> Re: CC Licenses, LLC (CCL) WREC(AM), Memphis, Tennessee Facility Identification Number: 58396 Special Temporary Authority (STA) BESTA-20160603AAC

Dear Mr. Davis:

This is in reference to the request filed on June 3, 2016. CCL requests a fourth extension of the STA granted on April 24, 2014, to operate DA with parameters at variance and/or reduced power or 25% power ND due to required sampling system repairs.¹ In support of the request, CCL states that additional time is needed to complete all repairs in order to file an FCC Form 302 application containing a method of moment proof to update all operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for STA IS HEREBY GRANTED, and station WREC(AM) may continue to operate with 1.25 kW ND day and night, or with DA parameters at variance and/or reduced power while maintaining monitor points (MP) within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must use

¹ WREC(AM) is licensed for DA operation on 600 kHz with 5 kW (day and night).

whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. We anticipate that CCL will file an FCC Form 302 application in the upcoming months, along with one final request before the expiration date shown below to extend the STA (until a new license has been granted).

This authority expires on December 28, 2016.

Sincerely, Joseph Szczesny, Engineer Audio Division Media Bureau
