Victoria,

Thank you very much for your correspondence.

We would like this correspondence to serve as our legal and formal notice that knsj 89.1 FM Descanso is on the air and has been on the air for the last 9 months without significant interruption.

You are very correct that this designation as silent was an oversight on our part. KNSJ did suffer a 26 day period in which we were off the air after the American Tower Company facilities was broken into on Monument Peak where our transmitter and EAS are located and where we rent tower and building space.

When the facility was broken into we sustained a theft of equipment and of course lost the ability to broadcast. We filed with the FCC that we were off the air, but it was our impression at the time that if it was less than 30 days we did not need to file with you a notification that we were back on the air.

The designation that KNSJ was designated as silent did not come to our attention until we did our public filing online. At that point we turned it over to our lawyer Michael Couzens Esq. who has dealt with the FCC all of his life and left it in his hands to get this straightened out. I believe that he would have done so quite a while ago.

Please, please let me know what I can do immediately to notify you beyond this letter that we have been on the air consistently, 24/7 fully complying with EAS and all other regulations.

Feel free to give me a call at your earliest convenience to clarify any of this. Once again thank you for reaching out and for helping us get this status resolved after our oversight.
