above-referenced application for WFXU-DT. Our engineering review shows that the proposed facility would result in a loss of service to 544,229 persons who presently receive service from the station. Proposals that would result in a loss of TV service are inconsistent with the public interest and must be supported by a strong showing of countervailing public interest benefits. Please have your client amend the application within five business days to provide a public interest showing, including information regarding the other full power television services available to viewers in the proposed loss area.

If you have any questions, I can be reached at 202 418-1647.

ENGINEERING NARRATIVE

Budd Broadcasting Co., Inc. is the licensee holder of the above reference pending application to move and maximize WFXU-DT. As per the Commission's request attached are two supplemental exhibits which demonstrate gain/loss areas associated with the pending application relative to the licensed facility.

Exhibit E1 and E2 demonstrate a red WFXU-DT service contour relative to all neighboring licensed or permitted full service DTV stations which have like contours which potentially encroach within the red WFXU-DT contour. Both exhibits demonstrate that the licensed and pending facility facilities will not provide a first or second DTV service area.

DECLARATION OF ENGINEER

The foregoing statement and the report regarding the aforementioned engineering work are true and correct to the best of my knowledge. Executed on November 5, 2008.

The logo for Kessler and Gehman Associates, Inc. (KGA) features the letters 'KGA' in a stylized, serif font. The letters are white and are superimposed on a thick, horizontal black bar that spans the width of the logo.

ENGINEERING STATEMENT OF RYAN WILHOUR OF THE FIRM KESSLER AND GEHMAN ASSOCIATES, INC., CONSULTING ENGINEERS IN CONNECTION WITH AN APPLICATION FOR MINOR AMENDMENT TO A PENDING DTV BROADCAST STATION APPLICATION FOR WFXU-DT FCC FILE NUMBER BPCDT-20080617ABP TO MAXIMIZE OPERATION IN THE POST AND PRE DTV TRANSITION PERIOD

WFXU-DT
BUDD BROADCASTING CO., INC.
LIVE OAK, FLORIDA

This firm has been employed by Budd Broadcasting Co., Inc. "BBCI" to prepare engineering studies and a minor amendment to a pending application (FCC file number BPCDT-20080617ABP) for DTV maximization.

BBCI, licensee of WFXU-DT, Channel 48 herein proposes to amend the following parameters for its DTV operation.

- Amend the proposed antenna rotation from 48 degrees to 88 degrees.
- Amend the proposed antenna from a Propagation System Inc - PSILPD24BG-48 to a Systems With Reliability, Inc. – SWEDM24BFS/48-DT which share identical azimuth patterns but slightly different elevation patterns.

ATTACHED FIGURES

In carrying out the engineering studies the following attached figures were prepared:

1. Engineering specifications (Exhibit E1)
2. Elevation drawing of the antenna system (Exhibit E2)
3. Antenna elevation and azimuth relative field and dBk Patterns (Exhibit E3)
4. USGS 7.5 minute topographic quadrangle showing the proposed transmitter location and the coordinate lines (Exhibit E4)
5. Map showing the predicted DTV coverage contour (Exhibit E5)
6. Allocation analysis (Exhibit E6)
7. Environmental impact/ RFR hazard analysis (Exhibit E7)
8. Coverage area and population gain / loss analysis (Exhibit E8)

ALLOCATION ANALYSIS

It is herein proposed to amend the above referenced channel 48 digital facility to maximize its coverage area without causing impermissible interference to other pre and post DTV transition facilities. Exhibit E6 demonstrates the interference considerations for the proposed facility and further illustrates complete compliance to all interference threshold criteria. Exhibit E8A demonstrates that WFXU as currently licensed (FCC File No: BLCDDT-20071113ACD), provides no first DTV service areas. The noise limited contour covers 182,376 people and 7822 km². Exhibit E8B demonstrates WFXU as amended and also provides no first DTV service areas; however, this proposed maximization makes better use of the available spectrum since it covers 407,063 people and 13092 km².

ENVIRONMENTAL IMPACT/RFR HAZARD ANALYSIS

An analysis has been made of the human exposure to RFR using the calculation methodology described in OET Bulletin 65, Edition, 97-01. Exhibit E7 is a RFR study demonstrating compliance within 5% of the most restrictive permissible exposure at any location 2 meters above the ground. Exhibit E7 calculations were made using a frequency of 674 MHz, which is the lower edge of the proposed channel. To account for ground reflections, a coefficient of 1.6 was included in the calculations.

Pursuant to OET Bulletin 65 concerning multiple-user transmitter sites only those licensees whose transmitters produce power density levels greater than 5.0% of the exposure limit are considered significant contributors to RFR. Since the proposed operation is well within 5% of the most permissible exposure at any location 2 meters above the ground, it is not considered a significant contributor to RFR exposure. Thus, contributions to exposure from other RF sources in the vicinity of WFXU-DT were not taken into account. The instant proposal complies with the FCC limits for human exposure to RF radiation and thus is excluded from further environmental processing.

DECLARATION OF ENGINEER

The foregoing statement and the report regarding the aforementioned engineering work are true and correct to the best of my knowledge. Executed on August 20, 2008.

METHODOLOGY AND EXPLANATION OF
ENVIRONMENTAL IMPACT / RADIO FREQUENCY RADIATION
HAZARD ANALYSIS

A theoretical analysis has been conducted of the human exposure to radio frequency radiation ("RFR") using the calculation methodology described in *OET Bulletin 65, Edition 97-01*. The RFR analysis is conducted pursuant to the following methodology:

Terrain¹ extraction is compiled from the proposed tower site to radial lengths of 0.25 miles in 0.001 mile increments for 360 radials. The power density is calculated for each terrain point at 6 feet above ground level using the elevation and azimuth pattern of the proposed broadcast antenna. The power density calculations are conducted using the lower edge of the proposed channel frequency. To account for ground reflections, a coefficient of 1.6 was included in the calculation.

The resulting cylindrical polar analysis is then summarized into a coordinate plane graph using the following methodology:

Starting from the origin the maximum calculated RFR value is determined among the 360 degree radials for each 0.001 mile increment, the value is then converted into a percentage of the maximum allowable general population or uncontrolled exposure and plotted as a function of perpendicular distance from the tower.

¹ Terrain extraction is based upon a 3 arc second point spacing terrain database.

EXHIBIT 1

WFXU License Corporation (“WFXU”), the licensee of WFXU(TV), hereby requests an extension of time in which to complete construction of WFXU’s DTV facilities. As detailed below, WFXU remains unable to complete its initial DTV build-out due to financial reasons beyond its control.

WFXU has struggled financially since the station first began operations, and has now generated cash flow deficits in each of the last five years (2000-2004). In addition, WTLH License Corporation, the licensee of WTLH(TV) – the formerly co-owned station upon which WFXU(TV) relied for its operating personnel, programming, and other financial support – has recently declared bankruptcy and is now under the control of a bankruptcy trustee. Previously, WFXU License Corporation and WTLH License Corporation were both subsidiaries of Pegasus Communications Corporation (“Pegasus”). By combining their collective resources, the two television stations were able to operate with greater economic efficiency in the small Tallahassee, Florida–Thomasville, Georgia market. Pursuant to its filing of a Chapter 11 Bankruptcy plan, and a subsequent transfer of control approved by the Commission by FCC File No. BTCCT-20050408ADS, WTLH License Corporation and WTLH(TV) are now under the control of the PSC Liquidating Trust. According to WTLH’s Chapter 11 Bankruptcy plan and the liquidating trust agreement, the PSC Liquidating Trust’s goal is to identify a buyer for the broadcast assets of WTLH(TV), seek the required approvals of the Bankruptcy Court, seek the required FCC approvals, and take such actions which are necessary to consummate the transfer of the broadcast assets to the ultimate buyer. See *In re: Pegasus Satellite Television, Inc. et al.*, Case No. 04-20878 (Bankr. D. Me. June 2, 2004). Based on WTLH(TV)’s current bankruptcy

situation and WFXU(TV)'s historic negative financial performance, even when it was run in conjunction with another full-power station, WFXU(TV) cannot afford to construct its DTV facilities at the present time. Accordingly, WFXU respectfully requests that the Commission grant an extension of time in which to build and operate the station's DTV facilities.

Background Since the time WFXU(TV) signed on the air in 1998 until April 2002, the station was operated as a *de facto* satellite station of WTLH(TV), the Tallahassee Fox affiliate, pursuant to a Time Brokerage Agreement ("TBA"). In April 2002, WFXU License Corporation acquired the station from KB Prime Media, LLC, following the FCC's grant of an unbuilt station waiver. At that time, WFXU(TV) secured an affiliation agreement with the UPN Network, but continued to operate out of WTLH(TV)'s facilities pursuant to an intra-company TBA. *See* FCC File No. BALCT-20010806ABW.

