BRCT-650 & BALCT-638:

BY DIRECTION OF THE COMMISSION ltr. 7-21-77 FCC 77-520 70773: The Commission has determined that Trinity Broadcasting of Arizona, Inc., is legally and financially qualified to become the licensee of Television Station KPAZ. Accordingly, the license renewal of KPAZ-TV and the voluntary assignment of the license to Trinity ARE GRANTED subject to the following conditions: (1) That the assignment of license covered by BALCT-638 be consummated within sixty (60) days of the date of the grant, that the Commission be notified of such consummation within one day thereafter, and that the station resume broadcasting within sixty (60) days after consummation of the grant of this application; and (2) That the assignee shall submit to the Commission within ninety (90) days of resumption of operation a full proof of performance containing the data requested by Section II-C of FCC Form 302; and (3) That Trinity file and continue to file with its Annual Financial Report (FCC Form 324) a detailed summary statement regarding the payment of the Glad Tidings debts and obligations assumed and/or the substitution securities offered by Trinity until these debts and obligations are satisfied in full. Regarding condition ~~1~~ (3) above, the Commission wishes to emphasize that it considered the representations made by Trinity concerning the assumption and payment of the debts and liabilities of Glad Tidings to be material and that we expect Trinity to carry out these representations in good faith. This condition will provide the Commission with an opportunity to periodically monitor Trinity's progress in this matter and provide some further protection for the security holders of the Glad Tidings obligations. Failure to meet conditions (1) and (2) will render the grant null and void and will cause the renewal application to revert to pending status.

Data filed in accordance with condition #2 above 11-30-77 & 12-13-77 - to Jim Powers.

## About the History Cards ...

History Cards were first used by the Department of Commerce to keep track of applications filed by, and changes to, the earliest AM broadcast radio stations in the early 1920s. The records were subsequently transferred to the Federal Radio Commission in 1927, and after that to the Federal Communications Commission when that agency was created in 1934. These cards gradually grew into a large card file.

TV History Cards were initiated in the early 1940s, with the authorization of the earliest TV stations. History Cards remained in use until the creation of the first computerized database in 1980 to track broadcast applications, the Broadcast Application Processing System (BAPS). However, the Commission did not transfer the data from the History Cards to the new system. Instead, it retained the History Cards in their original form for reference.

In 1999, the Commission moved to a new location (445 12<sup>th</sup> Street SW), and also at that time created the successor database to BAPS, the Consolidated DataBase System (CDBS). Prior to that move, the History Cards were transferred to microfiche by a contractor (only a few sets of microfiche exist), and the original paper cards were destroyed. The History Cards were stored on the microfiche as negative images, like those you see above.

History Cards contain very brief entries and notes about station facilities, applications, and ownership. They are not, and never were intended to be, a comprehensive record of a station's operations. Nevertheless, they can be useful to help determine, for example, when a station first went on the air and its call letters at that time. History Card comments were generally typed onto the cards, and thus some records will show more faintly or with more smudging than others, depending on the quality of typewriter and ribbon then used. Occasional handwritten comments, corrections, and strikeouts may also be found. Cards may be incomplete, missing, or occasionally out of sequence.

The History Cards are presented here as they were copied to microfiche, to preserve this record for public use, and with the hope that they will be of value to future researchers of television station history.
