Britton Road, Near Oklahoma City, Oklahoma to North of N.E. 93rd Street, Approx. 1.38 miles East of Oklahoma City, Oklahoma; change type of transmitter to RCA TT-25DL; and type of antenna to RCA TF-6BM (Special), changes in the antenna system, and increase antenna height above average terrain to 1542 feet. (PETITION FOR WAIVER SECTION 73.682(a)(3.5) OF COMMISSION'S RULES FILED SIMULTANEOUSLY) A.D. Ring & Associates, Engr. Robert S. Hodson-atty	GRANTED See back of card re conditions	7-6-64

CONDITIONS

Subject to the following conditions:

1. The transmitters specified herein have not been type-accepted. Accordingly, prior to licensing, acceptable data shall be submitted for type acceptance in accordance with the requirements of Section 73.640 of the Rules.
2. Subject to the condition that a skeleton proof shall be submitted, consisting of at least five field intensity measurements on each radial measured in connection with the original proof of performance, to prove that the directional pattern of Station WXY (A) has not been changed. Data shall include a tabulation of all pertinent meter indications and the measured fields at the monitor points.

LETTER 10-31-80 by William S. Green for The Evening News Association; re financial status.

About the History Cards ...

History Cards were first used by the Department of Commerce to keep track of applications filed by, and changes to, the earliest AM broadcast radio stations in the early 1920s. The records were subsequently transferred to the Federal Radio Commission in 1927, and after that to the Federal Communications Commission when that agency was created in 1934. These cards gradually grew into a large card file.

TV History Cards were initiated in the early 1940s, with the authorization of the earliest TV stations. History Cards remained in use until the creation of the first computerized database in 1980 to track broadcast applications, the Broadcast Application Processing System (BAPS). However, the Commission did not transfer the data from the History Cards to the new system. Instead, it retained the History Cards in their original form for reference.

In 1999, the Commission moved to a new location (445 12th Street SW), and also at that time created the successor database to BAPS, the Consolidated DataBase System (CDBS). Prior to that move, the History Cards were transferred to microfiche by a contractor (only a few sets of microfiche exist), and the original paper cards were destroyed. The History Cards were stored on the microfiche as negative images, like those you see above.

History Cards contain very brief entries and notes about station facilities, applications, and ownership. They are not, and never were intended to be, a comprehensive record of a station's operations. Nevertheless, they can be useful to help determine, for example, when a station first went on the air and its call letters at that time. History Card comments were generally typed onto the cards, and thus some records will show more faintly or with more smudging than others, depending on the quality of typewriter and ribbon then used. Occasional handwritten comments, corrections, and strikeouts may also be found. Cards may be incomplete, missing, or occasionally out of sequence.

The History Cards are presented here as they were copied to microfiche, to preserve this record for public use, and with the hope that they will be of value to future researchers of television station history.
