Re: KXEN(AM), St. Louis, Missouri
Facility Identification Number: 54739
BDJ Radio Enterprises, LLC (BRE)
Special Temporary Authorization (STA)
BESTA- 20160609AAX

Dear Mr. Kaufman:

This is in reference to the request filed on June 9, 2016. BRE requests a further extension of the STA granted on July 23, 2012, and then modified on May 23, 2014, to operate with temporary nighttime facilities at an alternate site due to sale of the nighttime array portion of the licensed site.¹ In support of the request, BRE states that additional time is required to prepare and file the required FCC Form 301 application to propose a permanent facility at a new site (due to delays caused by a severe illness).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and station KXEN(AM) may continue to operate during the day using the licensed 50 kW DA facilities and at night with the following temporary site facilities:

¹¹ KXEN(AM) is licensed for DA operation on 1010 kHz with 50 kW day and 0.5 kW night.

Geographic coordinates:	38° 38' 09" N, 90° 11' 45" W (NAD 1927)
Frequency:	1010 kHz
Operating hours:	Nighttime
Operating power:	0.125 kW nighttime
Antenna:	74.2 m vertical wire supported on face of a self-supporting tower located at the KDNL(TV) studios
Radiator height:	90°
ASRN:	1003524

It will be necessary to further reduce power or cease operation if complaints of interference are received. BRE must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. Based upon all information submitted to date, BRE must file an acceptable FCC Form 301 application to show that substantial progress has been made to propose a permanent day and night facility at a new site (since it plans to sell the licensed daytime transmitter site).

This authority expires on **January 8, 2016**.

Sincerely,

A handwritten signature in blue ink, consisting of a large loop followed by a series of smaller, connected loops and a final horizontal stroke.
