In re: K246CL, Apple Valley, CA  
BPFT-20160729AAX  
Facility ID No. 156541

Dear Applicant:

This refers to the above-captioned minor change application for K246CL.

An engineering study reveals the application is in violation of the interference protection requirements of 47 C.F.R. Section 74.1204. Specifically, the proposed 40 dBu interfering contour overlaps the 60 dBu protected contour of the authorized facilities of co-channel translator station K300DC, Barstow, California (BPFT-20160728AHP). The application does not recognize this defect. Accordingly, we dismiss the application as unacceptable for filing.

In light of the above, application BPFT-20160729AAX is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

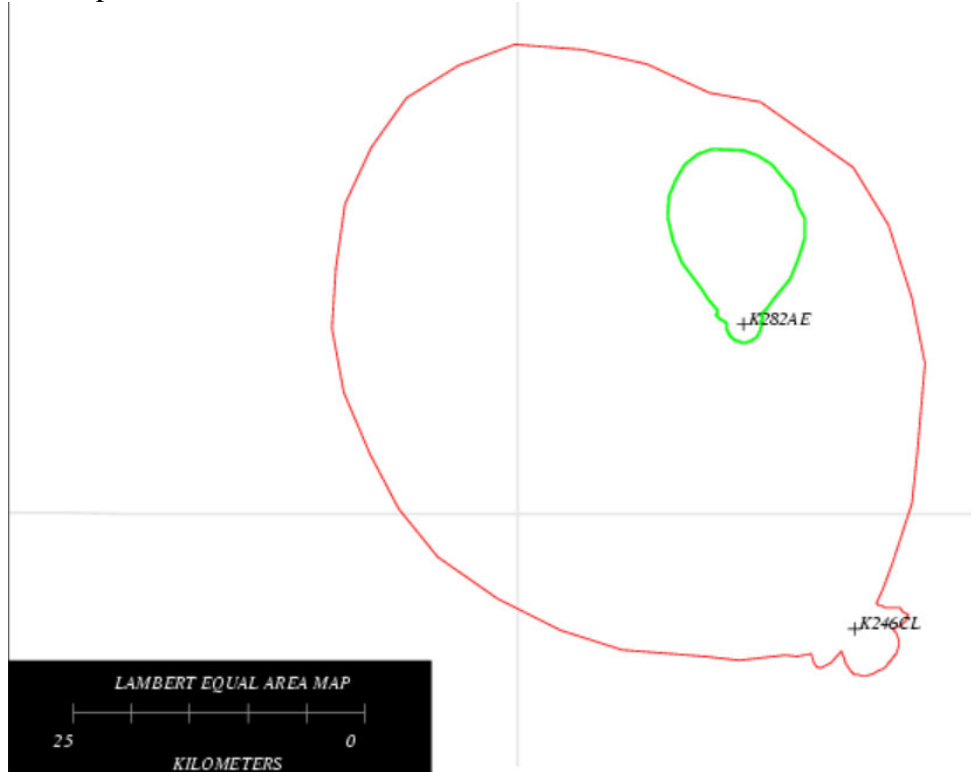

Sincerely,

James D. Bradshaw  
Deputy Chief  
Audio Division  
Media Bureau
