In re: KVOD(FM), Denver, Colorado
Facility Identification Number: 53777
Public Broadcasting of Colorado, Inc.
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed June 26, 2007, on behalf of Public Broadcasting of Colorado, Inc. (PBC) PBC requests further extension of the special temporary authority (STA) originally granted on April 21, 1999, to operate Station KVOD (formerly KCFR) with reduced power and a modified antenna.

In support of the request, PBC states that construction of a new tower at Mt. Morrison continues to be delayed by local zoning litigation.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

In view of the above, the request for extension of STA IS HEREBY GRANTED. Station KVOD may continue to operate with reduced power and with a modified antenna, pending resolution of the RFR issues. PBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **June 26, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with the first name "Charles" being the most prominent part.

Charles N. Miller, Engineer
