Dear Mr. Davis:

This is in reference to the request filed on December 13, 2016. CCL requests a further extension of the STA granted on June 29, 2006, to operate Station WSYR with parameters at variance pending the filing and grant of the required FCC Form 302 application to update all operating parameters.¹ In support of the request, CCL states that the required proof has been completed and it is now preparing to file the 302 application.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED and CCL may continue to operate with DA parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must use whatever means are