Based on a series of detailed showings documenting operating cash flow deficits from the combined operations of WFXU and WTLH in excess of \$3 million between 2000-2002, WFXU previously has received DTV construction extensions based upon financial hardship. *See* FCC File No. BEPCDT-20020304AIK; FCC File No. BEPCDT-20021018AAK; FCC File No. BEPCDT-20030923ADW; BEPCDT-20041216AEG. Because of these operating results, WFXU repeatedly urged the Commission in its DTV construction extension requests to abandon its "one-size-fits-all" approach to DTV construction extensions and not insist that WFXU(TV) commit to a date-certain DTV build-out. WFXU noted that the Tallahassee-Thomasville DMA, the 109th largest market in the country, contains a miniscule percentage of the television households in the country (approximately 0.237 percent as of 2005) and that a deferral of WFXU(TV)'s DTV build-out would not impair the overall DTV transition. Demonstrating the dire choices facing the station, WFXU(TV) indicated in its earlier DTV extension requests that if

the FCC nonetheless insisted on a firm DTV build-out commitment for WFXU(TV), Pegasus would be forced to either: (i) file to convert WFXU(TV) to a satellite station and turn in WFXU's DTV channel pursuant to the FCC's so-called flash cut option, or (ii) sell the station.

Current Status Simultaneously herewith, WFXU has submitted to the FCC financial documentation reporting the company's revenues, operating expenses, and income for 2003, 2004, and through August 31, 2005, which demonstrates the financial hardship that continues to face WFXU(TV). Those documents have been submitted under separate cover pursuant to a request for confidentiality under Section 0.459 of the Commission's Rules. 47 C.F.R. § 0.459. As demonstrated by those documents, WFXU(TV) continues to struggle and has produced a fifth consecutive year of operating cash flow deficits. Thus, WFXU(TV) remains far short from even generating a positive cash flow, let alone generating the type of income necessary to fund the capital investment in WFXU-DT's digital build-out or to secure a loan for the same.

WFXU(TV) is a fledgling station, which has struggled for the seven short years that it has been on the air. Unfortunately, the station has continued to struggle since its last extension of its DTV construction permit. The station's present situation has only been exacerbated by the reorganization of its former sister station, WTLH(TV), under the control of a liquidating bankruptcy trustee. Given the poor financial performance of WFXU(TV) and the intervening bankruptcy of WTLH License Corporation, WFXU submits that it is unable to complete construction of its DTV facilities at this time due to extreme financial hardship beyond its control and respectfully requests an extension of time in which to construct its digital facilities.

PETITION FOR RECONSIDERATION

Budd Broadcasting Co., Inc. ("Budd"), by its attorneys, seeks reconsideration of the December 30, 2008 letter ruling by the Chief, Video Division denying the above-referenced application.¹ In support, the following is respectfully submitted:

BACKGROUND

The subject application requests the modification of the WFXU DTV facility. Specifically, the application proposed to move the transmitter site location approximately 40 miles to the southeast of the existing analog site. A copy of the application, as amended, is attached (Attachment B). In that application, it was demonstrated that the population gain was significant (i.e. increase in coverage from 183,367 to 407,063 people).

¹ A copy of that Letter is attached (Attachment A).

The Commission concluded that providing additional service to new viewers does not justify withdrawing existing service from 138,200 people who already rely on this service (emphasis added).

ARGUMENT

At the outset, it should be noted that Budd acquired WFXU from WFXU License Corporation. *See* BALCT-20061121AIV (Attachment C). Consummation occurred on January 25, 2007 (Attachment D). At the time that Budd acquired the station, it had been operated as a satellite of WTLH-TV, Bainbridge, Georgia. WTLH-TV was a Fox affiliate. Thus, as a satellite, WFXU was providing Fox programming. The attached contour map demonstrates that degree of other Fox service in the market (Attachment E). However, upon consummation by Budd, WFXU ceased operating as a satellite and ceased providing Fox programming.

It should also be noted that WFXU has struggled financially since the station first began operations, and generated cash flow deficits for the entire tenor of its existence. WFXU License Corporation and WTLH License Corporation were both subsidiaries of Pegasus Communications Corporation (“Pegasus”). By combining their collective resources, the two television stations were able to operate with greater economic efficiency in the small Tallahassee, Florida-Thomasville, Georgia market. Since the acquisition of WFXU by Budd, the economic realities were such that, absent a grant of the maximization application, the economic viability of operating the station became doubtful. *See* Declaration of Harvey M. Budd (Attachment H). In this regard, the Commission should note that WFXU, pursuant to requests by the prior licensee, had

received numerous construction extensions based upon financial hardship. *See* FCC File No. BEPCDT-20020304AIK; FCC File No. BEPCDT-20021018AAK; FCC File No. BEPCDT-20030923ADW; FCC File No. BEPCDT-20041216AEG. *See also* FCC File No. BEPCDT-20050915ACI (Attachment F).²

Budd has operated WFXU legally since becoming the licensee of the station. However, the station has not provided meaningful service. In this regard, due to financial difficulties, the programming it has broadcast consists of only two (2) half-hour public affairs programs. These programs are repeated over and over when the station is on the air. *See* Budd Declaration (Attachment H). Because of technical difficulties stemming from Budd's financial plight, the station has been barely operating and, as previously stated, the programming provided could hardly be characterized as meaningful. In this regard, through a series of notifications, the station has suspended operations and then resumed operations for brief periods of time (*See* Attachment G). It was Budd's hope that, upon grant of the subject maximization application, the station would be able to become economically viable. The real question is whether the grant of the subject application with the attendant hypothetical "loss of service" is better than the ultimate denial of the subject application and the real cessation of all service. It is submitted that the latter is hardly the more favorable result. It is further submitted that, under the circumstances previously delineated, the public interest would be better served by a grant of the subject application.

² Attachment F is the September 15, 2005 Application for Extension of Time to Construct a Digital Television Broadcast Station (FCC Form 387). That Application, at Exhibit 1, provides a detailed narrative of the financial problems WFXU has historically experienced.

The public benefits that will be generated by implementation of Budd's proposed modification application include: (1) advancement of the Commission's bedrock principle of localism though Budd's commitment to broadcast programming (news, public affairs, religious and other) that is specifically oriented to serve the people of the entire WFXU-DT service area; (2) advancement of localism through the maintenance of the main studio and local production facilities within Live Oak;³ (3) continued provision of principal city coverage over all of Live Oak; (4) a substantial increase in the number of people who will be able to view the WFXU-DT over-the-air programming;⁴ (5) advancement of the Commission's critical goal of promoting competition; and (6) preservation of the ownership and service of stations that confront extreme financial exigencies.

The cases relied on by the Commission in support of denying the Budd application all deal with loss of service. See West Michigan Telecasters, Inc., 22 FCC 2d 943 (1970), recon. denied, 26 FCC 2d 668 (1970), aff'd West Michigan Telecasters, Inc.

³ Although the Commission has requested comments on a proposed requirement that stations maintain their main studios within their principal communities, Budd makes and will honor this commitment voluntarily even if no such requirement is adopted. See *In the Matter of Broadcast Localism*, Report on Broadcast Localism and NPRM, 23 FCC Rcd 1324, 1343-44 at ¶41 (2008).

⁴ The Commission has established that significantly increasing the number of people who will receive a station's over-the-air digital programming is an important public interest benefit. See, e.g., *Amendment of Section 73.622(i) (Bryan, Texas)*, Report and Order, DA 08-2452, rel. Nov. 5, 2008 (the public interest would be served by permitting the station to expand service beyond the area its current allocation serves); *Amendment of Section 73.622(i) (Atlantic City, New Jersey)*, NPRM, DA 08-2028, rel. Sept. 2, 2008 (issuance of NPRM is warranted where proposal would allow the station to provide a digital signal to an additional 2,436,827 viewers); *Amendment of Section 73.622(i) (Huntsville, Alabama)*, Report and Order, DA 08-2302, rel. Oct. 17, 2008 (the public interest would be served by permitting the station to expand service from 83% to 96% of the viewers in the station's DMA); *Amendment of Section 73.622(i) (Waco, Texas)*, NPRM, DA 08-2571, rel. Nov. 26, 2008 (issuance of NPRM is warranted where proposal would allow the station to provide a digital signal to 192.3% of its current DTV service population); *Amendment of Section 73.622(i) (Ann Arbor, Michigan)*, NPRM, DA 08-1502, rel. Sept. 2, 2008 (issuance of NPRM is warranted where proposal would allow the station to better serve the television market to which it is assigned).

v. FCC, 460 FCC 2d 883, 889 (DC Cir. 1972) (finding that losses in service are *prima facie* inconsistent with the public interest); Triangle Publications, Inc., 37 FCC 307, 313 (1964) (finding that “once in operation, a station assumes an obligation to maintain service to its viewing audience and the withdrawal or downgrading of existing service is justifiable only if offsetting facts are shown which establish that the public generally will be benefited”); Television Corporation of Michigan v. FCC, 294 FCC 2d 730 (1961) (finding that deprivation of service to any group was undesirable and can be justified only by offsetting factors); and Hall v. FCC, 237 FCC 2d 567 (DC Cir. 1956) (finding that a curtailment of service is not in the public interest unless outweighed by other factors). However, as demonstrated, the service provided by WFXU can hardly be considered meaningful. Moreover, the off-setting benefits would enable WFXU to provide operation to a significantly larger number of viewers.

