Re: Tichenor License Corporation (TLC)
KAMA(AM), El Paso, TX
Facility Identification Number: 36948
Special Temporary Authority (STA)
BESTA-20161006ACL

Dear Mr. Wood:

This is in reference to the request filed on October 6, 2016. TLC requests a further extension of the STA granted on April 11, 2013, to continue operating with parameters at variance due to the replacement of one tower.¹ In support of the request, TLC states that it plans to file the required FCC Form 302 application in the upcoming months to update all operating parameters due to all work done over the past three years.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and TLC may continue to operate with parameters at variance and/or reduced power while maintaining monitor

¹ KAMA(AM) is licensed for DA operation on 750 kHz with a 10 kW day and 1 kW night.

points within currently licensed tolerances. It will be necessary to further reduce power or cease operation if complaints of interference are received. TLC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. TLC must file a final STA request if the 302 application has not been granted by the expiration date shown below.

This authority expires on **May 14, 2017**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Szczesny', is written over the typed name.

Joseph Szczesny, Engineer
