Re: K205DM (FX), Glide, Oregon

Facility Identification Number: 92498 Calvary Chapel of Twin Falls, Inc. Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed February 12, 2008, on behalf of Calvary Chapel of Twin Falls, Inc. ("CCTF"). CCTF requests special temporary authority ("STA") to operate FM Translator Station K205DM with emergency antenna facilities pursuant to Section 73.1680. In support of the request, CCTF states that the licensed antenna supporting structure has collapsed due to excessive ice loading. CCTF states that a temporary, 40-foot mast has been erected at the same location as the fallen tower, and that it proposes to operate with reduced antenna height until the tower can be reconstructed.

Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(2) provides that FM and TV stations may erect any suitable radiator, or use operable sections of the authorized antenna(s) as an emergency antenna.

Accordingly, the request for STA IS HEREBY GRANTED. Station K205DM may operate from the licensed site with the following facilities:

Channel

205 (88.9 MHz)

Effective radiated power:

0.008 kilowatt (Max-DA, V only) Scala, model FMV, directional

Antenna manufacturer and type

ocara, inoder i ivi v, directi

Antenna orientatation

200° True

Antenna height:

above ground:

12 meters

above mean sea level:

1308 meters

Above average terrain:

823 meters

¹ K205DM is licensed for operation on Channel 205D (88.9 MHz) with effective radiated power of 0.008 kilowatt (H&V) and antenna height above average terrain of 841 meters.

CCTF must notify the Commission when licensed operation is restored. CCTF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on August 15, 2008.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Charles N. Miller, Engineer