It is submitted that the existing WFXU service is sporadic and not meaningful. Clearly, the loss of this “service” is far outweighed by the benefit to the public of meaningful service which can be achieved by the grant of the application and the attendant significant increase in population coverage. The economic viability of the station is dependent on a grant of the application. It is submitted that under the circumstances described herein, WFXU, while legally operating, is not operating in a meaningful manner. Thus, a grant of the application would not result in any real loss of service. *Cf.* January 30, 2008 Letter to Gray Television Licensee, Inc., DA 08-173, WSWG(TV), Valdosta, Georgia. It is clear that none of the residents within the WFXU service area rely on the current service.

CONCLUSION

In view of the foregoing, it is respectfully submitted that the Commission should reconsider the denial of the application and, in light of the arguments advanced herein, the application should be granted.

Respectfully submitted,

BUDD BROADCASTING CO., INC.

Dear Licensee:

This is with respect to the above-referenced application filed by Budd Broadcasting Co., Inc. ("Budd Broadcasting"), the licensee of WFXU(TV)-DT, Live Oak, Florida, for modification of its DTV facility on channel 48. Budd Broadcasting proposes to move the transmitter site location for the station over 40 miles to the southeast of the existing analog site.

It is well-settled that the Commission does not favor reductions in television service. Proposals that would result in a loss in TV service have been considered to be *prima facie* inconsistent with the public interest.¹ "[O]nce a station begins operations, it is obligated to maintain service to its viewing audience absent off-setting public benefits to discontinuing service."² Because Budd Broadcasting proposes to move the station's transmitter site over 40 miles, which would result in loss of service to approximately three quarters of the geographic area within the Grade B contour of WFXU(TV) and 138,200 people, the staff requested that Budd Broadcasting amend its application to submit a public interest showing. Budd Broadcasting amended its application on several occasions to provide a more detailed showing of the coverage gains and losses.

We conclude that Budd Broadcasting has failed to show that the public interest would be served by grant of its application. While Budd Broadcasting states that the proposed facility would increase the

station's coverage from 183,376 to 407,063 people, the entire gain area is already well served by other stations. Providing additional service to new viewers does not justify withdrawing existing service from 138,200 people who already rely on this service. In addition, we note that portions of the loss area would continue to receive service from only two other full power television stations if the instant application was granted.

WILLFUL FALSE STATEMENTS ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE, TITLE 18, SECTION 1001), AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION PERMIT (U.S. CODE, TITLE 47, SECTION 312(a)(1)), AND/OR FORFEITURE (U.S. CODE, TITLE 47, SECTION 503).

SECTION III-D - DTV Engineering
 Complete Questions 1-5, and provide all data and information for the proposed facility, as requested in Technical Specifications, Items 1-13.

Pre-Transition Certification Checklist: An application concerning a pre-transition channel must complete questions 1(a)-(c), and 2-5. A correct answer of "Yes" to all of the questions will ensure an expeditious grant of a construction permit application to change pre-transition facilities. However, if the proposed facility is located within the Canadian or Mexican borders, coordination of the proposal under the appropriate treaties may be required prior to grant of the application. An answer of "No" will require additional evaluation of the applicable information in this form before a construction permit can be granted.

Post-Transition Expedited Processing. An application concerning a post-transition channel must complete questions 1(a), (d)-(e), and 2-5. A station applying for a construction permit to build its post-transition channel will receive expedited processing if its application (1) does not seek to expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B"); (2) specifies facilities that match or closely approximate those defined in the new DTV Table Appendix B facilities; and (3) is filed within 45 days of the effective date of Section 73.616 of the rules adopted in the Report and Order in the Third DTV Periodic Review proceeding, MB Docket No. 07-91.

1. The proposed DTV facility complies with 47 C.F.R. Section 73.622 in the following respects:	
(a) It will operate on the DTV channel for this station as established in 47 C.F.R. Section 73.622.	<input checked="" type="radio"/> Yes <input type="radio"/> No
(b) It will operate a pre-transition facility from a transmitting antenna located within 5.0 km (3.1 miles) of the DTV reference site for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(c) It will operate a pre-transition facility with an effective radiated power (ERP) and antenna height above average terrain (HAAT) that do not exceed the DTV reference ERP and HAAT for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(d) It will operate at post-transition facilities that do not expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622 (i) ("new DTV Table Appendix B").	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
(e) It will operate at post-transition facilities that match or reduce by no more than five percent with respect to predicted population from those defined in the new DTV Table Appendix B.	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A
2. The proposed facility will not have a significant environmental impact, including exposure of workers or the general public to levels of RF radiation exceeding the applicable health and safety guidelines, and therefore will not come within 47 C.F.R. Section 1.1307. Applicant must submit the Exhibit called for in Item 13.	<input checked="" type="radio"/> Yes <input type="radio"/> No
3. Pursuant to 47 C.F.R. Section 73.625, the DTV coverage contour of the proposed facility will encompass the allotted principal community.	<input checked="" type="radio"/> Yes <input type="radio"/> No
4. The requirements of 47 C.F.R. Section 73.1030 regarding notification to radio astronomy installations, radio receiving installations and FCC monitoring stations have either been satisfied or are not applicable.	<input checked="" type="radio"/> Yes <input type="radio"/> No
5. The antenna structure to be used by this facility has been registered by the Commission and will not require registration to support the proposed antenna, OR the FAA has previously determined that the proposed structure will not adversely effect safety in air navigation and this structure qualifies for later registration under the Commission's phased registration plan, OR the proposed installation on this structure does not require notification to the FAA pursuant to 47 C.F.R.	<input checked="" type="radio"/> Yes <input type="radio"/> No

If a directional antenna is proposed, the requirements of 47 C.F.R. Sections 73.625(c) must be satisfied. **Exhibit required.** [Exhibit 43]

11. Does the proposed facility satisfy the pre-transition interference protection provisions of 47 C.F.R. Section 73.623(a) (Applicable only if **Certification Checklist** Items 1(a), (b), or (c) are answered "No.") and/or the post-transition interference protection provisions of 47 C.F.R. Section 73.616? Yes No [Exhibit 44]

If "No," attach as an Exhibit justification therefor, including a summary of any related previously granted waivers.

12. If the proposed facility will not satisfy the coverage requirement of 47 C.F.R. Section 73.625, attach as an Exhibit justification therefore. (Applicable only if **Certification Checklist** item 3 is answered "No.") [Exhibit 45]

13. **Environmental Protection Act. Submit in an Exhibit** the following: [Exhibit 46]

If **Certification Checklist** Item 2 is answered "Yes," a brief explanation of why an Environmental Assessment is not required. Also describe in the Exhibit the steps that will be taken to limit RF radiation exposure to the public and to persons authorized access to the tower site.

By checking "Yes" to **Certification Checklist** Item 2, the applicant also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines.

If **Certification Checklist** Item 2 is answered "No," an Environmental Assessment as required by 47 C.F.R Section 1.1311.

PREPARERS CERTIFICATION ON SECTION III MUST BE COMPLETED AND SIGNED.

SECTION III - PREPARER'S CERTIFICATION

I certify that I have prepared Section III (Engineering Data) on behalf of the applicant, and that after such preparation, I have examined and found it to be accurate and true to the best of my knowledge and belief.

AMENDMENT

In instant amendment is precipitated by the attached September 9, 2008, e-mail (Attachment A).

At the outset, the assertion that the pending WFXU-DT application results in a loss of service to 544,229 persons is incorrect. It appears that the Commission is basing its calculations on the WFXU-DT allotted site rather than the current licensed site. *See* BLCDT-20071113ACD. From the current licensed site, 912 persons are predicted to be losing 1st service while 42,775 persons will be pickup up 1st service. *See* attached engineering coverage maps.

