In re: Husson College
WHSN (FM), Bangor, Maine
Facility Identification Number: 28151
Application for License
BLED-20061117ABN

Dear Mr. McLaughlin:

This letter refers to the captioned application, filed November 17, 2006, and amended on January 8, 2007, on behalf of Husson College ("HC") for license to cover modified facilities for station WHSN(FM), Bangor, Maine, as authorized by Construction Permit BPED-20050407GYB ("permit"). The January 8, 2007, amendment supplied the results of field strength measurements taken on AM Station WZON, at the request of the staff and as required by Special Operating Condition #2 of the permit.

Our review of the AM field strength measurements indicates that they are not complete and acceptable for filing, and we are unable to make a determination that the "before" and "after" measurements were taken under the same environmental conditions. In particular, it will be necessary to provide the date and time of each measurement, as well as the manufacturer, model number, serial number and date of last calibration of the field strength meter employed for the measurements. Also, the December, 2006, measurements are referenced to a 2002 partial proof of performance which is not included in our files. In order to provide a basis for our analysis, it also will be necessary to provide the foregoing information for the 2002 measurements, as well as the signed affidavit of the engineer who performed the measurements.

Further action on the subject application will be withheld for a period of 30 days in order to afford an opportunity to reply. Failure to respond within the 30 day time period will result in dismissal of the application pursuant to Section 73.3568(a)(1).

Sincerely,

Charles N. Miller, Engineer
