F.C.C. - WASHINGTON, D. C.

BECT-251 GRANTED 6-17-76 - conditions: The authority granted hereir is subject to the following conditions: 1. That you submit to the Commission within thirty (30) days (with a copy to the Renewal Branch) a list of local minority organizations, agencies, community leaders, schools and colleges with which you will maintain systematic ~~an~~ communication each time your station seeks to fill a position; and 2. That you include in your response to Part II of Section VI of your next renewal application (FCC Form 303) a) a job structure analysis, set forth as a list of all position titles within each FCC Form 395 category (e.g., Officials and Managers, Professionals, etc.) as of September 1, 1978. Under each FCC Form 395 job category, list each job title, ranked from the highest paid to the lowest paid, and specify the number of incumbents by race and sex; and b) a list of all employees hired since the date of this grant by job title and full-time or part-time status, date of hire, referral source, sex and race.

About the History Cards ...

History Cards were first used by the Department of Commerce to keep track of applications filed by, and changes to, the earliest AM broadcast radio stations in the early 1920s. The records were subsequently transferred to the Federal Radio Commission in 1927, and after that to the Federal Communications Commission when that agency was created in 1934. These cards gradually grew into a large card file.

TV History Cards were initiated in the early 1940s, with the authorization of the earliest TV stations. History Cards remained in use until the creation of the first computerized database in 1980 to track broadcast applications, the Broadcast Application Processing System (BAPS). However, the Commission did not transfer the data from the History Cards to the new system. Instead, it retained the History Cards in their original form for reference.

In 1999, the Commission moved to a new location (445 12th Street SW), and also at that time created the successor database to BAPS, the Consolidated DataBase System (CDBS). Prior to that move, the History Cards were transferred to microfiche by a contractor (only a few sets of microfiche exist), and the original paper cards were destroyed. The History Cards were stored on the microfiche as negative images, like those you see above.

History Cards contain very brief entries and notes about station facilities, applications, and ownership. They are not, and never were intended to be, a comprehensive record of a station's operations. Nevertheless, they can be useful to help determine, for example, when a station first went on the air and its call letters at that time. History Card comments were generally typed onto the cards, and thus some records will show more faintly or with more smudging than others, depending on the quality of typewriter and ribbon then used. Occasional handwritten comments, corrections, and strikeouts may also be found. Cards may be incomplete, missing, or occasionally out of sequence.

The History Cards are presented here as they were copied to microfiche, to preserve this record for public use, and with the hope that they will be of value to future researchers of television station history.