At the outset, it is submitted that a loss to 912 persons is *de minimus*. Moreover, the number of people losing service within the DMA is even less (i.e. 892). Furthermore, within the Tallahassee Thomasville, Florida DMA, 9,924 persons are gaining service and within the Gainesville, Florida DMA, 14,204 persons are gaining service. Clearly, the Commission must look at the fact that the gains far outweigh the losses. In this regard, the amount of persons benefited are almost four times the number of persons suffering an elimination of service. Thus, the public interest benefits are obvious.

We need additional information in order to complete our processing of the above-referenced application for WFXU-DT. Our engineering review shows that the proposed facility would result in a loss of service to 544,229 persons who presently receive service from the station. Proposals that would result in a loss of TV service are inconsistent with the public interest and must be supported by a strong showing of countervailing public interest benefits. Please have your client amend the application within five business days to provide a public interest showing, including information regarding the other full power television services available to viewers in the proposed loss area.

If you have any questions, I can be reached at 202 418-1647.

ENGINEERING NARRATIVE

Budd Broadcasting Co., Inc. is the licensee holder of the above reference pending application to move and maximize WFXU-DT. As per the Commission's request attached are two supplemental exhibits which demonstrate gain/loss areas associated with the pending application relative to the licensed facility.

Exhibit E1 and E2 demonstrate a red WFXU-DT service contour relative to all neighboring licensed or permitted full service DTV stations which have like contours which potentially encroach within the red WFXU-DT contour. Both exhibits demonstrate that the licensed and pending facility facilities will not provide a first or second DTV service area.

DECLARATION OF ENGINEER

The foregoing statement and the report regarding the aforementioned engineering work are true and correct to the best of my knowledge. Executed on November 5, 2008.

The logo for Kessler and Gehman Associates, Inc. (KGA) features the letters 'KGA' in a stylized, serif font. The letters are white with a black outline and are set against a dark, horizontal rectangular background.

ENGINEERING STATEMENT OF RYAN WILLOUR OF THE FIRM KESSLER AND GEHMAN ASSOCIATES, INC., CONSULTING ENGINEERS IN CONNECTION WITH AN APPLICATION FOR MINOR AMENDMENT TO A PENDING DTV BROADCAST STATION APPLICATION FOR WFXU-DT FCC FILE NUMBER BPCDT-20080617ABP TO MAXIMIZE OPERATION IN THE POST AND PRE DTV TRANSITION PERIOD

WFXU-DT
BUDD BROADCASTING CO., INC.
LIVE OAK, FLORIDA

This firm has been employed by Budd Broadcasting Co., Inc. "BBCI" to prepare engineering studies and a minor amendment to a pending application (FCC file number BPCDT-20080617ABP) for DTV maximization.

BBCI, licensee of WFXU-DT, Channel 48 herein proposes to amend the following parameters for its DTV operation.

- Amend the proposed antenna rotation from 48 degrees to 88 degrees.
- Amend the proposed antenna from a Propagation System Inc - PSILPD24BG-48 to a Systems With Reliability, Inc. - SWEDM24BFS/48-DT which share identical azimuth patterns but slightly different elevation patterns.

ATTACHED FIGURES

In carrying out the engineering studies the following attached figures were prepared:

1. Engineering specifications (Exhibit E1)
2. Elevation drawing of the antenna system (Exhibit E2)
3. Antenna elevation and azimuth relative field and dBk Patterns (Exhibit E3)
4. USGS 7.5 minute topographic quadrangle showing the proposed transmitter location and the coordinate lines (Exhibit E4)
5. Map showing the predicted DTV coverage contour (Exhibit E5)
6. Allocation analysis (Exhibit E6)
7. Environmental impact/ RFR hazard analysis (Exhibit E7)
8. Coverage area and population gain / loss analysis (Exhibit E8)

ALLOCATION ANALYSIS

It is herein proposed to amend the above referenced channel 48 digital facility to maximize its coverage area without causing impermissible interference to other pre and post DTV transition facilities. Exhibit E6 demonstrates the interference considerations for the proposed facility and further illustrates complete compliance to all interference threshold criteria. Exhibit E8A demonstrates that WFXU as currently licensed (FCC File No: BLCDDT-20071113ACD), provides no first DTV service areas. The noise limited contour covers 182,376 people and 7822 km². Exhibit E8B demonstrates WFXU as amended and also provides no first DTV service areas; however, this proposed maximization makes better use of the available spectrum since it covers 407,063 people and 13092 km².

ENVIRONMENTAL IMPACT/RFR HAZARD ANALYSIS

An analysis has been made of the human exposure to RFR using the calculation methodology described in OET Bulletin 65, Edition, 97-01. Exhibit E7 is a RFR study demonstrating compliance within 5% of the most restrictive permissible exposure at any location 2 meters above the ground. Exhibit E7 calculations were made using a frequency of 674 MHz, which is the lower edge of the proposed channel. To account for ground reflections, a coefficient of 1.6 was included in the calculations.

Pursuant to OET Bulletin 65 concerning multiple-user transmitter sites only those licensees whose transmitters produce power density levels greater than 5.0% of the exposure limit are considered significant contributors to RFR. Since the proposed operation is well within 5% of the most permissible exposure at any location 2 meters above the ground, it is not considered a significant contributor to RFR exposure. Thus, contributions to exposure from other RF sources in the vicinity of WFXU-DT were not taken into account. The instant proposal complies with the FCC limits for human exposure to RF radiation and thus is excluded from further environmental processing.

DECLARATION OF ENGINEER

METHODOLOGY AND EXPLANATION OF
ENVIRONMENTAL IMPACT / RADIO FREQUENCY RADIATION
HAZARD ANALYSIS

A theoretical analysis has been conducted of the human exposure to radio frequency radiation ("RFR") using the calculation methodology described in *OET Bulletin 65, Edition 97-01*. The RFR analysis is conducted pursuant to the following methodology:

Terrain¹ extraction is compiled from the proposed tower site to radial lengths of 0.25 miles in 0.001 mile increments for 360 radials. The power density is calculated for each terrain point at 6 feet above ground level using the elevation and azimuth pattern of the proposed broadcast antenna. The power density calculations are conducted using the lower edge of the proposed channel frequency. To account for ground reflections, a coefficient of 1.6 was included in the calculation.

The resulting cylindrical polar analysis is then summarized into a coordinate plane graph using the following methodology:

Starting from the origin the maximum calculated RFR value is determined among the 360 degree radials for each 0.001 mile increment, the value is then converted into a percentage of the maximum allowable general population or uncontrolled exposure and plotted as a function of perpendicular distance from the tower.

¹ Terrain extraction is based upon a 3 arc second point spacing terrain database.

Under authority of the Communications Act of 1934, as amended, the consent of the Federal Communications Commission is hereby granted to the transaction indicated above.

The Commission's consent to the above is based on the representations made by the applicants that the statements contained in, or made in connection with, the application are true and that the undertakings of the parties upon which this transaction is authorized will be carried out in good faith.

The actual consummation of voluntary transactions shall be completed within 90 days from the date hereof, and notice in letter form thereof shall promptly be furnished to the Commission by the seller or buyer showing the date the acts necessary to effect the transaction were completed. Upon furnishing the Commission with such written notice, this transaction will be considered completed for all purposes related to the above described station(s).

FCC Form 323, Ownership Report, must be filed within 30 days after consummation, by the licensee/permittee or assignee.

ADDITIONAL REQUIREMENTS FOR ASSIGNMENTS ONLY:

Upon consummation the assignor must deliver the permit/license, including any modifications thereof to the assignee.

It is hereby directed that, upon consummation, a copy of this consent be posted with the station authorization(s) as required by the Commission's Rules and Regulations.

The assignee is not authorized to construct nor operate said station(s) unless and until notification of consummation in letter form has been forwarded to the Commission.

EXHIBIT 1

WFXU License Corporation (“WFXU”), the licensee of WFXU(TV), hereby requests an extension of time in which to complete construction of WFXU’s DTV facilities. As detailed below, WFXU remains unable to complete its initial DTV build-out due to financial reasons beyond its control.

