Re: La Promesa Foundation (LPF)
WDWR(AM), Pensacola, FL
Facility Identification Number: 21773
Special Temporary Authority (STA)
BESTA- 20171130AAH

Dear Mr. Oswald:

This is in reference to the request filed on November 30, 2017. LPF requests a further extension of the November 18, 2016, STA to continue operating with a long wire antenna to allow additional time to file the required FCC Form 302 application to cover BP-20170213AAN.¹ In support of the request, LPF stated that it plans to file the application after completing all remaining work.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WDWR(AM) is currently licensed for ND operation on 1230 kHz with 1kW (day and night), and BP-20170213AAN authorizes a correction in coordinates, tower height, efficiency, and a reduction in power.

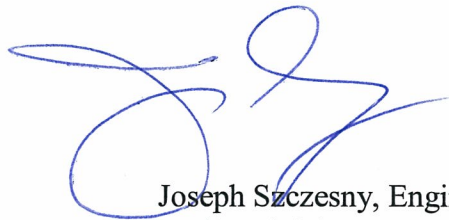

Accordingly, the request for extension of STA is hereby GRANTED, and LPF may continue to operate with the following facilities:

Geographic coordinates	30° 25' 57" N, 87° 13' 07" W (NAD 1927)
Frequency	1230 kHz
Hours of operation	day and night
Operating power	0.25 kW
Antenna type	horizontal long wire antenna (145 feet)
Electrical length	65.3°

LPF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **June 22, 2018**.

Sincerely,

Joseph Szczesny, Engineer
