Update on Tower Registration

Dear Ms. Dortch:

This letter is filed at the request of Susan Crawford in the Audio Division per her letter dated January 11, 2016 regarding the pending application of our client West Jacksonville Baptist Church, Inc. ("WJBC") for its station WJGM (FM) in Baldwin, Florida. Ms. Crawford requested an update no later than 90 days from the date of her letter regarding the efforts to register the proposed antenna structure. WJBC provided that update on April 5, 2016 and requested that the application be held in abeyance until June 9, 2016. A further update was provided on June 9, 2016, and August 8, 2016. The August 8, 2016 update promised a further update by October 8, 2016, if necessary. This letter provides the promised further update on WJBC's progress with tower registration.

Favorable responses have now been received from all six notified Indian tribes, which completed all of then outstanding action items for the site. However, in the past two weeks, WJBC's consultant discovered that the tower location and at least one of the guy anchors is located on the edge of a 100-year floodplain, triggering the need for a NEPA Environmental Assessment (EA). The EA has been prepared. WJBC filed to register the tower with the FCC on October 4, 2016 (File No. A1050693), including the EA with the submission. WJBC must now await a Finding of No Significant Impact (FONSI) and tower registration, which is estimated to take another 50-60 days. When received, WJBC will amend the pending WJGM application with the tower registration number. Copies of any of the above submissions will be provided upon request.

WJBC is continuing to work diligently to resolve this matter in accordance with FCC requirements, and respectfully requests that its application BPH-20151216AEH be held in abeyance through **December 31, 2016** to allow it to complete the necessary regulatory steps for the tower.

If you have any questions about this request, please do not hesitate to contact me.

Kindest regards,

Joseph C. Chautin, III

Encl.
