Re: Alpha Media Licensee LLC
WING(AM), Dayton, Ohio
Facility Identification Number: 25039
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed December 8, 2017, on behalf of Alpha Media Licensee LLC ("Alpha"). Alpha requests special temporary authority ("STA") to operate station WING(AM) with temporary nighttime facilities.¹ In support of the request, Alpha states that the night switching and RF system is not functioning properly. Therefore, the station requests STA to operate with its non-directional daytime pattern during nighttime hours at 25% power to allow repair and return to service of the night directional system.

Accordingly, the request for STA IS HEREBY GRANTED. Station WING(AM) may operate during nighttime hours with the licensed non-directional pattern and with **power not to exceed 1.25 kilowatts**. It will be necessary to further reduce power or cease operation if complaints of interference are received. WING(AM) must notify the Commission when licensed operation is restored.² WING(AM) must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **June 16, 2018**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary

¹ WING(AM) is licensed for operation on 1410 kHz with a daytime and nighttime power of 5 kilowatts, employing a directional antenna pattern at night (DAN-U).

² See 47 CFR §§ 73.45(c), 73.51, 73.61(b).

authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
