In re: Porter County Broadcasting Holding Corp., LLC
WAKE(AM), Valparaiso, IN
Facility Identification No.: 53507
File No. BZ-20070531BGD

Dear Mr. Miller:

This is in reference to the above-captioned direct measurement of power application filed due to changes made above the base insulator with respect to additional antennas mounted on the tower. A 30 day amendment was requested on September 7, 2007 via an informal e-mail to the licensee.

A preliminary review of the application reveals that:

1. Our records indicate the 110 degree monitor point (MP) for the last license (BL-20050103AJU) was point #19, located 3.2 km from the site, yet Exhibit 1.1 in the application indicates the MP as point #12 at 1.93 km. As a result, an updated monitor point photo and updated brief description (from the closest street intersection/address) must be submitted for point #12, or a statement explaining the reason for the difference if due to some past error before a new license can be issued.
2. Both tabulation pages should be amended to specify "Daytime" instead of "Nighttime" to clarify which pattern was measured.
3. Exhibit 2.1 must be amended to correct the augmented pattern value from 148.46 to 144.5 mV/m, as shown on the last license.

Further action on the subject application will be withheld for a period of thirty days from the date of this letter to allow the licensee time to file a response to this letter. Failure to respond (with a request for additional time to amend) or to file an acceptable amendment will result in the dismissal of the application pursuant to 47 C.F.R. § 73.3568(a).

Sincerely,

Son Nguyen
