Re: Pham Radio Communication LLC (PRC)
KVVN(AM), Santa Clara, CA
Facility Identification Number: 28438
Special Temporary Authority (STA)
BESTA-20170831AAV

Dear Mr. Pham:

This is in reference to the request filed on August 31, 2017. PRC requests an extension of the STA granted on March 20, 2017, to continue to operate ND using reduced power while completing all flood related repairs.¹ In support of the request, PRC stated that all work should be completed within the next several months.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and PRC may continue to operate ND with a maximum of 0.25 kW day and 0.625 kW night. PRC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. PRC must submit a brief e-mail to my attention to confirm that PRC's engineering staff have certified the date the station resumed licensed operations per BMML- 20110620AIE with negligible changes to the operating parameters. (Otherwise an FCC Form 302 application must be filed to update all operating

¹ KVVN(AM) is licensed for DA operation on 1430 kHz with 1 kW day and 2.5 kW night, using different patterns.

parameters if any changes are needed).

This authority expires on **March 28, 2018**.

Sincerely,

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke extending to the left.

Joseph Szczesny, Engineer