WFXU has struggled financially since the station first began operations, and has now generated cash flow deficits in each of the last five years (2000-2004). In addition, WTLH License Corporation, the licensee of WTLH(TV) – the formerly co-owned station upon which WFXU(TV) relied for its operating personnel, programming, and other financial support – has recently declared bankruptcy and is now under the control of a bankruptcy trustee. Previously, WFXU License Corporation and WTLH License Corporation were both subsidiaries of Pegasus Communications Corporation (“Pegasus”). By combining their collective resources, the two television stations were able to operate with greater economic efficiency in the small Tallahassee, Florida–Thomasville, Georgia market. Pursuant to its filing of a Chapter 11 Bankruptcy plan, and a subsequent transfer of control approved by the Commission by FCC File No. BTCCT-20050408ADS, WTLH License Corporation and WTLH(TV) are now under the control of the PSC Liquidating Trust. According to WTLH’s Chapter 11 Bankruptcy plan and the liquidating trust agreement, the PSC Liquidating Trust’s goal is to identify a buyer for the broadcast assets of WTLH(TV), seek the required approvals of the Bankruptcy Court, seek the required FCC approvals, and take such actions which are necessary to consummate the transfer of the broadcast assets to the ultimate buyer. See *In re: Pegasus Satellite Television, Inc. et al.*, Case No. 04-20878 (Bankr. D. Me. June 2, 2004). Based on WTLH(TV)’s current bankruptcy

situation and WFXU(TV)'s historic negative financial performance, even when it was run in conjunction with another full-power station, WFXU(TV) cannot afford to construct its DTV facilities at the present time. Accordingly, WFXU respectfully requests that the Commission grant an extension of time in which to build and operate the station's DTV facilities.

Background Since the time WFXU(TV) signed on the air in 1998 until April 2002, the station was operated as a *de facto* satellite station of WTLH(TV), the Tallahassee Fox affiliate, pursuant to a Time Brokerage Agreement ("TBA"). In April 2002, WFXU License Corporation acquired the station from KB Prime Media, LLC, following the FCC's grant of an unbuilt station waiver. At that time, WFXU(TV) secured an affiliation agreement with the UPN Network, but continued to operate out of WTLH(TV)'s facilities pursuant to an intra-company TBA. *See* FCC File No. BALCT-20010806ABW.

Based on a series of detailed showings documenting operating cash flow deficits from the combined operations of WFXU and WTLH in excess of \$3 million between 2000-2002, WFXU previously has received DTV construction extensions based upon financial hardship. *See* FCC File No. BEPCDT-20020304AIK; FCC File No. BEPCDT-20021018AAK; FCC File No. BEPCDT-20030923ADW; BEPCDT-20041216AEG. Because of these operating results, WFXU repeatedly urged the Commission in its DTV construction extension requests to abandon its "one-size-fits-all" approach to DTV construction extensions and not insist that WFXU(TV) commit to a date-certain DTV build-out. WFXU noted that the Tallahassee-Thomasville DMA, the 109th largest market in the country, contains a miniscule percentage of the television households in the country (approximately 0.237 percent as of 2005) and that a deferral of WFXU(TV)'s DTV build-out would not impair the overall DTV transition. Demonstrating the dire choices facing the station, WFXU(TV) indicated in its earlier DTV extension requests that if

the FCC nonetheless insisted on a firm DTV build-out commitment for WFXU(TV), Pegasus would be forced to either: (i) file to convert WFXU(TV) to a satellite station and turn in WFXU's DTV channel pursuant to the FCC's so-called flash cut option, or (ii) sell the station.

Current Status Simultaneously herewith, WFXU has submitted to the FCC financial documentation reporting the company's revenues, operating expenses, and income for 2003, 2004, and through August 31, 2005, which demonstrates the financial hardship that continues to face WFXU(TV). Those documents have been submitted under separate cover pursuant to a request for confidentiality under Section 0.459 of the Commission's Rules. 47 C.F.R. § 0.459. As demonstrated by those documents, WFXU(TV) continues to struggle and has produced a fifth consecutive year of operating cash flow deficits. Thus, WFXU(TV) remains far short from even generating a positive cash flow, let alone generating the type of income necessary to fund the capital investment in WFXU-DT's digital build-out or to secure a loan for the same.

WFXU(TV) is a fledgling station, which has struggled for the seven short years that it has been on the air. Unfortunately, the station has continued to struggle since its last extension of its DTV construction permit. The station's present situation has only been exacerbated by the reorganization of its former sister station, WTLH(TV), under the control of a liquidating bankruptcy trustee. Given the poor financial performance of WFXU(TV) and the intervening bankruptcy of WTLH License Corporation, WFXU submits that it is unable to complete construction of its DTV facilities at this time due to extreme financial hardship beyond its control and respectfully requests an extension of time in which to construct its digital facilities.

DECLARATION

Harvey M. Budd, President of Budd Broadcasting Co., Inc. ("Budd"), hereby states under penalty of perjury the following:

Budd acquired television station WFXU(TV) from WFXU License Corporation. WFXU had been operated as a satellite of WTLH(TV), which was a Fox affiliate. WFXU was financially distressed. The station could not have survived economically absent a "satellite operation."

Since acquiring WFXU, Budd has operated the station sporadically and has broadcast the same public affairs programs continuously when the station has been operational. The limited coverage area of the station makes it economically impossible for it to survive.

Grant of the digital maximization application is the only hope for WFXU to be economically viable. Upon grant of that application, it is my intention to provide meaningful service to the WFXU service area.

Supplement to Petition for Reconsideration

Budd Broadcasting Co., Inc. (Budd), by its attorneys, submits a Supplement to its January 29, 2009 Petition for Reconsideration. In support, Budd submits the following:

1. Pending before the Commission is Budd's June 17, 2008 application seeking the modification of the WFXU DTV facility. Specifically, the application proposes to move the transmitter site location approximately 40 miles to the southeast of the existing analog site. The Commission was troubled by the fact that there would be a reduction in service. In addition, the Commission noted that portions of the loss area would continue to receive service from only two (2) other full power television stations should the modification application be granted. See December 30, 2008 letter from the Chief, Video Division to Budd. The instant Supplement and the pending Petition addresses these concerns.

2. Attachment A to the instant submission depicts the existing WFXU licensed grade B contour. It is clear that within this contour the following stations are received:

WABW (PBS)

WXGA (PBS)

WALB (NBC)

WTWC (NBC)

WFXL (FOX)

WTLH (FOX)

WCTV (CBS)

WSWG (CBS)

WTXL (ABC)

Thus, WFXU constitutes the tenth (10th) full service station. It is important to note that the aforementioned stations provide virtually no local Live Oak news.

3. Attachment B depicts the proposed WFXU grade B contour. The following stations would be received:

WUFT (PBS)

WOGX (FOX)

WGFL (CBS)

WCJB (ABC)

WNBW (NBC)

Thus, WFXU would constitute the sixth (6th) full service station. Accordingly, Budd proposes to bring more service to a less-served area.

4. One of the primary goals of the relocation is to increase local news. The proposed market has only two (2) local newscasts. Specifically, the ABC affiliate provides a local newscast. The University of Florida, through its student-run station, WUFT, provides a ½ hour daily newscast (Monday-Friday). The NBC and CBS affiliates provide no local news.

The FOX affiliate gets 100% of its news from the Orlando FOX station. The cable system, owned by Cox, provides news WJXT¹, Jacksonville and WESH (NBC – Orlando).

5. In addition to increasing local news coverage to Live Oak/Gainesville, another goal is to create competition and diversity in coverage. In this regard, the cable TV system, the newspapers, and 4 out of the 5 existing full power TV stations are not locally owned. WUFT is licensed to the University of Florida and has only limited resources with which to serve the community.

6. Budd is committed to serving the community with a significant amount of locally produced programming. Ilene Budd, a principal, has produced over 250 one-half hour community public affairs shows which have been broadcast on the CBS affiliate, WGFL, and the leased access cable television channel.

7. It should also be noted that the goals enunciated herein are achievable in light of the existing infrastructure which Budd owns. In this regard Budd owns the proposed tower, a studio, STL tower link and transmission equipment. Thus, the cost of operations would be greatly reduced and lower the breakeven point.

8. Finally, the current WFXU tower location is oriented to serve Valdosta, Georgia. However, historically the station was initially allocated to primarily serve Live Oak/Lake City and Gainesville. There is little interaction or “trading” between Valdosta and Live Oak/Lake City and Gainesville. In this regard the residents of Live Oak/Lake City utilize the services and facilities of Gainesville. They do not go to Valdosta for shopping or medical services.²

¹ WJXT is an independent station.

² For example, Live Oak death notices are placed in the Gainesville newspaper. See Attachment C.

9. As previously stated, the current operation of WFXU is not meaningful. See Petition for Reconsideration, pg. 3. Thus, a relocation would not result in a loss of service.

10. It is submitted that a grant of the subject application would be in the public interest. Specifically, it would advance the Commission's bedrock principle of localism in light of Budd's commitment to local news and public affairs programming; (2) maintenance of a local studio and production facilities within the Live Oak coverage area; (3) continued provision of principal city coverage over all of Live Oak; (4) a substantial increase in the number of people who will be able to view the WFXU-DT over-the-air programming [See Amendment of Section 73.622(i) (Ann Arbor, Michigan), NPRM, DA-08-1502, rel Sept. 2, 2008 (issuance of NPRM is warranted where proposal would allow the station to better serve the television market to which it is assigned)]; (5) advancement of the Commission's critical goal of promoting competition; and (6) preservation of the ownership and service of stations that confront extreme financial exigencies. Accordingly, the Commission should reconsider the denial of the application and, in light of the arguments advanced, the application should be granted.

