In re: INTERFERENCE COMPLAINT
W275BD, Greenfield, IN
BLFT-20151120AGX
Facility ID # 143744

Dear Licensee:

This refers to interference complaints filed by Reising Radio Partners, Inc. All complaints must be resolved. Listener complaints can be filed at any time. The complaints allege that W275BD is interfering with the reception of WXCH(FM), Columbus, Indiana.

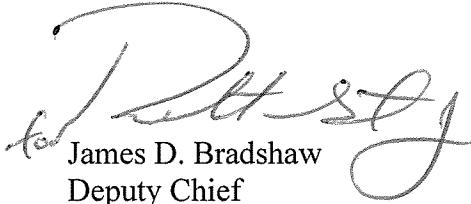

Pursuant to 47 C.F.R. § 74.1203, W275BD is required to eliminate any actual interference it causes. Therefore, it is necessary for W275BD to submit a detailed report on the attached complaint even if the complainant might have been addressed in a previous proceeding. For the complaint, the report must include: (1) the name and address of the complainant; (2) specific devices receiving the interference (i.e. type of device, manufacturer's name, model number, and serial number); and (3) any assistance provided by W275BD for each device allegedly receiving the interference and whether such interference persists. Each of the complaints must be addressed individually.

The Commission's Rules regarding FM translators restrict FM translator stations to operate strictly on a secondary basis and limit their service. Section 74.1203(a)(3) states that an FM translator station will not be permitted to continue to operate if it causes any actual radio signal interference to the direct reception by the public of the off-the-air signals of any authorized broadcast station.¹ Actual interference is based on listener complaints indicating that the signal they regularly receive is being impaired by the signal radiated by the FM translator station. Section 74.1203(b) states that if the

¹ An FM translator station creating actual radio signal interference to any authorized broadcast station is obligated to eliminate the interference, regardless of the location where the impaired signal reception occurs.

interference cannot be properly eliminated by the application of suitable techniques, the operation of the offending FM translator station shall be suspended and shall not be resumed until the interference has been eliminated.

Within thirty days of this letter, W275BD must take appropriate actions required by the provisions of 47 C.F.R. § 74.1203 to resolve all complaints of interference to fulfill its obligations. Further action on this complaint will be withheld for a period of thirty days from the date of this letter to provide W275BD an opportunity to respond. Failure to correct all complaints within this time may require W275BD to suspend operation pursuant to 47 C.F.R. §§ 74.1203(e) and 74.1232(h).

A handwritten signature in black ink, appearing to read "J. Bradshaw", is positioned above the printed name and title.

Hello Mike,

Yes I WANT MY MOJO BACK! If someone wants to meet me, so I can show them where I get interference I will. They can contact me on my phone at 812-371-8058. I get interference in Shelbyville and on I65 just south of Greenwood. I used to have no problem getting the signal in these areas. Thank you.

Reising Radio Partners Inc Mail - RE: MOJO reception

1-24/3

Hi Jeff,

I am following up on the interference you are having trying to listen to MOJO 102.9. We are still trying to help you. I certainly appreciate your time with this matter. You were one of the first people to correspond with us about the reception problem.

Are you still wanting to be able to receive the MOJO signal? If you are, would you be willing to meet an engineer from Radio One at a designated location to see if they can fix the reception problem? They could meet you wherever you are experiencing the problem. If you are willing to meet, how should they contact you ... email or phone?

Please let me know at your earliest convenience...if you are willing to meet their engineer, where you want to meet, and whether they should call you or email you.

Thank you!

Mike King

Subject: MOJO interference

Hi Don,

I am following up on the interference you are having trying to listen to MOJO 102.9. We are still trying to help you. I certainly appreciate your time with this matter. I understand that you filled out the 8-page form that Radio One sent to you a few weeks back. This is what they have to say about the form you filled-out ...

"Mr. Hart's response did not request interference remediation."

They also said ...

"In Mr. Hart's response, he did not provide the information requested in the FCC Letter regarding the manufacturer and model name or number of his reception devices, the serial number of the devices, nor the location at which the devices experience interference."

If you are still interested in hearing MOJO 102.9 (WXCH) once again, would you be willing to meet an engineer from Radio One at a designated location to see if they can fix the reception problem? They could meet you where you are experiencing the problem. If you are willing to meet, how should they contact you ... email or phone?

Please let me know at your earliest convenience...if you are willing to meet their engineer, where you want to meet, and whether they should call you or email you.

Thank you!

Your message to MOJO 102.9! :

I live on the South side of Indianapolis and enjoy listening to your station. Lately, however, I've not been able to pull in your signal due to a Spanish station overriding your frequency. I really miss listening to MOJO and hope this condition can be corrected soon.

