(TMMO)
WOBM(AM), Lakewood Township, NJ
Facility Identification Number: 49295
Special Temporary Authority (STA)
BESTA-20170112AAL

Dear Mr. Price:

This is in reference to the request filed on January 12, 2017. TMMO requests a further extension of the STA granted on December 2, 2014, to continue to operate with DA parameters at variance due to repairs and modifications.¹ In support of its request, TMMO states that although additional steps were taken during the past six months, more time is needed to complete all work and then file the required FCC Form 302 application to update all operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and TMMO

¹ WOBM(AM) is licensed for DA operation on 1160 kHz with 5 kW day and 8.9 kW night.

may continue to operate with DA parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. TMMO must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. We anticipate that TMMO will file the application before the expiration date shown below.

This authority expires on **July 31, 2017**.

Sincerely,
