Re: WISM-FM, Altoona, Wisconsin
Facility Identification Number: 1130
Clear Channel Broadcasting Licenses, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed January 22, 2008, on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"). CCBL requests modification of the special temporary authority ("STA") granted on October 5, 2007, to operate Station WISM-FM with emergency antenna facilities pursuant to Section 73.1680.¹

In support of the request, CCBL states that original STA site has become unavailable due to use of that location by another broadcaster. CCBL requests STA for operation from the site specified in pending Application BPH-20070907AEG, but with reduced power².

STA requests which involve a change in transmitter site must include four critical elements: (1) Loss of the licensed site must be beyond the licensee's control; (2) STA facilities must continue to provide service³ to the licensed community; (3) STA facilities must maintain, as closely as practicable, the licensed service area⁴ without extending it; (4) STA facilities cannot involve the construction of towers intended for permanent use by the station requesting the STA. Our review indicates that the proposed STA operation complies with the foregoing criteria.

¹ WISM-FM is licensed for operation on Channel 251C3 (98.1 MHz) with effective radiated power of 10 kilowatts (H&V) and antenna height above average terrain of 53 meters.

² The site is the same as proposed for Station WDVN(AM) in pending Application BP-20070816ABM; a concurrent STA is being granted for Station WDVN.

³ For AM - 5 mV/m; for commercial FM - 3.16 mV/m; for noncommercial educational FM - 1.0 mV/m.

⁴ For AM - 0.5 mV/m contour; for FM - 1.0 mV/m contour.

Accordingly, the request for STA IS HEREBY GRANTED. Station WISM-FM may operate with the following facilities:

Geographic coordinates:	44° 46' 38" N, 91° 28' 29" W (NAD 1927)
Channel	251 (98.1 MHz)
Effective radiated power:	2.2 kilowatts (H&V)
Antenna height:	
above ground:	94 meters
above mean sea level:	362 meters
Above average terrain:	84 meters

CCBL must notify the Commission when licensed operation is restored. CCBL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. The authority granted herein is without prejudice as to the Commission's action with regard to Application BPH-20070907AEG; any construction undertaken pursuant to this authority is entirely at CCBL's own risk.

This authority expires on **July 24, 2008**.

Sincerely,

Charles N. Miller, Engineer
