Re: KFI(AM), Los Angeles, California
Facility Identification Number: 34425
Capstar TX Limited Partnership
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed September 27, 2006, on behalf of Capstar TX Limited Partnership (Capstar). Capstar requests further extension of the special temporary authority (STA) granted on February 11, 2005, for continued operation of Station KFI with its licensed auxiliary facilities.¹ In support of the request, Capstar states that, following the collapse of its licensed tower on December 19, 2004, the station has been operating with its auxiliary facilities. Capstar states that it continues to seek the necessary FAA and local approvals for replacement of the licensed tower.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

¹ KFI is licensed for operation on 640 kHz with 50 kilowatts, unlimited hours, employing a nondirectional antenna (ND-1-U). Auxiliary antenna BXL-20000216AAQ is licensed for operation with 25 kilowatts, unlimited hours.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KFI may continue to operate with reduced power not to exceed 25 kilowatts, employing licensed auxiliary antenna BXL-20000216AAQ. Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. Capstar must notify the Commission when licensed operation is restored.

This authority expires on **February 13, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.
