Re: WRNE(AM), Gulf Breeze, Florida  
Facility Identification Number: 41010  
Media One Communications, Inc.  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed August 14, 2007, on behalf of Media One Communications, Inc. (MOC). MOC requests extension of the special temporary authority (STA) granted on February 14, 2007, to operate Station WRNE with emergency antenna facilities due to the destruction of one of its towers by a hurricane.<sup>1</sup> In support of the request, MOC states that, although reconstruction of the licensed facilities has been delayed by adverse weather conditions, fires, flooding and desertion of the project by the contractor, it has made substantial progress toward restoring licensed operation.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

---

<sup>1</sup> WRNE is licensed (BL-20050210A WZ) for operation on 980 kHz with 4 kilowatts daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WRNE may operate during nighttime hours with an emergency nondirectional antenna and reduced power not to exceed 0.25 kilowatt. It will be necessary to further reduce power or cease operation if complaints of interference are received. MOC must notify the Commission when licensed operation is restored. MOC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 18, 2008**.

Sincerely,

A handwritten signature in dark ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
