Re: KYDZ (AM), Bellevue, Nebraska  
Facility Identification Number: 43237  
Waitt Omaha, LLC  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed June 8, 2007, on behalf of Waitt Omaha, LLC ("Waitt"). Special temporary authority ("STA") is requested to operate Station KYDZ with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits.<sup>1</sup> In support of the request, Waitt states that it recently discovered that some of the station's monitor points were out of tolerance, that it has reduced power to maintain the monitor points within tolerance. Waitt further states that its engineers are working on the problem.

Accordingly, the request for STA IS HEREBY GRANTED. Station KYDZ may continue to operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. Waitt must notify the Commission when licensed operation is restored.<sup>2</sup> Waitt must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 20, 2007**.

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make

---

<sup>1</sup> KYDZ is licensed for operation on 1180 kHz with 25 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

<sup>2</sup> *See* 47 CFR §§ 73.45(c), 73.51, 73.54, 73.61(b).

operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Charles N. Miller, Engineer
