Re: KZZL-FM, Pullman, Washington
Inland Northwest Broadcasting, LLC
Facility ID No. 26412
File No. BMLH-20020920AAD

Dear Mr. Prasil:

This letter hereby notifies Inland Northwest Broadcasting, LLC (Inland), licensee of commercial FM broadcast station KZZL-FM, Pullman, Washington, of the modification of KZZL-FM license BMLH-20020920AAD¹ to specify operation on channel 258C1.

On October 4, 2016, Anderson Radio Broadcasting, Inc. (ARBI), licensee of FM broadcast station KZJZ(FM), St. Regis, Montana,² amended its pending minor change application BPH-20160711AAA (Application) requesting modification of the licensed KZJZ(FM) facilities.³ In this amendment, ARBI proposed the KZZL-FM's license and assignment be modified to specify operation on channel 258C1 in lieu of channel 258C, at Pullman, Washington.

¹ File No. BMLH-20020920AAD. KZZL-FM is currently licensed to operate on channel 258C (99.5 megahertz (MHz)) at Pullman, Washington, using a nondirectional, circularly polarized antenna, 81 kilowatts (kW) maximum effective radiated power (ERP), and 323 meters antenna radiation center height above average terrain (HAAT), at a transmitter site described by geographic coordinates 46° 40' 52" North Latitude, 116° 58' 16" West Longitude, referenced to 1927 North American Datum (NAD 27). Effective July 8, 1998, by action in MM Docket No. 97-246, channel 258C was assigned to Pullman, Washington, and the KZZL-FM license was modified to specify operation on channel 258C, contingent upon the KZZL-FM licensee filing a minor change application for Class C facilities. This application was never filed, and KZZL-FM has continued operating its previously licensed Channel 258C1 facilities since the license modification.

² File No. BLH-20091204ADQ. KZJZ(FM) is currently licensed to operate on channel 256C2 (99.1 MHz) at St. Regis, Montana, using a nondirectional, circularly polarized antenna, 0.93 kW ERP, and 867 meters antenna radiation center height HAAT, at a transmitter site described by geographic coordinates 47° 22' 20" North Latitude, 114° 51' 28" West Longitude, referenced to NAD 27.

³ ARBI proposes to operate KZJZ(FM) on channel 257C2 (99.3 MHz) at St. Regis, Montana, using a nondirectional, horizontally polarized antenna, 14.6 kW ERP, and 277 meters antenna radiation center HAAT, at a transmitter site described by geographic coordinates 47° 01' 45" North Latitude, 114° 41' 18" West Longitude, referenced to NAD 27.

Section 316(a) of the Communications Act of 1934, as amended,⁴ permits the Commission to modify a license or construction permit if such action is in the public interest. The Act requires that we notify the affected station of the proposed action, state the grounds and reason for the proposed action, and afford the licensee/permittee of the affected station at least 30 days to respond. Accordingly, by staff letter November 23, 2016, Inland was directed to show cause why the KZZL-FM license should not be modified to specify operation on channel 258C1 in lieu of channel 258C. Inland responded to the Commission's letter on December 21, 2016, stating that it does not object to the proposed modification of the KZZL-FM assignment and license.

Accordingly, pursuant to the authority found in 47 U.S.C. Sections 4(i), 5(c)(1), 303(g) and (r) and 307(b) and 47 CFR Sections 0.61, 0.204(b) and 0.283, IT IS ORDERED that effective the date of this letter, the FM assignment IS MODIFIED as follows:

<u>Community</u>	<u>Channel No.</u>
Pullman, Washington	Add 258C1, Delete 258C. ⁵

IT IS FURTHER ORDERED that pursuant to Section 316(a), KZZL-FM license BMLH-20020920AAD IS MODIFIED to specify operation on channel 258C1 in lieu of channel 258C.⁶

Sincerely,

Susan N. Crawford
Senior Engineer
Audio Division
Media Bureau

⁴ 47 U.S.C. § 316(a) (Section 316(a)).

⁵ The KZZL-FM assignment site is located at geographic coordinates 46° 40' 49" North Latitude, 116° 53' 18" West Longitude, referenced to NAD 27.

⁶ The license can be modified to specify operation on channel 258C1 at the station's currently licensed transmitter site without any physical changes to the existing KZZL-FM transmitting facilities.
