Re: WQAQ(FM), Hamden, Connecticut
Facility Identification Number: 54311
Quinnipiac University
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed August 24, 2007, and supplemented on January 8, 2008, on behalf of Quinnipiac University ("QU"). QU requests extension of the special temporary authority ("STA") granted on March 13, 2007, to operate Station WQAQ with temporary facilities.¹ In support of the request, QU provides a report of its progress toward construction of modified facilities authorized by Construction Permit BPEF-20061228AAB. QU states that it has obtained the necessary zoning approval; however, construction also is regulated by the Connecticut Department of Environmental Protection, which has strict zero-pollution regulations. QU provides its estimated schedule for completion of construction.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ WQAQ is licensed for operation on Channel 251D (98.1 MHz) with effective radiated power of 0.016 kilowatt (H&V) and antenna height above average terrain of -25 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WQAQ may continue to operate with the following facilities:

Geographic coordinates:	41° 25' 10" N, 72° 54' 21" W (NAD 1927)
Channel	251 (98.1 MHz)
Effective radiated power:	0.006 kilowatt (H&V)
Antenna height:	
above ground:	7 meters
above mean sea level:	56 meters
Above average terrain:	-27 meters

QU must notify the Commission when licensed operation is restored. QU must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **July 31, 2008**.

Sincerely,

Charles N. Miller, Engineer
