Re: Entercom License, LLC
WEEI(AM), Boston, Massachusetts
Facility Identification Number: 1912
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed June 4, 2018, on behalf of Entercom License, LLC ("ELL"). ELL requests special temporary authority ("STA") to operate station WEEI(AM) with parameters at variance from license values and/or reduced power.¹

In support of its request ELL states that on May 14, 2018 engineers noted parameters of both the day and night patterns being slightly out of tolerance. A visual inspection of the antenna system found damage to the elevated ground system with 3 support poles having snapped at their base. Therefore, until the repairs are made, ELL requests STA to operate with parameters at variance during daytime and nighttime hours.

Accordingly, the request for STA IS HEREBY GRANTED. Station WEEI(AM) may operate daytime and nighttime with parameters at variance from license values and/or reduced power. It will be necessary to further reduce power or cease operation if complaints of interference are received. ELL must notify the Commission when licensed operation is restored.² ELL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 6, 2018**.

¹ WEEI(AM) is licensed for operation on 850 kHz with a daytime and nighttime power of 50 kilowatts, employing different directional antenna patterns (DA2-U).

² *See* 47 CFR §§ 73.45(c), 73.51, 73.54, 73.61(b)

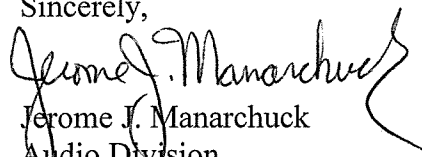

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
