Construction Permit: BP-20140721AAY
as modified by BMP-20170914ABA
License Application: BMML-20180717ABT
Program Test Authority ("PTA")

Dear Applicant:

This is in reference to the above-captioned license application and to program test authority.

Authority is granted WHOO(AM) to conduct program tests in accordance with Construction permit BP-20140721AAY as modified by BMP-20170914ABA and Section 73.1620 of the Commission's rules, on 1080 KHz with a daytime nominal power of 6.0 kilowatts and a nighttime nominal power of 55 Watts. Program tests are authorized with a daytime antenna input power of 6.32 kilowatts (common point current of 11.2 amperes), a nighttime input power of 59.4 watts (common point current of 1.09 amperes) and with the antenna monitor parameters shown on Form 302-AM. This program test authority expires on **November 16, 2018**.

A preliminary engineering study of the application reveals that condition #6 of the permit was not satisfied as an agreement between WHOO(AM) and WAMT(AM) regarding the equipment necessary to prevent interaction, intermodulation, and generation of spurious emission products was not submitted.

Further action on the subject application will be withheld for thirty (30) days from the date of this letter to provide an opportunity to file a curative amendment. Failure to respond or file an amendment within this period will result in the dismissal of the application pursuant to Section 73.3568 of the rules.

Sincerely,

Son Nguyen,
Supervisory Engineer
