Re: WLLY-FM, Palm Beach Gardens, Florida
Facility Identification No. 24230
Glades Media Company, LLP
File No. 20160601AAW

**Request for Increased Digital Power
Hybrid IBOC Digital Operation**

Dear Counsel:

This is in reference to the request filed June 1, 2016, on behalf of Glades Media Company, LLP (Glades), licensee of FM station WLLY-FM, Palm Beach Gardens, Florida.¹ Glades requests authority to operate station WLLY-FM with increased digital ERP of -10 dBc,² pursuant to the Media Bureau's *Order* adopted January 27, 2010, in MM Docket No. 99-325.³

Our review indicates that the notification requirements of the *Order* have been satisfied, and that the proposed operation complies with the contour non-overlap and other technical requirements of the *Order*.

Accordingly, the request IS HEREBY GRANTED. Station WLLY-FM may operate with increased digital ERP and transmitter power output (TPO), as follows:

Analog ERP:	6.0 kW (H&V) ⁴
Digital ERP:	0.60 kW (H&V) ⁵
Combined TPO:	5.0 kW.

¹ File No. BLH-20090403BRO. Station WLLY-FM is licensed for analog operation on channel 258A (99.5 MHz) with 6.0 kilowatts (kW) effective radiated power (ERP) and 100 meters antenna radiation center height above average terrain (HAAT).

² Decibels relative to analog carrier.

³ See *Digital Audio Broadcasting Systems And Their Impact on the Terrestrial Radio Broadcast Service*, Order, 25 FCC Red 1182 (2010) (*Order*).

⁴ All ERP and TPO values rounded in accordance with 47 C.F.R. § 73.212(a).

⁵ Licensee specified use of MP1 service mode and symmetric digital sideband power levels. Using the total digital sideband ERP values set forth in NRSC guideline "NRSC-G202, FM IBOC Total Digital Sideband Power for Various Configurations" (*NRSC-G202*) (September 2010) for MP1 service mode with symmetric digital sideband power levels, the maximum permissible total digital sideband ERP for station WLLY-FM is 0.60 kW. The licensee must adjust the station's total digital sideband ERP in accordance with NRSC-G202 if operating using a service mode other than MP1, i.e., MP2, MP3 or MP11 and symmetric digital sideband power levels.

Glades must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines; *See* Section 1.1310 of the Commission's Rules.⁶ It may be necessary to reduce the power of the digital signal or cease hybrid operation if interference complaints are received. This authority may be modified or cancelled by the Commission without notice or right to hearing. This authority attaches to, and runs concurrently with, the main station license. Glades must post a copy of this authority with the station license.

Sincerely,

A handwritten signature in blue ink, appearing to read "Susan N. Crawford". The signature is fluid and cursive, with a large initial "S" and "C".
