Hallandale Beach, FL 33009

Re: Urban Radio Licenses, LLC (URL)
WVNA(AM), Tuscumbia, AL
Facility Identification Number: 19457
Special Temporary Authority (STA)
BESTA- 20170914ABQ

Dear Mr. Kidd:

This is in reference to the request filed on September 14, 2017. URL requests a further extension of the STA granted on August 9, 2010, to continue operating from the construction permit site using a temporary antenna pending the filing of the required FCC Form 302 license application to cover BP-20170106ABJ.¹ In support of the request, we noted that URL has not yet filed the application.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

We note that the previous STA expired on July 25, 2017, yet our review indicates that the

¹ WVNA(AM) is licensed for operation on 1590 kHz with 5 kW ND day and 1 kW DA night, and BP-20170106ABJ authorizes ND operation from a new transmitter site to be co-located with station WLAY.

circumstances presented warrant grant of this STA in order to provide service to the public. However, in light of the lapse of time between the expiration of the prior STA and the filing of the instant request, the authority granted herein will not cover that time period, and is without prejudice as to whatever action the Commission may take with respect to that operation.

Accordingly, the request for extension of STA is GRANTED, and URL may continue to operate with the following facilities:

Geographic coordinates	34° 40' 27" N, 87° 42' 48" W (NAD 1927)
Frequency	1590 KHz
Hours of operation	Daytime only
Operating power	Not to exceed 2 kW
Antenna type	Existing FM tower with vertical wire feed
Radiator height	87.8° (46 meters)
Antenna efficiency	304.2 mV/m/kW/km
Overall height	46 meters

It will be necessary to further reduce power or cease operation if complaints of interference are received. URL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **April 18, 2018**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Szczesny', with a large loop at the end.
