Re:

El Camino Communications, LLC KKNS(AM), Corrales, New Mexico Facility Identification Number: 7050

BP-20151230APJ

Dear Mr. Camino:

This is in reference to the above-captioned application for KKNS(AM), Corrales, New Mexico to relocated the transmitter site.

A preliminary review of the application reveals that the proposed antenna efficiency of 300.3 mV/m is incorrectly calculated. Based upon Figure 8 of Section 73.190 of the Commission's rules, the correct antenna efficiency is 283.98 mV/m/kw at 1 kilometer for the proposed 51.82 meters (81.5°) tower and the ground system of 120 radials 45.7 meters in length. In addition, our records show a "red light" against this application. This generally means some sort of fee issue that must be resolved before any further authorizations can be granted. Please contact Roland Helvajian in the Fees section of the FCC for assistance with this matter: roland.helvajian@fcc.gov, (202)-418-0444.

Further action on the subject application will be withheld for thirty days (30) from the date of this letter in order to provide an opportunity to file a curative electronic amendment. Failure to respond or file an amendment within this time period will result in the dismissal of the application pursuant to Section 73.3568 of the Rules.

Sincerely,

Son Nguyen,

Supervisory Engineer

Audio Division

Media Bureau
