Re: Alexander Broadcasting, Inc.
WRCR(AM), Ramapo, NY
Facility Identification Number: 64556
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed July 25, 2016, on behalf of Alexander Broadcasting, Inc. ("ABI"). ABI requests special temporary authority ("STA") to operate station WRCR(AM) from an alternate site location.¹ In support of the request, ABI states that its transmitter lease has been terminated and it is subject to an eviction order. Therefore, the station needs to relocate temporarily to an alternate site location.

Specifically, WRCR(AM) proposes to operate from a site located 7.6 kilometers (4.7 miles) from the licensed WRCR(AM) site. Operation is proposed from an existing registered tower (ASRN: 105536). The station proposes to operate non-directionally at 25% of the licensed daytime and nighttime power levels. The proposed tower is a grounded, tapered, self-supporting tower. The proposed antenna system will consist of the tower and a single cable located in the middle of the tower and running up the center to a point 160 feet above ground where a horizontal wire will connect to each tower leg.

STA requests which involve a change in transmitter site must include four critical elements: (1) Loss of the licensed site must be beyond the licensee's control; (2) STA facilities must continue to provide service to the licensed community; (3) STA facilities must maintain, as closely as practicable, the licensed service area² without extending it; (4) STA facilities cannot involve the construction of towers intended for permanent use by the station requesting the STA.

¹ WRCR(AM) is licensed for operation on 1700 kHz with a daytime power of 10 kilowatts and a nighttime power of 1 kilowatt, employing a non-directional antenna pattern (ND2-U).

² For AM - 0.5 mV/m contour; for FM - 1.0 mV/m contour.

Accordingly, the request for STA is GRANTED. Station WRCR(AM) may operate with the following facilities:

| | |
|-------------------------------|--|
| Geographic coordinates | 41° 06' 46" N, 74° 05' 35" W (NAD 1927) |
| Frequency | 1700 KHz |
| Hours of operation | Daytime and Nighttime |
| Operating power | 2.5 kilowatts (daytime), 0.25 kilowatt (nighttime) |
| Antenna type | Existing 99 meter (325 foot) tower |
| Electrical height of radiator | 202.2° |
| Antenna efficiency | 345.3 mV/m/kW at 1 kilometer |

It will be necessary to further reduce power or cease operation if complaints of interference are received. WRCR(AM) must notify the Commission when licensed operation is restored. WRCR(AM) must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 12, 2018**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or

- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
