Re: WNSI-FM, Atmore, Alabama
Facility Identification Number: 51140
Southern Media Communications, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed May 11, 2007, on behalf of Southern Media Communications, Inc. ("SMC"). SMC requests further extension of the special temporary authority ("STA") granted on February 17, 2005, to operate Station WNSI-FM from a site other than the licensed site.¹ In support of the request, SMC states that the licensed WNSI-FM transmission facilities sustained damage from Hurricane Ivan on September 16, 2004. SMC states that it expects delivery and installation of a new antenna by May 22, 2007, and that it will then file an application for license.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Construction Permit BPH-20050405AAE was granted on September 21, 2005; however as of the date of this letter no application for license has been filed. The permit expires on September 21, 2008.

¹ WNSI-FM is licensed for operation on Channel 290A (105.9 MHz) with effective radiated power of 3.3 kilowatts (H&V) and antenna height above average terrain of 136 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WNSI-FM may continue to operate with the following facilities:

Geographic coordinates:	31° 02' 14" N, 87° 29' 42" W (NAD 1927)
Channel	290 (105.9 MHz)
Effective radiated power:	1.45 kilowatts (H&V)
Antenna type	Omnidirectional
Antenna height:	
above ground:	87 meters
above mean sea level:	175 meters
Above average terrain:	99 meters

SMC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **May 14, 2008**.

Sincerely,

Charles N. Miller, Engineer
