Re: KJTV (AM), Lubbock, Texas  
Facility Identification Number: 55061  
Ramar Communications II Ltd.  
Special Temporary Authority

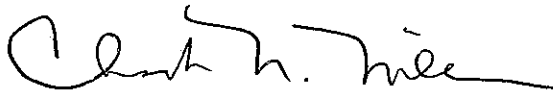

Dear Counsel:

This is in reference to the request filed March 3, 2008, on behalf of Ramar Communications II Ltd. ("Ramar"). Ramar requests modification of the STA originally granted on May 9, 2005, to specify operation with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.<sup>1</sup> In support of the request, Ramar states that it has completed restoration of its transmission system which was destroyed by fire and has restored directional operation. Ramar states that it continues to experience problems with reradiation from several nearby structures which must be detuned before proof of performance measurements can be completed.

Accordingly, the request for modification of STA IS HEREBY GRANTED. Station KJTV may operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. Ramar must notify the Commission when licensed operation is restored.<sup>2</sup> Ramar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **September 6, 2008**.

Sincerely,

Charles N. Miller, Engineer  
Audio Division  
Media Bureau

cc: Ramar Communications II Ltd.

<sup>1</sup> KJTV is licensed for operation on 950 kHz with 5 kilowatts daytime and 0.5 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

<sup>2</sup> See 47 CFR §§ 73.45(c), 73.51, 73.54, 73.61(b).