Thanks Mike for following up on my concerns. In answer to you're questions:

1. I am still interested in listening to MOJO radio.
2. I would be interested in meeting with an engineer from Radio One in an attempt to solve the station interference problem.
3. I would prefer to be contacted by email at ronmote@yahoo.com by Radio One personnel.

Thanks for your follow up; I look forward to resume listening to MOJO again soon!

Best regards,

Ron Mote

Hi Ron,

I am following up on a MOJO Contact Form that you filled out from the MOJO 102.9 website

1/25/2016

Reising Radio Partners Inc Mail - Re: MOJO reception

1-26/3

on December 15, 2015. We are still trying to help get MOJO back for you. I really appreciate you taking the time to write in. I noticed from the form that you live on the south side of Indianapolis, and lately you have not been able to pull-in the signal because of another station overriding the MOJO frequency, and that you hope the condition is corrected soon.

In order to expedite the process of getting rid of the interference, I have some questions to ask you. Are you still interested in being able to hear MOJO? Would you be willing to meet an engineer from Radio One (the company whose station is interfering) so that they could attempt to fix your reception problem on your radio or radios? If you are willing to meet with an engineer, how should Radio One contact you to set-up that meeting...email or phone?

Again, if you still want to be able to listen to WXCH (MOJO 102.9) again, please answer those three questions from the previous paragraph, and shoot me a return email at your earliest convenience.

Thank you very much,

Mike King

Mike,

Thank you for following up with me. I met with Mr Takash and a sales manager on 1/9/16 at a gas station at County Line Rd and Emerson Ave in Greenwood. They were both very nice and polite. They asked me about my reception issues and confirmed that I was not receiving the MOJO station. He then was able to do something with his cell phone that allowed the MOJO station to come in clearly. During the conversation they mentioned that sometimes they offer people a new car radio or a satellite radio subscription. I wouldn't say they explicitly offered this to me but more that it was an option. I merely acknowledged their statement. (I am not interested in a new radio or satellite subscription.) As I headed south to drive home, therefore driving closer to Columbus, I lost the MOJO signal and have not had it since then. However, I still desire to receive the MOJO station.

Regards,

Aimee

Subject: Mojo reception

Hi Aimee,

I am following up on the interference you are having trying to listen to MOJO 102.9. We are still trying to help you. I certainly appreciate your time with this matter. I understand an engineer (John Takach) from Radio One came to visit you about the reception problem. This is what John Takach has told us happened on that visit...

"Ms. Reisert was visited on the subject of interference remediation on January 8, 2016. At the conclusion of the visit, Ms. Reisert indicated to Mr. Takach that she did not wish anything further to be done with respect to interference remediation."

I just wanted to make sure you were completely satisfied with the outcome. Could you please email me back and verify your position.

Thank you,

Your message to MOJO 102.9! :

I drive a lot from Columbus to Indy. I used to be able to receive your signal all the way to the Indy airport. Something has changed, because now I lose the signal not long after passing Whiteland. It seems like there is another signal that is interfering somehow. If you have any control over this, please act to restore your station's footprint. I miss my Mojo!

Hi Kaylyn,

I am following up on the interference you are having trying to listen to MOJO 102.9. We are still trying to help you. I certainly appreciate your time with this matter. I saw where you sent in a Reception Problem Form to MOJO on December 3, 2015.

I also saw that on January 5, 2016 that you replied to Radio One about the form they sent you. You sent an email to Mr. Garziglia (their attorney) and offered a couple of days and times that you could meet with them so they could try to resolve your reception problem. They declined to meet with you.

If you are still interested in hearing MOJO 102.9 (WXCH) once again, would you still be willing to meet an engineer from Radio One at a designated location to see if they can fix the reception problem? I apologize for this inconvenience, but I want to give them another chance to fix the interference. They could meet you where you are experiencing the problem.

Please respond to this email and let me know at your earliest convenience: If you are still wanting to hear MOJO 102.9 ... if you are willing to meet their engineer ... where you want to meet ... and whether they should call you or email you to set up the appointment.

Thank you!

Mike,

I enjoy listening to MOJO!!! They play all of my favorite music and it is very disappointing when I have to listen to another station. I would be glad to meet with an engineer if that will take care of my listening pleasure and keep my MOJO!! My email address is slsimzz@comcast.net or home phone number is (317) 535-4255, I look forward to meeting with someone if that will help with the reception for me and other people in the area.

Sheri

I get little reception at home and I use to get it in the car and at work but a black radio station is playing now so I am not sure if a new radio station has a stronger signal than you and that is why I am picking up that station instead of Mojo. But there are days I get Mojo clearly. It seems that weather has a factor. If you could tell me what I need to buy to get a better signal please let me know. Thanks.... FYI: I have emailed you in the past.
