Re: Mortenson Holdings, Inc. (MHI)
WYSN(AM), Huntington, WV
Facility Identification Number: 61277
Special Temporary Authority (STA)
BESTA- 20171102AAM

Dear Mr. Mortenson:

This is in reference to the request filed on November 2, 2017. MHI requests a further extension of the STA originally granted on April 22, 2014, to continue operation with reduced power to allow time to file the required FCC Form 302 application.¹ In support of the request, we noted that MHI did not yet file the application to cover BP-20160502ABC.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WYSN(AM) is licensed for ND operation on 1200 kHz with 22 kW day, 8 kW critical hours, and 0.009 kW at night, and BP-20160502ABC authorized elimination of the critical hours operation, along with a reduction in daytime power to 5 kW.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and MHI may continue to operate with a maximum of 5 kW (daytime and critical hours), with no change to the licensed 0.009 kW nighttime operation, as authorized by BP-20160502ABC. MHI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 21, 2018**.

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal stroke.
