Subject: KMNY(AM) Operating According to Licensed Specifications

Hello Jerry,

As we discussed, Station KMNY(AM), Hurst, Texas (Facility ID Number 10825) no longer requires Special Temporary Authority to operate at reduced power (10 kW) during daytime hours due to a malfunctioning exciter module. See BSTA-21070912AAL granted 09/15/2017. The exciter module has been repaired and installed and the Station is operating according to its license, so, please cancel this STA.

As always, **thank you** for your assistance. If you have any questions, kindly contact me or Mark Lipp (lipp@fhhlaw.com / 703.812.0445).

My best,

Dawn
