Re: Scripps Broadcasting Holdings LLC
WTMJ(AM), Milwaukee, Wisconsin
Facility Identification Number: 74096
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed November 3, 2016, on behalf of Scripps Broadcasting Holdings LLC (“Scripps”). Scripps requests special temporary authority (“STA”) to operate station WTMJ(AM) with an alternate antenna system.¹ In support of its request, Scripps states that the base insulators under all six of the WTMJ(AM) towers are damaged, as are several of the concrete base piers for these towers. Therefore, in order to facilitate the replacement of all of the tower base insulators and several of the tower base piers, WTMJ(AM) requests STA to operate non-directionally using one of its directional towers.

Specifically, WTMJ(AM) requests STA to operate non-directionally from tower #2 at 25% of the licensed directional tower. When work is being done on tower #2, then non-directional operation is proposed from tower #1.

Section 73.1680 of the Commission’s rules provide for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(1) states that AM stations may use a horizontal or vertical wire or a nondirectional vertical element of a directional antenna as an emergency antenna. AM stations using an emergency nondirectional antenna or a horizontal or vertical wire pursuant to this section, in lieu of authorized directional facilities, shall operate with power reduced to 25% or less of the nominal licensed power, or, a higher power, not exceeding licensed power, while insuring that the radiated field strength does not exceed that authorized in any given azimuth for the corresponding hours of directional operation.

Accordingly, the request for STA IS HEREBY GRANTED. Station WTMJ(AM) may operate non-directionally during daytime hours with a power of 12.5 kilowatts and during nighttime hours with a

¹ WTMJ(AM) is licensed for operation on 620 kHz with a daytime power of 50 kilowatts and a nighttime power of 10 kilowatts, employing different directional antenna patterns (DA2-U).

power of 2.5 kilowatts from either towers #1 or #2 of the directional array. It will be necessary to further reduce or cease operation if complaints of interference are received. Scripps must notify the Commission when licensed operation is restored.² Scripps must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 3, 2017**.

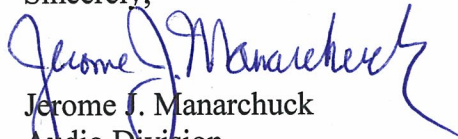

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