Respectfully submitted,

BUDD BROADCASTING CO., INC.

Second Supplement to Petition for Reconsideration

Budd Broadcasting Co., Inc. (Budd), by its attorney, submits a Second Supplement to its January 29, 2009 Petition for Reconsideration. In support, Budd submits the following:

The instant submission is intended to clarify the television services received in the existing WFXU service area and the television services received in the proposed service area (i.e. BPCDT-20080617ABP).

Attached to the instant submission is an engineering statement of Budd's consulting engineer, Mr. Ryan Wilhour. Mr. Wilhour attaches to his statement two (2) maps. Exhibit E1 demonstrates all full service licensed or permitted TV stations in the current WFXU service area (Valdosta). Mr. Wilhour finds that WFXU is the tenth (10th) full service TV station to provide complete and comprehensive coverage to the entire Valdosta City boundary.¹ Mr. Wilhour also identifies ten (10) full service stations which encroach within the licensed WFXU coverage contour but provide no contour coverage to Valdosta.²

¹ The stations in addition to WFXU are: WABW, WXGA, WALB, WFXL, WSWG, WCTV, WTLH, WTWC and WTXL.

² These stations are: WPXC, WJCT, WNBW, WJXX, WTLV, WCJB, WTEV, WGFL, WAWS, WCWJ, WUFT, WJXT and WJEB.

STAMP & RETURN

Exhibit E2 demonstrates all full service licenses or permitted TV stations that have coverage contours which provide full service to the proposed WFXU service area (i.e. the city of Gainesville). There are five (5) stations. They are:

WUFT

WOGX

WGFL

WCJB

WNBW

Thus, WFXU would constitute the sixth (6th) station.

There are five (5) stations which encroach within the proposed WFXU coverage contour, but only provide partial coverage.³

Mr. Wilhour also identifies ten (10) stations which encroach within the proposed WFXU coverage contour but do not cover Gainesville.⁴ As verified by Mr. Wilhour, WFXU is thus the sixth (6th) full service TV station to provide “complete and comprehensive contour coverage to the entire Gainesville city boundary.” *See Engineering Statement at page 3.*

Predicated on the foregoing and the arguments previously advanced, it is respectfully submitted that ample public interest grounds exist to grant the subject application. Specifically, it would advance the Commission’s bedrock principle of localism in light of Budd’s commitment to local news and public affairs programming; (2) maintenance of a local studio and production facilities within the Live Oak coverage area; (3) continued provision of principal city coverage over all of Live Oak; (4) a substantial increase in the number of people who will be able to view the WFXU-DT over-the-air programming [*See Amendment of Section 73.622(i) (Ann Arbor, Michigan)*, NPRM, DA-08-1502, rel. Sept. 2, 2008 (issuance of NPRM is warranted where

³ These stations are: WJXT, WJCT, WTLV, WJXX and WJEB.

⁴ These stations are: WPXC, WTSP, WXGA, WTWC, WCWJ, WAWS, WTXL, WTV, WCTV and WTLH.

proposal would allow the station to better serve the television market to which it is assigned)];
(5) advancement of the Commission's critical goal of promoting competition; and (6)
preservation of the ownership and service of stations that confront extreme financial exigencies.
Thus, the Commission should reconsider the denial of the application and, in light of the
arguments advanced, the application should be granted.

Respectfully submitted,

Budd Broadcasting Co., Inc.

LIVE OAK, FL

ENGINEERING NARRATIVE

Budd Broadcasting Co., Inc. is the licensee holder of the above reference pending application to move and maximize WFXU-TV. The instant supplement statement has been prepared to clarify existing full service TV stations which have noise limited service coverage contours¹ (herein after "coverage contours") which cut into the WFXU license and pending application coverage contours, and furthermore demonstrates coverage into the city of Valdosta, GA and Gainesville, FL.

Exhibit E1 demonstrates all full service licensed or permitted TV stations that have coverage contours which encroach within the black coverage contour of the licensed WFXU-TV facility (Facility ID 22245, FCC File No.: BLCDT-20071113ACD). Exhibit E1 further demonstrates that the licensed WFXU-TV facility completely subsumes Valdosta with a coverage contour. The blue coverage contours demonstrate the following full service stations which encroach within the licensed WFXU-TV coverage contour but also completely subsume Valdosta:

- WABW-TV (Facility ID 23917, FCC File No.: BMPEDT-20080619AKP)
- WXGA-TV (Facility ID 23929, FCC File No.: BMPEDT-20080619AKT)
- WALB-TV (Facility ID 70713, FCC File No.: BMPCDT-20080620ALA)
- WFXL-TV (Facility ID 70815, FCC File No.: BLCDT-20070725AFF)
- WSWG-TV (Facility ID 28155, FCC File No.: BLCDT-20061109ACF)
- WCTV-TV (Facility ID 31590, FCC File No.: BLCDT-20050815AAA)
- WTLH-TV (Facility ID 23486, FCC File No.: BLCDT-20090206ADS)
- WTWC-TV (Facility ID 66908, FCC File No.: BMPCDT-20100128AEA)
- WTXL-TV (Facility ID 41065, FCC File No.: BLCDT-20090217ABY)

The licensed WFXU-TV facility is thus the tenth full service TV station to provide complete and comprehensive coverage to the entire Valdosta city boundary. The green contours demonstrate the following full service stations which encroach within

¹ The noise-limited service contour or authorized service area is the area in which the predicted F(50,90) field strength of the station's signal, as determined using the method in §73.625(b) exceeds the levels at which reception of DTV service is limited by naturally occurring noise.

- WGFL-TV (Facility ID 7727, FCC File No.: BLCDT-20060714ABC)
- WAWS-TV (Facility ID 11909, FCC File No.: BLCDT-20030328ANQ)
- WCWJ-TV (Facility ID 29712, FCC File No.: BLCDT-20060630AFM)
- WUFT-TV (Facility ID 69440, FCC File No.: BLEDT-20040304AAF)
- WJXT-TV (Facility ID 53116, FCC File No.: BLCDT-20020405AAX)
- WJEB-TV (Facility ID 29719, FCC File No.: BPEDT-20080618ADQ)

Exhibit E2 demonstrates all full service licensed or permitted TV stations that have coverage contours which encroach within the black coverage contour of the proposed WFXU-TV facility (Facility ID 22245, FCC File No.: BPCDT-20080617ABP). Exhibit E2 further demonstrates that the licensed WFXU-TV facility completely subsumes Gainesville, FL with a coverage contour. The blue coverage contours demonstrate the following full service stations which encroach within the proposed WFXU-TV coverage contour and also completely subsume Gainesville:

- WUFT-TV (Facility ID 69440, FCC File No.: BLEDT-20040304AAF)
- WOGX-TV (Facility ID 70651, FCC File No.: BLCDT-20020730ABS)
- WGFL-TV (Facility ID 7727, FCC File No.: BLCDT-20060714ABC)
- WCJB-TV (Facility ID 16993, FCC File No.: BLCDT-20071119AJB)
- WNBW-TV (Facility ID 83965, FCC File No.: BLCDT-20090105AGT)

The orange coverage contours demonstrate the following full service stations which encroach within the proposed WFXU-TV coverage contour but provide partial contour coverage to Gainesville:

- WJXT-TV (Facility ID 53116, FCC File No.: BLCDT-20020405AAX)
- WJCT-TV (Facility ID 73130, FCC File No.: BPEDT-20080414AAK)
- WTLV-TV (Facility ID 65046, FCC File No.: BPCDT-20081205AGG)
- WJXX-TV (Facility ID 11893, FCC File No.: BPCDT-20081205AGH)
- WJEB-TV (Facility ID 29719, FCC File No.: BPEDT-20080618ADQ)

The green coverage contours demonstrate the following full service stations which encroach within the proposed WFXU-TV coverage contour but do not provide contour coverage to Gainesville:

- WPXC-TV (Facility ID 71236, FCC File No.: BPCDT-20080619AFQ)
- WTSP-TV (Facility ID 11290, FCC File No.: BPCDT-20100120AAW)
- WXGA-TV (Facility ID 23929, FCC File No.: BMPEDT-20080619AKT)
- WTWC-TV (Facility ID 66908, FCC File No.: BMPEDT-20100128AEA)
- WCWJ-TV (Facility ID 29712, FCC File No.: BLCDDT-20060630AFM)
- WAWS-TV (Facility ID 11909, FCC File No.: BLCDDT-20030328ANQ)
- WTXL-TV (Facility ID 41065, FCC File No.: BLCDDT-20090217ABY)
- WTEV-TV (Facility ID 35576, FCC File No.: BLCDDT-20030328ANV)
- WCTV-TV (Facility ID 31590, FCC File No.: BLCDDT-20050815AAA)
- WTLH-TV (Facility ID 23486, FCC File No.: BLCDDT-20090206ADS)

The five stations which provide partial contour coverage to Gainesville are located on the East side of Jacksonville, FL and at best provide marginal and incomplete coverage to Gainesville, FL. The proposed WFXU-TV facility is thus the sixth full service TV station to provide complete and comprehensive contour coverage to the entire Gainesville city boundary.

