Re: Tyler Media LLC (TML)
KOKC (AM), Oklahoma City, OK
Facility Identification Number: 73981
Special Temporary Authority (STA)
BESTA-20161201ACT

Dear Mr. Tyler:

This is in reference to the request filed on December 1, 2016. TML requests an extension of the STA granted on January 17, 2012, and modified to operate with an ND antenna due to destruction of the antenna system last year.¹ In support of the request, TML states that it plans to submit the required FCC Form 301 application to propose a new permanent facility after final action has been taken on the proposed rules mentioned in MB Docket 13-249.²

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KOKC is licensed for 50 kW operation on 1520 kHz with a daytime ND antenna, and a nighttime DA antenna.

² See *Revitalization of the AM Radio Service*, First Report and Order, Further Notice of Proposed Rule Making, and Notice of Inquiry, FCC 15-142 (rel. Oct. 23, 2015).

Accordingly, the request for extension of STA IS HEREBY GRANTED, and TML may continue to operate with the following facilities:

Geographic coordinates	35° 20' 01" N, 97° 30' 18" W (NAD 1927)
Frequency	1520 KHz
Hours of operation	Unlimited
Operating power	10 kW (Unlimited)
Antenna type	Existing tower (constructed in 2015 for this STA)
Overall tower ht.	59 m
Radiator Ht.	57.9 m
Antenna efficiency	316 mV/m/km/KW

It will be necessary to further reduce power or cease operation if complaints of interference are received. TML must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR 1.1310. TML must file the required 301 application after final action on MB Docket 13-249 has been taken, or take other steps to show that substantial progress has been made (such as rebuilding the facility as shown on BZ-20021113AAX).

This authority expires on **June 29, 2017**.

Sincerely,

Joseph Szczesny, Engineer
Audio Division
