Re: KYLV(FM), Oklahoma City, Oklahoma
Facility Identification Number: 50169
Educational Media Foundation
Special Temporary Authorization

Dear Counsel:

This is in reference to counsel's letter dated July 2, 2007, filed on behalf of Educational Media Foundation ("EMF"). EMF requests modification of the special temporary authority ("STA") granted on June 21, 2007, to operate Station KYLV with temporary facilities.¹ In support of the request, EMF states that, in order to maintain service pending installation of a new antenna, it has removed the parasitic elements from the misaligned directional antenna and is operating omnidirectionally. EMF requests a corresponding modification of the STA operating parameters.

Counsel's letter will be considered as a Petition for Reconsideration of the June 21, 2007, STA grant. On reconsideration, we find that the Public Interest would be served by grant of the requested modification.

Accordingly, the request for modification of STA IS HEREBY GRANTED. Station KYLV may operate from its licensed site with the following facilities:

Channel	205 (88.9 MHz)
Effective radiated power:	4.4 kilowatts
Transmitter output power:	1.85 kilowatts
Antenna height:	
above ground:	195 meters
above mean sea level:	555 meters
Above average terrain:	206 meters

EMF must notify the Commission when licensed operation is restored. EMF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation

¹ KYLV is licensed for operation on Channel 205C3 (88.9 MHz) with effective radiated power ("ERP") of 4.4 kilowatts (H&V) and antenna height above average terrain of 206 meters. Construction Permit BPED-20040210AAQ authorizes an upgrade to Class C3, the installation of a directional antenna at the currently licensed site and elevation and an increase in the maximum ERP to 39 kilowatts. Application BLED-20070604AAC, for license to cover the permit, is on file with the Commission.

in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **October 11, 2007**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Charles N. Miller, Engineer