WILLFUL FALSE STATEMENTS ON THIS FORM ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. CODE, TITLE 18, SECTION 1001), AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION PERMIT (U.S. CODE, TITLE 47, SECTION 312(a)(1)), AND/OR FORFEITURE (U.S. CODE, TITLE 47, SECTION 503).

SECTION III-D - DTV Engineering
Complete Questions 1-5, and provide all data and information for the proposed facility, as requested in Technical Specifications, Items 1-13.
<p>Pre-Transition Certification Checklist: An application concerning a pre-transition channel must complete questions 1 (a)-(c), and 2-5. A correct answer of "Yes" to all of the questions will ensure an expeditious grant of a construction permit application to change pre-transition facilities. However, if the proposed facility is located within the Canadian or Mexican borders, coordination of the proposal under the appropriate treaties may be required prior to grant of the application. An answer of "No" will require additional evaluation of the applicable information in this form before a construction permit can be granted.</p> <p>Post-Transition Expedited Processing. An application concerning a post-transition channel must complete questions 1 (a), (d)-(e), and 2-5. A station applying for a construction permit to build its post-transition channel will receive expedited processing if its application (1) does not seek to expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B"); (2) specifies facilities that match or</p>

closely approximate those defined in the new DTV Table Appendix B facilities; and (3) is filed within 45 days of the effective date of Section 73.616 of the rules adopted in the Report and Order in the Third DTV Periodic Review proceeding, MB Docket No. 07-91.

1. The proposed DTV facility complies with 47 C.F.R. Section 73.622 in the following respects:	
(a) It will operate on the DTV channel for this station as established in 47 C.F.R. Section 73.622.	<input checked="" type="radio"/> Yes <input type="radio"/> No
(b) It will operate a pre-transition facility from a transmitting antenna located within 5.0 km (3.1 miles) of the DTV reference site for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input type="radio"/> No
(c) It will operate a pre-transition facility with an effective radiated power (ERP) and antenna height above average terrain (HAAT) that do not exceed the DTV reference ERP and HAAT for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input type="radio"/> No
(d) It will operate at post-transition facilities that do not expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B").	<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A
(e) It will operate at post-transition facilities that match or reduce by no more than five percent with respect to predicted population from those defined in the new DTV Table Appendix B.	<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A
2. The proposed facility will not have a significant environmental impact, including exposure of workers or the general public to levels of RF radiation exceeding the applicable health and safety guidelines, and therefore will not come within 47 C.F.R. Section 1.1307. Applicant must submit the Exhibit called for in Item 13.	<input checked="" type="radio"/> Yes <input type="radio"/> No
3. Pursuant to 47 C.F.R. Section 73.625, the DTV coverage contour of the proposed facility will encompass the allotted principal community.	<input checked="" type="radio"/> Yes <input type="radio"/> No
4. The requirements of 47 C.F.R. Section 73.1030 regarding notification to radio astronomy installations, radio receiving installations and FCC monitoring stations have either been satisfied or are not applicable.	<input checked="" type="radio"/> Yes <input type="radio"/> No
5. The antenna structure to be used by this facility has been registered by the Commission and will not require registration to support the proposed antenna, OR the FAA has previously determined that the proposed structure will not adversely effect safety in air navigation and this structure qualifies for later registration under the Commission's phased registration plan, OR the proposed installation on this structure does not require notification to the FAA pursuant to 47 C.F.R. Section 17.7.	<input checked="" type="radio"/> Yes <input type="radio"/> No

10/28/2013 AMENDMENT.

THE REASON FOR THIS AMENDMENT IS TO REQUEST A WAIVER. PLEASE SEE ATTACHED WAIVER REQUEST.

JUNE 6, 2013 AMENDMENT:

THIS APPLICATION IS BEING AMENDED TO PROVIDE THE ASR NUMBER WHICH WAS ISSUED ON MAY 24, 2013. PLEASE SEE ATTACHED.

PREVIOUS AMENDMENT:

THE INSTANT AMENDMENT IS TO CORRECT THE TOWER SITE LOCATION AND ELEVATIONS TO COINCIDE WITH A SITE SURVEY PERFORMED SHORTLY AFTER THE INITIAL APPLICATION WAS FILED. THE FOLLOWING SECTIONS HAVE BEEN AMENDED:

SECTION III-D QUESTION 3, THE LATITUDE SECONDS HAVE BEEN AMENDED FROM 39.9 TO 37.5, AND THE LONGITUDE SECONDS HAVE BEEN AMENDED FROM 17.5 TO 11.2

SECTION III-D QUESTION 5, THE ANTENNA LOCATION SITE ELEVATION ABOVE MEAN SEA LEVEL HAS BEEN AMENDED FROM 36.6 TO 37.2

SECTION III-D QUESTION 6, THE OVERALL TOWER HEIGHT ABOVE GROUND LEVEL HAS BEEN AMENDED FROM 283.2 TO 282.5

SECTION III-D QUESTION 7, THE HEIGHT OF RADIATION CENTER ABOVE GROUND LEVEL HAS BEEN AMENDED FROM 273.6 TO 272.9

SECTION III-D QUESTION 8, THE HEIGHT OF RADIATION CENTER ABOVE AVERAGE TERRAIN HAS BEEN AMENDED FROM 279 TO 278.9

WAIVER REQUEST

Budd Broadcasting Co., Inc. (“Budd”) requests a waiver of the Commission’s imposition of limits on the filing and processing of modification applications. Specifically, the Commission has announced that it would limit the filing and processing of modification applications that would expand broadcast televisions’ use of the spectrum. *See* Public Notice, DA 13-618, released April 5, 2013. In that Notice, the Commission stated, *inter alia*, the following:

Beginning immediately and until further notice, the Media Bureau will not accept for filing modification applications (or amendments to pending modification applications) by full power and Class A television broadcast licensees and permittees for changes to existing television service areas that would increase a full power station’s noise-limited contour or a Class A station’s protected contour in one or more directions beyond the area resulting from the station’s present parameters as represented in its authorization (license and/or construction permit).

The Bureau will consider, on a case-by-case basis, requests for waiver of the filing limitation imposed by this Public Notice when a modification application is necessary or otherwise in the public interest for technical or other reasons to maintain quality service to the public, such as when zoning restrictions preclude tower construction at a particular site or when unforeseen events, such as extreme weather events or other extraordinary circumstances, require relocation to a new tower site. As with any request for waiver of our rules, such a request will be granted only on a showing of good cause and when grant of the waiver will serve the public interest.

Budd submits that as will be demonstrated, good cause is present for a grant of a waiver.

BACKGROUND

Budd has been attempting to relocate WFXU for a considerable time. *See* BPCDT-20080617ABP. The instant application, as amended, has been pending since April 23, 2012 (BPCDT-20120423ABL). An amendment to the application was filed on June 6, 2013.¹

ARGUMENT

At the outset, it should be noted that Budd acquired WFXU from WFXU License Corporation. *See* BALCT-20061121AIV. Consummation occurred on January 25, 2007. At the time that Budd acquired the station, it had been operated as a satellite of WTLH-TV, Bainbridge, Georgia. WTLH-TV was a Fox affiliate. Thus, as a satellite, WFXU was providing Fox programming. However, upon consummation by Budd, WFXU ceased operating as a satellite and ceased providing Fox programming.

