**Re: Station KXRS, Hemet, California
Facility ID 36829
File No. BPH-20040205AAK, as modified**

Dear Ms. Dortch:

On behalf of Lazer Licenses, LLC ("Lazer"), licensee of station KXRS, Hemet, California, this is to request continuation of tolling with respect to the above-referenced construction permit. Tolling is now set to expire on November 8, 2014. This extension request is predicated on a remand order stemming from an appeal of the unanimous approval by the San Bernardino County Board of Supervisors (BOS) of Lazer's project.

The case is before the Superior Court of the State of California for San Bernardino in Case No. CIVDS 1213273. On October 1, 2013, as a result of an appeal by a local citizens' group, the decision of the BOS approving the permits needed for construction of the station was vacated and remanded to the BOS. The BOS was ordered to prepare an additional environmental impact report on the project. San Bernardino County planning staff is now in the process of developing this additional report. Once prepared, the report will be subject to approval by the BOS and then submitted to the court. It is anticipated that resolution of this matter will take 4-6 months.

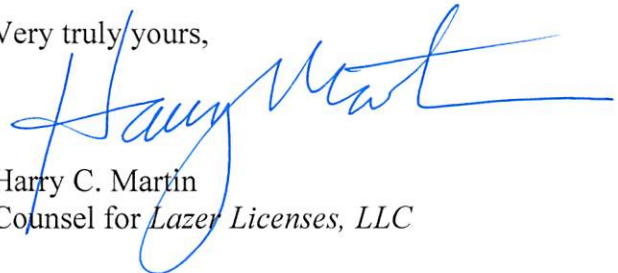

Our last status report was filed May 7, 2014, and was based on the then-pending Petition for Reconsideration filed June 7, 2006, by LBI Radio License Corp., which challenged the FCC's grant of the referenced application. That Petition was denied by the FCC on August 13, 2014. No report of disposition of the Petition was made until now since, in light of the appeal from the BOS's approval of Lazer's project, there is an independent basis for tolling which precedes

denial of the Petition. Thus, pursuant to Section 73.3598(b)(2) of the rules, tolling should continue until the BOS's and the court's review of the additional environmental impact report has been completed.

Should any questions arise concerning this matter, please communicate with the undersigned.

Very truly yours,

Harry C. Martin
Counsel for *Lazer Licenses, LLC*
