Re: KMA(AM), Shenandoah, Iowa
Facility Identification Number: 35107
KMA Broadcasting, LP
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed July 30, 2007, on behalf of KMA Broadcasting, LP (KB). KB requests extension of the special temporary authority ("STA") granted on February 14, 2007, to operate Station KMA with temporary facilities to facilitate repairs to the station's antenna system.¹ In support of the request, KB states that substantial progress has been made toward replacement of the center tower of the KMA directional array.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the tower replacement work is complete and that an application for direct measurement of operating power² is on file; thus, the licensee has made substantial progress toward restoring licensed operation. STA will be modified appropriately and extended to provide for continued operation of Station KMA pending staff action on the application.

Accordingly, the request for STA IS HEREBY GRANTED, with modification as noted above. Station KMA may continue to operate during nighttime hours with parameters at variance and/or

¹ KMA is licensed for operation on 960 kHz with 5 kilowatts, unlimited hours, employing a directional antenna during nighttime hours only. (DA-N-U).

² BZ-20070907AHD

reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. KB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **August 14, 2007**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Charles N. Miller, Engineer