It should also be noted that WFXU has struggled financially since the station first began operations, and generated cash flow deficits for the entire tenor of its existence. WFXU License Corporation and WTLH License Corporation were both subsidiaries of Pegasus Communications Corporation (“Pegasus”). By combining their collective resources, the two television stations

¹ The amendment provided the ASR number which was issued on May 24, 2013.

were able to operate with greater economic efficiency in the small Tallahassee, Florida-Thomasville, Georgia market. Since the acquisition of WFXU by Budd, the economic realities were such that, absent a grant of the maximization application, the economic viability of operating the station became doubtful. In this regard, the Commission should note that WFXU, pursuant to requests by the prior licensee, had received numerous construction extensions based upon financial hardship. *See* FCC File No. BEPCDT-20020304AIK; FCC File No. BEPCDT-20021018AAK; FCC File No. BEPCDT-20030923ADW; FCC File No. BEPCDT-20041216AEG. *See also* FCC File No. BEPCDT-20050915ACI.²

Budd has operated WFXU legally since becoming the licensee of the station. However, the station for a considerable period of time had not provided meaningful service. In this regard, due to financial difficulties, the programming it had broadcast consisted of only two (2) half-hour public affairs programs. These programs were repeated over and over when the station was on the air. Because of technical difficulties stemming from Budd's financial plight, the station had been barely operating and, as previously stated, the programming provided could hardly be characterized as meaningful. In this regard, through a series of notifications, the station has

² In the September 15, 2005 Application for Extension of Time to Construct a Digital Television Broadcast Station (FCC Form 387). That Application, at Exhibit 1, provides a detailed narrative of the financial problems WFXU has historically experienced.

suspended operations and then resumed operations for brief periods of time. It is Budd's hope that, upon grant of the subject application, the station would be able to become economically viable. The real question is whether the grant of the subject application with the attendant "gain" is better than the ultimate denial of the subject application and the real cessation of all service. It is submitted that the latter is hardly the more favorable result. It is further submitted that, under the circumstances previously delineated, the public interest would be better served by a grant of the subject application. It should also be noted that recently Budd has commenced broadcasting on a full-time basis. Specifically, Budd is broadcasting the Southern Soul Network programming. While this programming is adequate, it is hardly the programming Budd envisions for the station. That vision may only be fulfilled by a grant of the modification application.

It should be noted that the Commission's database has taken cognizance that the instant modification has been pending since April 2012, twelve months prior to the Commission's public notice imposing the limitation in the filing and processing of modification applications. The pendency of the application was the result of delays in obtaining FAA approval- a matter that was beyond Budd's control. In addition, recently, the Commission's rules required Budd to

comply with the Commission's requirement for a complete environmental study. That process was arduous and time consuming. All this was necessary in order to obtain the ASR number.

The public benefits that will be generated by implementation of Budd's proposed modification application include: (1) advancement of the Commission's bedrock principle of localism through Budd's commitment to broadcast programming (news, public affairs, religious and other) that is specifically oriented to serve the people of the entire WFXU-DT service area; (2) advancement of localism through the maintenance of the main studio and local production facilities within the service area; (3) continued provision of principal city coverage over all of Live Oak; (4) a substantial increase in the number of people who will be able to view the WFXU-DT over-the-air programming;³ (5) advancement of the Commission's critical goal of promoting competition; and (6) preservation of the ownership and service of stations that confront extreme financial exigencies.

³ The Commission has established that significantly increasing the number of people who will receive a station's over-the-air digital programming is an important public interest benefit. See, e.g., *Amendment of Section 73.622(i) (Bryan, Texas)*, Report and Order, DA 08-2452, rel. Nov. 5, 2008 (the public interest would be served by permitting the station to expand service beyond the area its current allocation serves); *Amendment of Section 73.622(i) (Atlantic City, New Jersey)*, NPRM, DA 08-2028, rel. Sept. 2, 2008 (issuance of NPRM is warranted where proposal would allow the station to provide a digital signal to an additional 2,436,827 viewers); *Amendment of Section 73.622(i) (Huntsville, Alabama)*, Report and Order, DA 08-2302, rel. Oct. 17, 2008 (the public interest would be served by permitting the station to expand service from 83% to 96% of the viewers in the station's DMA); *Amendment of Section 73.622(i) (Waco, Texas)*, NPRM, DA 08-2571, rel. Nov. 26, 2008 (issuance of NPRM is warranted where proposal would allow the station to provide a digital signal to 192.3% of its current DTV service population); *Amendment of Section 73.622(i) (Ann Arbor, Michigan)*, NPRM, DA 08-1502, rel. Sept. 2, 2008 (issuance of NPRM is warranted where proposal would allow the station to better serve the television market to which it is assigned).

It is submitted that the existing WFXU service is sporadic and not meaningful.

Clearly, the loss of this “service” is far outweighed by the benefit to the public of meaningful service which can be achieved by the grant of the application and the attendant significant increase in population coverage.⁴ The economic viability of the station is dependent on a grant of the application. It is submitted that under the circumstances described herein, WFXU, while legally operating, is not operating in a meaningful manner. Thus, a grant of the application would result in enabling the licensee to provide a broadcast service.

CONCLUSION

In view of the foregoing, it is respectfully submitted that the Commission should find that a waiver is justified and grant the application.

⁴ The current application would not result in any loss of service.

APPLICATION SUMMARY

The instant minor modification application proposes to modify the technical parameters as indicated in Exhibit 49.1.

AREA AND POPULATION ANALYSIS

Exhibit 49.6 was generated by a computer which calculates and plots the distances to the contour. The population served by the proposed noise limited contour was determined by using 2000 census data and a computer program which added the population of all census blocks whose centroids fall within the contour. The total population within the proposed noise limited contour is 710,421 persons. It should be noted that FCC Form 301, Section III-D questions 1d and 1e have been checked as "N/A". These questions are not applicable because as demonstrated in Exhibit 49.6 the licensed facility illustrated by the green noise limited contour provides a significantly different coverage area than the allotted facility¹ illustrated by the black noise limited contour. As further demonstrated the proposed facility illustrated by the blue noise limited contour completely subsumes the green licensed coverage area thus provides 100% population and coverage area. The proposed community of license contour illustrated as red provides 100 percent area and population coverage to Live Oak, Florida.

ALLOCATION STUDIES

The applicant accepts full responsibility for the elimination of any objectionable interference including that caused by intermodulation to facilities in existence or authorized prior to the

grant of this application. Exhibit 49.5 is a full OET69 allocation analysis which finds the following:

Evaluation toward Class A Stations

No Spacing violations or contour overlap to Class A stations

Evaluation toward Landmobile Stations

No landmobile spacing violations exist.

FCC Monitoring Stations

The proposed station is compliant with regard to FCC Monitoring Stations.

West Virginia quite zone

The proposed station is compliant with regard to West Virginia quite zone.

Table Mountain

The proposed station is compliant with regard to Table Mountain.

Canadian coordination distance

Proposed facility is beyond the Canadian coordination distance.

Mexican coordination distance

Proposed facility is beyond the Mexican coordination distance.

AM broadcast stations

The proposed station is compliant with regard to AM broadcast stations.

A theoretical analysis has been conducted of the human exposure to radio frequency radiation (“RFR”) using the calculation methodology described in OET Bulletin 65, Edition 97-01. The RFR analysis is conducted pursuant to the following methodology:

Terrain¹ extraction is compiled from the proposed tower site to radial lengths of 0.25 miles in 0.001 mile increments for 360 radials. The power density is calculated for each terrain point at 6 feet above ground level using the elevation and azimuth pattern of the proposed broadcast antenna. The power density calculations are conducted using the lower edge of the proposed channel frequency. To account for ground reflections, a coefficient of 1.6 was included in the calculation.

The resulting cylindrical polar analysis is then summarized into a coordinate plane graph using the following methodology:

Starting from the origin the maximum calculated RFR value is determined among the 360 degree radials for each 0.001 mile increment, the value is then converted into a percentage of the maximum allowable general population or uncontrolled exposure and plotted as a function of perpendicular distance from the tower.

Exhibit 49.7.1 is the resulting RFR study demonstrating that the peak exposure is 0.11% of the most restrictive permissible exposure threshold. Pursuant to OET Bulletin 65 concerning multiple-user transmitter sites only those licensees whose transmitters produce power density levels greater than 5.0% of the exposure limit are considered significant

¹ Terrain extraction is based upon a 3 arc second point spacing terrain database.

contributors to RFR. Since the proposed operation is within 5% of the most permissible exposure at any location 2 meters above the ground, it is not considered a significant contributor to RFR exposure. Thus, contributions to exposure from other RF sources in the vicinity of the proposed facility were not taken into account. The instant application is compliant with the FCC limits for human exposure to RF radiation and thus is excluded from further environmental processing.

A chain link fence shall encompass the proposed support structure. The applicant will cooperate with any other users of the tower by reducing the power to the antenna or if necessary completely cutting it off in order to protect maintenance workers on the tower.

DECLARATION OF ROBERT CARR

Robert Carr hereby states under penalty of perjury the following:

I am a consultant to Budd Broadcasting Co., Inc. One of my responsibilities has been to make sure that WFXU has never been off the air for a consecutive twelve month period. I hereby state that during the past license term the station has consistently operated so that it was not off the air for a consecutive twelve month period.
