Re: Mobile Radio Partners, Inc. (MRP)  
WBTL(AM), Richmond, VA  
Facility Identification Number: 21434  
Special Temporary Authority (STA)  
BESTA-20180227AAD

Dear M. Mazursky:

This is in reference to the request filed on February 27, 2018. MRP requests an extension of the STA granted on November 3, 2016, and most recently extended to operate using the WUWN tower specified in BP-20171106AAQ due to loss of the licensed site.<sup>1</sup> In support of the request, we note that the application remains pending at this time.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

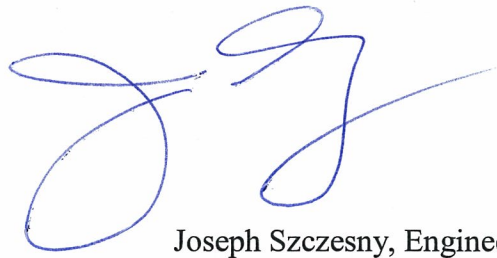

Accordingly, the request for STA is GRANTED, and MRP may continue to operate with a maximum of 0.7 kW daytime only using the existing WUWN tower. MRP must reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **September 8, 2018**.

---

<sup>1</sup> WBTL (AM) is licensed for DA operation on 1540 kHz with 10 kW day and 0.007 kW night, using different patterns, and BP-20171106AAQ authorizes day and night ND operation at the WUWN transmitter site.

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal stroke extending to the right.
