In re: W280EL, Yates, MI
BPFT-20160128BEN
Facility ID No. 156357

Dear Applicant:

This letter refers to the above-captioned modification application.

Our study of the application reveals that it is in violation of Section 74.1201(g) of the Commission's Rules. Section 74.1201(g) states that the coverage contour of an FM translator rebroadcasting an AM radio broadcast station must be contained within the lesser of the 2 mV/m daytime contour of the AM station and a 25-mile (40 km) radius centered at the AM transmitter site. The proposed coverage contour (60 dBu) of the translator is not contained within the 25-mile (40 km) radius centered at WCXI(AM)'s construction permit transmitter site. See next page. This was not addressed in the application.

In light of the above, the application BPFT-20160128BEN is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
Audio Division
