Re: Radio License Holding CBC, LLC
WISW(AM), Columbia, SC
Facility Identification Number: 54793
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed May 30, 2017, on behalf of Radio License Holding CBC, LLC ("RLH"). RLH requests special temporary authority ("STA") to operate WISW(AM) non-directionally with reduced power during nighttime hours.¹

In support of the request, RLH states that towers #1 and #3 of the nighttime array have structural issues and will be demolished and replaced. Therefore, the station requests non-directional operation at night from tower #2 (ASRN:1046111) of the array during the process. Nighttime operation with a reduced power of 0.625 kilowatt is proposed. There are no proposed changes to the daytime facility.

Section 73.1680 of the Commission's rules provide for operation with emergency antenna facilities, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(1) states that AM stations may use a horizontal or vertical wire or a nondirectional vertical element of a directional antenna as an emergency antenna. AM stations using an emergency nondirectional antenna or a horizontal or vertical wire pursuant to this section, in lieu or authorized directional facilities, shall operate with power reduced to 25% or less of the nominal licensed power, or, a higher power, not exceeding licensed power, while insuring that the radiated field strength does not exceed that authorized in any given azimuth for the corresponding hours of directional operation.

¹ WISW(AM) is licensed for operation on 1320 kHz with a daytime power of 5 kilowatts and a nighttime power of 2.5 kilowatts, employing a directional antenna pattern at night (DAN-U).

Accordingly, the request for STA IS HEREBY GRANTED. Station WISW(AM) may operate non-directionally during nighttime hours with a reduced power of 0.625 kilowatt. It will be necessary to further reduce or cease operation if complaints of interference are received. RLH must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **December 16, 2017**.

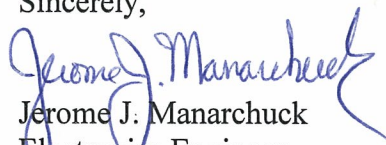

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
