Re: KUNI(FM), Cedar Falls, Iowa
Facility Identification Number: 69158
University of Northern Iowa
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed March 7, 2008, on behalf of University of Northern Iowa ("UNI"). UNI requests modification of the special temporary authority ("STA") originally granted on December 11, 2007, to specify operation of Station KUNI with reduced power.¹

In support of the request, UNI states that the station has experienced three transmission line failures in the past three months, that the transmission line must be repaired or replaced, and that the process will take from three to six months. UNI states that it had been operating with a temporary antenna pursuant to the outstanding STA until March 1, 2008.

Section 73.1560(d), which governs reduced power operation, states:

In the event it becomes technically impossible to operate at authorized power, a broadcast station may operate at reduced power for a period of not more than 30 days without specific authority from the FCC. If operation at reduced power will exceed 10 consecutive days, notification must be made to the FCC in Washington, DC, Attention: Audio Division (radio) or Video Division (television), Media Bureau, not later than the 10th day of the lower power operation. In the event that normal power is restored within the 30 day period, the licensee must notify the FCC of the date that normal operation was restored. If causes beyond the control of the licensee prevent restoration of the authorized power within 30 days, a request for Special Temporary Authority (see Section 73.1635) must be made to the FCC in Washington, DC for additional time as may be necessary.

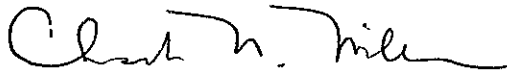

¹ KUNI is licensed for operation on Channel 215C (90.9 MHz) with effective radiated power of 100 kilowatts (H&V) and antenna height above average terrain of 524 meters.

Our review indicates that the request complies with Section 73.1560(d).

Accordingly, the request for modification of STA IS HEREBY GRANTED. Station KUNI may continue to operate with reduced power. UNI must notify the Commission when licensed operation is restored. UNI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 10, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.
