Re: People's Wireless, Inc.  
KCKK (AM), Littleton, Colorado  
Facility Identification Number: 52249  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed February 27, 2007, on behalf of People's Wireless, Inc. ("PWI"). PWI requests extension of the special temporary authority ("STA") granted August 28, 2006, to operate Station KCKK (formerly KYOL) pursuant to Section 73.1615.<sup>1</sup> In support of the request, PWI states that it continues the process of upgrading the station's facilities as authorized by Construction Permit BP-20041019ACH.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

---

<sup>1</sup> KCKK is licensed for operation on 1510 kHz with 9.5 kilowatts daytime and 19 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U). Construction Permit BP-20041019ACH authorizes relocation of the transmitter, an increase in power to 10 kilowatts daytime and 25 kilowatts nighttime, and changes to the daytime and nighttime directional patterns.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KCKK may continue to operate pursuant to Section 73.1615 and the terms and conditions of Construction Permit BP-2004 1 019ACH. In particular, the following modes of operation are authorized:

- 1) During daytime hours, with a nondirectional antenna and reduced power not to exceed 6.25 kilowatts, for the purpose of taking nondirectional proof of performance measurements. Reduce power to 2.38 kilowatts or less when proof measurements are not being taken.
- 2) During daytime hours, with the substantially adjusted daytime and nighttime directional patterns and powers authorized by the permit, only as necessary for taking directional proof of performance measurements. Reduce power to 9.5 kilowatts or less when proof measurements are not being taken.
- 3) During nighttime hours, with a nondirectional antenna and operating power not to exceed 4.75 kilowatts, only as necessary to facilitate the construction work.
- 4) During nighttime hours, with the substantially adjusted nighttime directional facilities authorized by the permit and nominal power not to exceed 19 kilowatts.

It will be necessary to further reduce power or cease operation if complaints of interference are received. PWI must notify the Commission when licensed operation is restored.<sup>2</sup> PWI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **December 14, 2007**.

Sincerely,

Charles N. Miller, Engineer  
Audio Division  
Media Bureau

cc: People's Wireless, Inc.
