Re: Urban Radio Licenses, LLC (URL)
WVNA(AM), Tuscumbia, AL
Facility Identification Number: 19457
Special Temporary Authority (STA)
BESTA- 20170106ACB

Dear Mr. Wagner:

This is in reference to the request filed on January 6, 2017. URL requests further extension of the STA granted on August 9, 2010, to continue operating to continue operating from an alternate site pending further action on the WVNA and WLAY applications (BP-20170106ABJ and BP-20170106ABO).¹ In support of the request, URL stated that it no longer plans to sell both stations, and instead plans to build and license the new ND facilities proposed in the pending applications.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WVNA(AM) is licensed for operation on 1590 kHz with 5 kW ND day and 1 kW DA night, and BP-20170106ABJ proposed a new ND facility with WLAY at a different site.

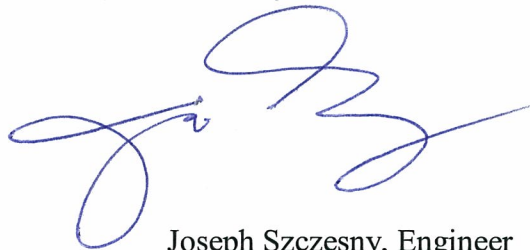

Accordingly, the request for extension of STA is GRANTED, and URL may continue to operate with the following facilities:

| | |
|------------------------|---|
| Geographic coordinates | 34° 40' 27" N, 87° 42' 48" W (NAD 1927) |
| Frequency | 1590 KHz |
| Hours of operation | Daytime only |
| Operating power | Not to exceed 2 kW |
| Antenna type | Existing FM tower with vertical wire feed |
| Radiator height | 87.8° (46 meters) |
| Antenna efficiency | 304.2 mV/m/kW/km |
| Overall height | 46 meters |

It will be necessary to further reduce power or cease operation if complaints of interference are received. URL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. We estimate that both 301 applications should be granted before the expiration date shown below if no problems are identified during the review process.

This authority expires on **July 25, 2017**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Szczesny', with a stylized flourish extending to the right.

Joseph Szczesny, Engineer
