Re: WVIQ (FM), Christiansted, Virgin Islands
Facility Identification Number: 74457
JKC Communications of the Virgin Islands, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed May 14, 2007, on behalf of JKC Communications of the Virgin Islands, Inc. ("JKC"). JKC requests extension of the special temporary authority ("STA") granted on March 29, 2005, to operate Station WVIQ with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, JKC states that it plans to file an application to modify the station's license.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that, as of the date of this letter, no application for construction permit or modification of license has been filed with the Commission. Thus, we are unable to make a determination that further extension of STA is warranted. Extension will be granted for a limited term of 30 days in order to afford JKC an opportunity to take appropriate action.

¹ WVIQ is licensed for operation on Channel 258B (99.5 MHz) with effective radiated power of 32 kilowatts (H&V) and antenna height above average terrain of 225 meters.

Accordingly, the request for STA IS HEREBY GRANTED, for a limited term as discussed above. Station WVIQ may continue to operate from its licensed site with the following facilities:

Channel	258 (99.5 MHz)
Effective radiated power:	15.4 kilowatts (H&V)
Antenna height:	
above ground:	24 meters
above mean sea level:	245 meters
Above average terrain:	225 meters

JKC must notify the Commission when licensed operation is restored. JKC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein does not cover the period between December 16, 2004, and March 3, 2005.

This authority expires on **December 14, 2007**. Further extension of this authority is not contemplated absent a showing of progress toward restoration of licensed operation.

Sincerely,

Charles N. Miller, Engineer
